SERIES 1100 ELECTRIC HINGES/PIVOTS

ACSI Series 1100 Electric Hinges/Pivots are designed for doors that require concealed low voltage current transfer, concealed electric monitoring, or concealed low voltage current transfer with monitoring. With over 25 years of experience, ACSI Series 1100 products are UL listed and carry a full one year warranty.

Features

- UL listed
- Provide current transfer to electrified mortise or cylindrical locks, exit devices with electric latch retraction, electric strikes (pairs of doors), and locks with monitoring or request to exit switches
- Rated for 3.5 amp and 16 amp pulse
- Available in Hager, Stanley, McKinney, Bommer, Rixson, Ives, and more
- Standard weight or heavy weight models
- Steel, brass, or stainless steel hinges
- Available in five knuckle and three knuckle hinges
- All architectural finishes in sizes 4x4 through 6x6
- Over 5,000 Hinges/Pivots in stock for same day delivery

Manufacturers

Stanley	Dorma
Hager	Ives
McKinney	Rixson
Bommer	PBB

Hinge Modification Description

* 1102	Concealed electric through-wire (2 wire, 22 ga)
* 1104	Concealed electric through-wire (4 wire)
1106	Concealed electric through-wire (6 wire)
* 1108	Concealed electric through-wire (8 wire)
1100-10	Concealed electric through-wire (10 wire)
1100-12	Concealed electric through-wire (12 wire)
1102x4	Concealed electric through-wire (2 wire, 22 ga x 4 wire, 28 ga)
1110	Concealed electric monitor
1114	Concealed electric through-wire and monitor (4 wire)
1116	Concealed electric through-wire and monitor (6 wire)
1118	Concealed electric through-wire and monitor (8 wire)
1120	Air transfer

* Available in pivot modification

Note:

- Electric hinge must be placed in the center position only.
- ACSI requires NON-NRP hinges for modification. Hinge pin is not field removable after modification.
- ACSI part no. 302-03-03 mortar guard is required for all application with grout-filled frames. Failure to install mortar guard will void the electric hinge warranty.

SERIES 1300 DOOR CONTROLS

MORTISE KEYSWITCH*

ACSI Series 1310 Mortise Keyswitches are designed to control electric locks, electric strikes, electric exit devices, and a variety of other control applications. ACSI 1310 keyswitches allow keying the electrically controlled openings to facility master key systems. DPDT contacts.

Model	Description
1310-1	Keyswitch, single gang, wall mount
1310-2	Keyswitch, single gang, 2 indicators (Red and Green), wall mount
1310-3	Keyswitch, double gang, adjustable time delay (0-30 sec.), wall mount
1310-3-2	Keyswitch, double gang, adjustable time delay (0-30 sec.), 2 indicators (Red and Green), wall mount
1310-4	Keyswitch, narrow style, 1-3/4" frame mount
1310-4-2	Keyswitch, narrow style, 2 indicators (Red and Green), frame mount
1310-5	Keyswitch, double gang, audible alarm, wall mount
1310-5-2	Keyswitch, double gang, audible alarm, 2 indicators (Red and Green), wall mount

PUSHBUTTON SWITCH*

ACSI Series 1320 Pushbutton Switches provide a variety of functions for commercial and industrial door control applications. DPDT contacts.

Model	Description
1320-1	Pushbutton, single gang, wall mount
1320-2	Pushbutton, single gang, 1 indicator (Red or Green), wall mount
1320-3	Pushbutton, single gang, 2 indicators (Red and Green), wall mount
1320-4	Pushbutton, double gang, adjustable time delay (0-30 sec.), 1 indicator (Red or Green), wall mount
1320-5	Pushbutton, single gang, mushroom switch, wall mount**
1320-5-2	Pushbutton, single gang, mushroom switch, 2 indicators (Red and Green), wall mount**
1320-6	Pushbutton, narrow style, 1-3/4" frame mount
1320-6-2	Pushbutton, narrow style, 2 indicators (Red and Green), 1-3/4" frame mount

*When ordering Part No. 1310 or 1320, specify momentary or maintained action.
 **Contacts available in SPDT form only.

EMERGENCY RELEASE

Attractive and durable, ACSI 1330-2 Emergency Release provides manual emergency reporting. The 1330-2 is finished in blue enamel. Supplied with separate N.O. and N.C. contact outputs.

<u>Model</u>	<u>Description</u>
1330-2	Emergency Release

DOOR POSITION SENSORS

ACSI 1335 Door Position Sensors are used to confirm door position. Magnetic sensors mounted in the frame react to the proximity of a magnet mounted in the door. Pneumatic models also available for use in hazardous locations.

<u>Model</u>	<u>Description</u>
1335-1	D.P.S. Standard mortise, SPDT, N.O./N.C. contacts
1335-2	D.P.S. ANSI, SPDT, N.O./N.C. contacts
1335-3	D.P.S. Surface mount, SPDT, N.O./N.C. contacts
1335-4	D.P.S. Standard mortise, AIR, Three-way, N.O. ports
1335-5	D.P.S. ANSI, AIR, Three-way, N.O. ports

INDICATORS

ACSI 1340 Indicators provide visual or audible indication of system status.

<u>Model</u>	<u>Description</u>
1340-1	Indicator, single gang, round LED (Red or Green), wall mount
1340-2	Audible alarm, single gang, wall mount
1340-3	High security audible alarm, single gang, wall mount

DIGITAL KEYPADS

ACSI Digital Keypads offer proven reliability for commercial, industrial, and residential applications. The 1355 Keypads are designed to control any electric locking device.

Features

- Keypad programmable
- 10-30 VDC; 12-24VAC – auto adjusting (for all models except 1355-7)
- 120 user capability
- Over 1 million code combinations
- Adjustable relock delay (1-90 seconds)
- LED status indicators (for all models except 1355-4)
- Request to exit switch input
- Main Relay ON/OFF latching (toggle mode)
- Panic output (for all models except 1355-6 & 1355-7)
- Interface to alarm system
- On board SPDT 8 amp main relay
- Non-volatile memory remembers codes and instructions when power is removed

Model	Description
1355-1	Digital Indoor Keypad
1355-2	Weather Resistant Keypad
1355-3	Sealed Environmental Keypad <ul style="list-style-type: none"> • Weatherproof self-contained metal housing • Vandal resistant • Small design suitable for commercial, industrial, and residential applications

THE SINGLE SOURCE FOR ELECTRIC LOCKING DEVICE POWER SUPPLIES

ACSI Series 1400 Power Supplies are designed and manufactured by ACSI engineers to operate a variety of electric locking devices that will meet the most sophisticated specifications.

ACSI system engineers are available to assist you in the selection of the power supply that best meets your application. All ACSI designed systems include riser diagrams and point-to-point wiring diagrams that allow ease of interface with life safety and security systems.

Architectural Control Systems, Inc.
 10666 Gateway Blvd.

 1-800-753-5558
 www.acsi-inc.com

1410, 1420, 1440, 1400-6100 POWER SUPPLIES

**Features**

- UL Listed
- Filtered/Regulated 24VDC
- 2 amp load capacity
- Overload protection
- Over voltage protection
- Short circuit protection
- Surge suppression on fail safe and fail secure outputs
- Automatically accepts 120VAC or 240VAC input

1410 POWER SUPPLY

Separate plug-in p.c. boards used to control interlocking doors can be programmed for normally locked or normally unlocked operation.

Inputs are available for **fire alarm** and optional **emergency release interface** for override of the interlocking system.

Applications include darkrooms, laboratories, pharmaceuticals, detention centers, money counting rooms, airlocks, clean rooms, etc.

ACSI system engineers are available for design and consultation services to coordinate all aspects of the system.

ACSI electric locking systems and all documentation including riser diagrams and point-to-point wiring diagrams can give distributors a **single source** for their system requirements.

ACSI 1410 Interlock Power Supply is designed to interconnect two or more doors using fail safe locking devices. Each supply can control up to four doors; and the system can be expanded for requirements in excess of four doors.

Any one door can be programmed to be part of (common to) as many as three separate interlocking systems.

Models Available

- 1410-2** 2 Door Interlock
- 1410-3** 3 Door Interlock
- 1410-4** 4 Door Interlock

Note: Available with battery back-up, see 1460 Power Supply

ACSI Interlock System

1420 POWER SUPPLY

- Built-in time delay between activation of electrified locking device and automatic door operator
- Input for optional emergency release switch when urgent unlocking of the door is required
- Auxiliary 24VDC constant voltage output
- Separate 24VDC outputs for fail safe and fail secure electrified locking devices

Note: Available with battery back-up, see 1460 Power Supply

ACSI Automated Door Opening System

ACSI 1420 Power Supply provides power and control for openings with an electrified locking device and **automatic door operator**. Each **1420** includes:

- Separate inputs for activation switch on entry and exit sides of the opening
- Relay contact output to automatic door operator (N.O. or N.C. contacts)

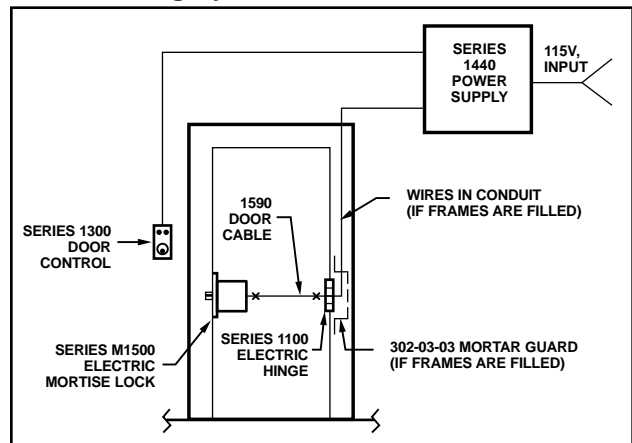

1440 POWER SUPPLY

- Auxiliary 24VDC constant voltage for powering stand alone devices, such as keypads, motion detectors, status indicators, etc.
- Field terminal block set at 45° for ease of installation

Note: Available with battery back-up, see 1460 Power Supply

ACSI Locking System

ACSI 1440 Power Supply provides power for fail safe or fail secure locking devices. Each **1440** includes:

- Interface relay to isolate the locking device current from the control switch

1400-6100 POWER SUPPLY

- Up to 1 amp current draw allowable for each of two outputs to electrified locking device
- Inputs available for optional emergency release switch when urgent unlocking of the door is required
- Convenient field wiring of system components

Note: Available with battery back-up, see 1460 Power Supply

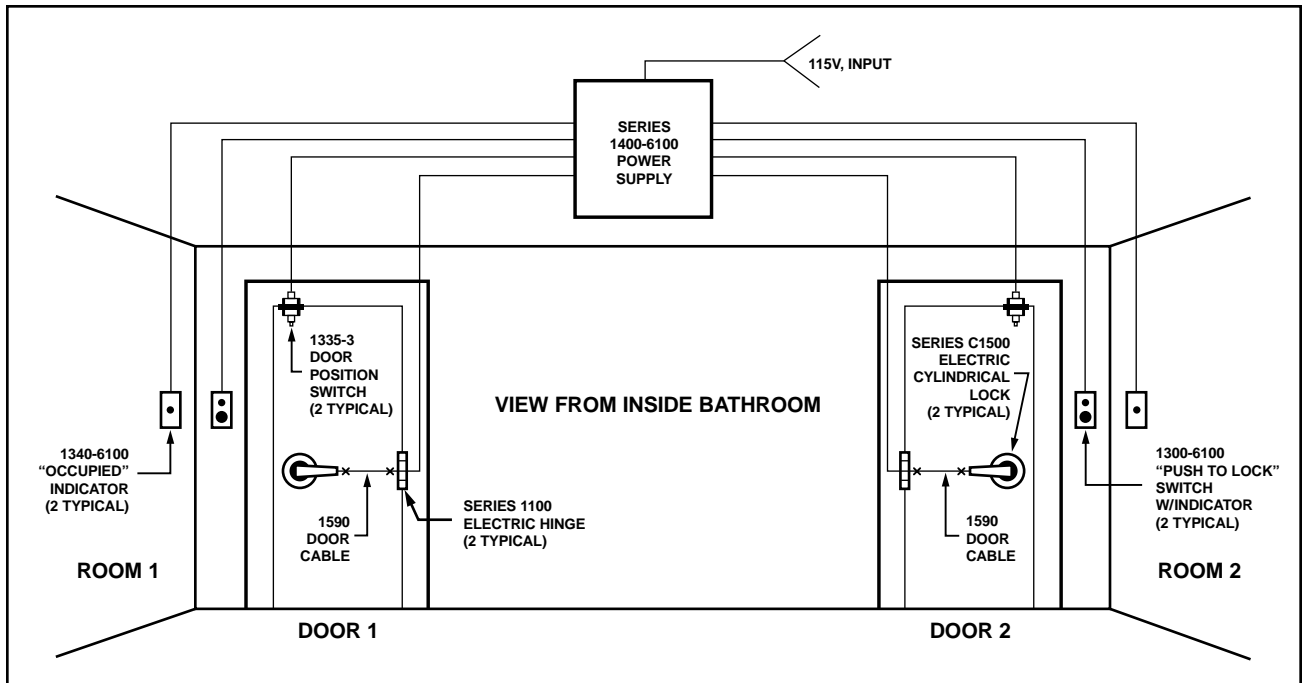

Description of System Operation

When the bathroom is not occupied, both doors are unlocked, and all indicators are extinguished. Upon entering the bathroom from one of the rooms, the occupant depresses the inside push-button switch to lock both doors (both doors must be closed in order for them to lock). When the doors lock, the red indicators inside the bathroom indicate that both doors are locked from the outside. The green indicators outside the bathroom denote that the bathroom is occupied. (Note: Both doors are always free egress and can always be unlocked mechanically from the outside with a key). When the occupant exits either door, both doors automatically return to the unlocked condition and all indicators are extinguished.

ACSI 1400-6100 Power Supply is used exclusively with the ACSI Series 6100 Communicating Door (Common Bath) System. The ACSI **1400-6100 Power Supply** includes:

- Outputs to electrified locking devices that are field selectable for fail safe or fail secure function

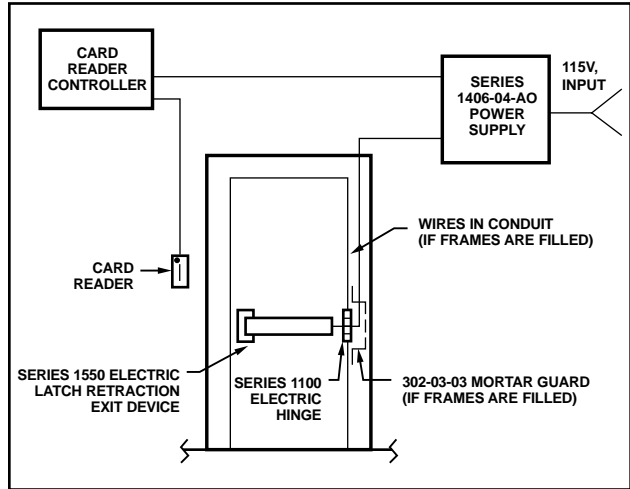

ACSI Communicating Door System

1406/1426 POWER SUPPLIES

ACSI 1406 Application

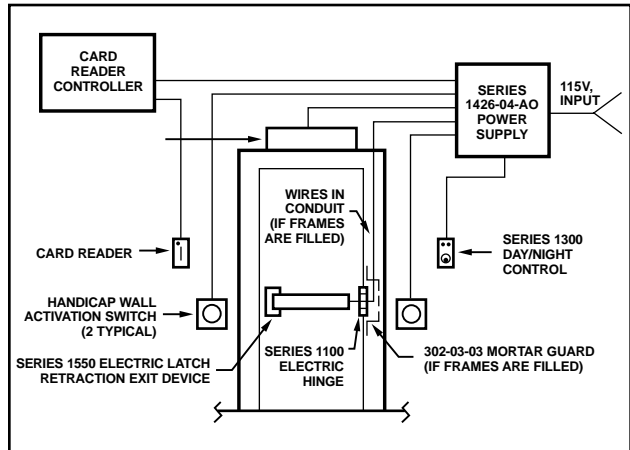

ACSI 1406 and 1426 Power Supplies are designed to operate exit devices equipped with ACSI Series 1550 Electric Latch Retraction.

Features

- UL Listed
- Provides power and control electronics for up to two ACSI 1550 Electric Latch Retraction Exit Devices
- Select from independent control of single exit devices from separate inputs (one or two single doors) or sequential operation of two exit devices from a single input (pair of doors)
- Automatic door operator interface
- Fire alarm interface
- Field adjustable latch retraction time delay
- 24VDC, 12VDC constant voltage outputs (250 mA each)

ACSI 1426 Application with Day/Night Feature

Day/Night Mode-ACSI 1426 Power Supply

Provides a separate input for retracting one exit device or two exit devices sequentially without activating the automatic door operator. While the latches are held retracted, the auto-operator can be activated independently from a different input.

Note: Available with battery back-up, see 1460 Power Supply

1460 BATTERY BACK-UP POWER SUPPLY

The **ACSI 1460 Power Supply** is designed to interface with **ACSI 1410, 1420, 1440, 1400-6100, 1406, and 1426 Power Supplies** providing back-up voltage upon loss of AC power.

Features

- UL Listed
- Provides 2 hours back-up for 2 amp loads, 4 hours back-up for 1 amp loads, or 8 hours for .5 amp loads
- Includes two 12 volt, 4 amp-hour sealed lead acid batteries, battery leads, and power harness adapter
- Overload and short circuit protection
- Battery short circuit solid state protection (PTC)
- Up to 400 mA charging current

1490 DELAYED EGRESS POWER SUPPLY

The **ACSI 1490 Power Supply** is designed to interface with ACSI **electromagnetic locks** in a delayed egress locking application.

Features

- Compliance with NFPA code requirements
- Input for delayed egress activation
- Manual reset of delayed egress alarm
- Optional auto reset available
- Input for fire alarm interface
- Output for audible alarm
- Field adjustable delay for nuisance alarm, door release, request to exit, and auto reset delay times

Description of System Operation

The delayed egress alarm becomes activated when the push bar of the Series 1500 modified exit device is depressed. A concealed AE (request to exit) switch initiates an irreversible cycle that begins with the Series 1300 audible alarm sounding for a predetermined time (field adjustable) while the Series 3700 electromagnetic lock remains energized locking the door.

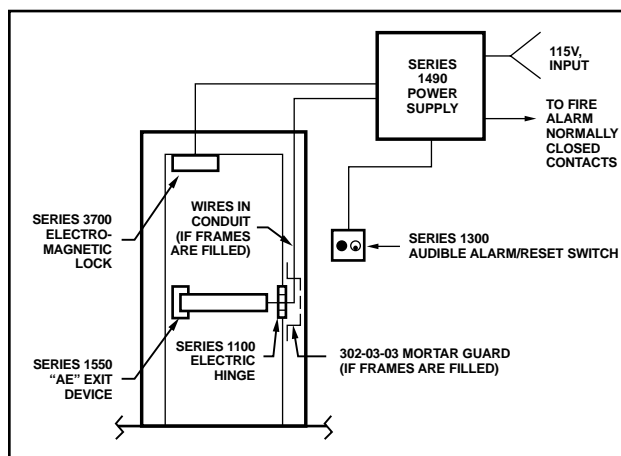

At the end of the timing cycle, the electromagnetic lock de-energizes and unlocks the door while the audible alarm continues sounding. The door will remain unlocked and in an alarm state until manually reset by the Series 1300 key switch. Resetting the system will lock the door by energizing the electromagnetic lock, and will turn off the audible alarm.

Note: The door must be fully closed prior to resetting the system. Resetting with the door open will energize the electromagnetic lock, but will not turn off the audible alarm. The audible alarm will also begin sounding if a forced entry occurs while the system is armed.

In the event of a fire alarm, the electromagnetic lock will immediately de-energize to unlock the door, and the audible alarm will sound. Upon resetting the fire alarm, the system will return to normal standby operation.

A sign above the exit device push bar warns that exiting will be delayed and will also be accompanied by an alarm.

ACSI 1490 Application

SERIES 1400 POWER SUPPLY SPECIFICATIONS

Input

1406, 1426, 1490

- 120VAC, 0.75A, 60Hz

SERIES 1500 ELECTRIC EXIT DEVICES CATALOG

SERIES 1500 ELECTRIC EXIT DEVICES

You supply the exit device and ACSI supplies high quality UL Listed modifications to a wide range of manufacturers exit devices. With over 25 years of electric locking experience, ACSI offers proven design, fast factory delivery and competitive pricing. ACSI engineers and technicians are available to provide system design, wiring diagrams and a variety of technical services.

ELECTRIC LATCH RETRACTION

- ACSI Series 1550 Latch Retraction Exit Device modifications provide a remote means of unlocking exit devices.
- UL Listed for both Panic and Fire Exit Hardware
 - Continuous duty solenoids retract the latch bolt for momentary or maintained periods of time
 - Available in Mortise Exits, Rim Exits, Concealed and Surface Vertical Rod Exit Devices
 - Standard ACSI Series 1550 System includes:
 - 1) ACSI Series 1550 Exit Device Modification
 - 2) ACSI Series 1406 or 1426 Latch Retraction Power supply
 - 3) ACSI Series 1100 Electric Hinge (no special unsightly power transfer device required)
 - Options include Authorized Egress Switch, Latch Bolt Monitoring, Signal Switch and Pneumatic Control

Note: Electrified Vertical Rod Exit Devices are UL Listed to operate properly on doors not exceeding 48 inches wide and 96 inches high.

FAIL SAFE OR FAIL SECURE CONTROL

- ACSI Series 1510/1520 Modifications provide a remote means of locking or unlocking of Mortise Exit Devices.
- Fail Safe (Power to Lock) Control
 - Fail Secure (Power to Unlock) Control
 - Continuous Duty Solenoids
 - Options include Authorized Egress Switch and Monitoring
 - No special power supply required

ELECTRIC TRIM CONTROL

- ACSI Series 1560/1570 Modifications provide a remote means of locking or unlocking of outside lever handle trim controls.
- Fail Safe (Power to Lock) Control
 - Fail Secure (Power to Unlock) Control
 - Continuous Duty Solenoids

Note: Consult Factory for Vertical Rod Devices.

ELECTRIC DOGGING

- ACSI Series 1540 Electric Dogging provides continuous latch retraction and dogging simultaneously. When the ACSI 1540 is energized, first time mechanical activation of the push bar will continuously hold the push bar and the latch retracted. When power is removed or interrupted from the 1540 exit device, the latch bolt will extend and the push bar is released.
- UL Listed for Fire Exit Hardware
 - Provides quiet egress when electrically dogged - Ideal for theatres, libraries, churches and auditoriums
 - 24VDC operation, no special power supply required
 - Available in Mortise Exit, Rim Exit, Concealed and Surface Vertical Rod Exit Devices

Note: Consult factory for Mortise Exit applications. ACSI recommends a 1440 power supply. 1440 options can include an external 24 hour, 7 day or 365 day timer.

Series 1540 Typical Installation

Series 1550 Typical Installation

HOW TO ORDER

1 Lock Type	2 Modification Number	3 Lock Part No.	4 Voltage	5 Options	6 Handing
ME	1510	Full Part Number	24VDC	AE	LHR
RE	1520		24VAC/DC	LM	RHR
VR	1540		AIR		
	1550				
	1560				
	1570				
Example:					
RE	1550	8800 (Sargent)		AE	RHR
ME	1520	9975 (Von Duprin)	24VDC		LHR
VR	1540	7120 (Yale)	24VDC		RHR

** ACSI UL Listed 1406-04-AO or 1426-04-AO Power Supply must be used with latch retraction

1. Lock Type (Select type of lock to be modified)

Model	Description
ME	Mortise Exit Device
RE	Rim Exit Device
VR	Vertical Rod Exit Device

2. Modification Number (Select type of modification required)

Model	Description
1510	Fail Safe Control
1520	Fail Secure Control
1540	Electric Dogging
*1550	Latch Retraction
1560	Trim Control - Fail Safe
1570	Trim Control - Fail Secure

*Note: ACSI UL Listed 1406 or 1426 Latch Retraction Power Supply must be used with ACSI 1550 Latch Retraction Modifications.

3. Lock Part Number

Enter manufacturer's full lock part number (i.e., 9947, 8600, etc.)

4. Operating Voltage

Select required operating voltage
24VDC 24VAC Air

5. Options

Authorized Egress (AE)
 ACSI Authorized Egress (AE) is an SPDT (Single Pole Double Throw) switch which monitors the push bar of the exit device. The AE Switch can be used to:

- Signal a control console when the push bar is depressed
- Activate a door alarm
- Control an electromagnetic lock for egress
- Shunt a door alarm to allow egress

Latch Bolt Monitor (LM)

Latch Bolt Monitoring is an SPDT switch which monitors the position of the latch bolt for both egress and access.

6. Handing

Specify handing of exit device.
RHR - Right Hand Reverse
LHR - Left Hand Reverse

1406 LATCH RETRACTION POWER SUPPLY

Series 1406 Power Supplies are designed and manufactured by ACSI to operate exit devices equipped with ACSI Series 1550 Latch Retraction Modifications.

All 1406 power supplies are supplied with wiring diagrams and detailed installation instructions. ACSI Engineers are available for any questions or consultation regarding wire gauge size, wire run length, or system operation.

- UL Listed
- Built-in adjustable time delay for automatic door operator interface
- Single or multi-door operation from one supply
- Fuse protected
- Fire alarm interface
- 24 volt or 12 volt outputs

Models Available

1406-04-AO Controls up to two doors

1426-04-AO Controls up to two doors, includes day/night mode operation

Typical 1426 Application

The 1426 power supply has all the features of the 1406 supply with the addition of a day/night mode for doors with an automatic door operator.

A pair of doors is to be controlled by a computerized time system where it is to be unlatched during business hours. During this time, a handicapped wall switch located on the exterior and interior sides of the door can be used to activate the automatic door operator.

After business hours, the computer locks the pair of doors and disables use of the exterior handicapped wall switch. The inside wall switch remains enabled after business hours and, when actuated, will momentarily retract the latches and activate the automatic door operator. To gain entry, a card reader located on the exterior side of the door momentarily retracts the latches and simultaneously enables the outside wall switch to be activated by the handicapped.

EXIT DEVICE SWITCH KITS

ACSI K Series Switch Kits are field installed in the touch bar or in the hinge style case of an exit device. K Series Switch Kits include an SPDT (Single Pole Double Throw) switch assembly with long wire leads and easy-to-follow installation instructions. K Switch Kits may be used to:

- Provide instant release of magnetic locks for free egress
- Activate a door alarm
- Signal a control console when the push bar of an exit device is depressed
- Shunt a door alarm to allow free egress

SERIES 1500 ELECTRIC LOCKS

ACSI supplies high quality UL Listed modifications to a wide range of manufacturers locksets. Series 1500 electric locks provide safety and security for stairtower doors or controlled areas where both locking and latching are required. The Series 1500 locks allow remote electric locking or unlocking while conforming to life-safety codes.

Features

- UL Listed
- Fail Safe (Power Lock)
Outside trim is locked when power is applied and unlocked when power is removed (storeroom function when energized). Lockset will unlock in event of power failure (passage function).
- Fail Secure (Power Unlock)
- Continuous duty solenoids
- 24VDC, 24VAC, 12VDC, 12VAC or pneumatic operation
- When key cylinders are provided in the locks, the latchbolt may be momentarily retracted with key even though electrically locked. NOTE: Locks that are electrically unlocked may not be locked via the key cylinder.
- Security cap monitoring available
- Authorized Egress (Request to Exit) available
- Interface with Life-Safety Systems

Applications

Stairtower doors, office doors, classrooms, interlocks, elevator lobby doors, laboratories, computer rooms, cashier stations, hospital equipment rooms, pharmaceutical storage rooms.

Typical Installation

1. Lock Type (Select type of lock to be modified)

Model	Description
M	Mortise Lock
C	Cylindrical Lock
MU	Unit Lock

2. Modification Number (Select type of modification required)

Model	Description
1510	Fail Safe Control
1520	Fail Secure Control

3. Options

Authorized Egress (AE)
ACSI Authorized Egress (Request to Exit) is a SPDT switch which monitors the activation of the INSIDE trim.

- The **AE** switch can be used to:
- Shunt a door alarm to allow egress
 - Signal a control console when the trim is activated
 - Activate a door alarm
 - Control an electromagnetic lock for egress

Latch Bolt Monitor (LM)*
• Latch bolt monitoring is a SPDT switch which monitors the full extension of the main latch.

Security Monitoring (SM)*
• The ACSI **SM** option monitors, in series, solenoid status (locked or unlocked) and latch status (deadlatch position).

Note: Leave #4 blank if no options are required.
* Not available on cylindrical locks.

4. Locking

Model	Description
1	Standard control locks outside (secure side) trim.
2	Locks both sides – Mortise locks only.

5. Lock Part No.

Distributors supply ACSI with mortise, cylindrical or unit locks for modification. Please supply the lock manufacturer's part number.

Example: L9070, 8237, 8708, ND80, 3357, etc.

Note: Refer to the last page of this catalog section for a complete listing of locks required by ACSI.

6. Operating Voltage

Model	
24VDC	24VAC/DC
12VDC	12VAC/DC

Note: Mortise locks can be supplied with pneumatic control. Consult factory.

7. Handing

Model	Description
RH	Right Hand
LH	Left Hand
RHR	Right Hand Reverse
LHR	Left Hand Reverse

8. Quick Connect Cable

Model	Description
QC	Quick Connect Cable
	• QC4 - 22AWG 2 conductor 6' quick-connect cable with two position connector. Allows for ease of installation in transfer of power from the lock to the electric hinge.

ACCESSORIES

Model	Description
1580-1	AC/DC Converter
1580-2	Voltage Regulator <ul style="list-style-type: none"> • Regulates source voltages up to 30 volts DC (35 volts AC) to a 24VDC output level. • Works with AC or DC source voltages • Can be used with 24VAC/DC rated cylindrical or mortise locks up to 360MA. • UL Listed

SERIES 1700 HEAVY DUTY ELECTRIC STRIKES

ACSI Series 1700 Electric Strikes are fire rated and heavy duty for use with cylindrical, mortise, and specialty locksets. Designed for high usage and Grade 1 applications, the 1700 accommodates all locksets with an ANSI 4-7/8" cutout. Accommodates up to a 1" throw.

Features

- BHMA 156.31, Grade 1
- UL 1034, burglary resistance
- UL 10C, 3 hour fire rated (fail secure only)
- Dual voltage field selectable 12/24 VDC
- 27 faceplate options available
- Includes trim enhancer and keeper shims

Series 1700 Typical Installation

HOW TO ORDER

1 Model	2 Options	3 Voltage	4 Finish
Example: 1700KD	F	24VDC	32D

1. Models Available

Model	Description	Finish
1700J	Cylindrical locksets up to 3/4" throw and all locksets with center-lined bolts (including tubular deadbolts up to 1" throw)	32D
1700K	Mortise locksets with a deadlatch positioned above the latchbolt	32D
1700N	Mortise locksets where the deadbolt is used for night-latch function only	32D
1700A	Mortise locksets with a normally extended 1" deadbolt without a deadlatch	32D
1700T	Mortise locksets with a normally extended 1" deadbolt and a center-lined deadlatch	32D
1700R	A hookbolt up to 1" throw	32D
1700E	Corbin Russwin Security Bolt, Weiserbolt, and normally extended 1" tubular deadbolts	32D
1700Z	Unit and mono locks	32D
1700HT	ASSA model 504 mortise lockset with two latchbolts and a center deadlatch	32D

"D" model strikes listed below are designed to accommodate Schlage L Series, Sargent 7700 and 8100 Series, and Yale 8700 offset mortise locks.

1700KD	Mortise lockset with a deadlatch positioned above the latchbolt	32D
1700ND	Mortise locksets where the deadbolt is used for night-latch function only	32D
1700AD	Mortise locks with a normally extended 1" deadbolt without a deadlatch	32D
1700TD	Mortise locksets with a normally extended 1" deadbolt and a center-lined deadlatch	32D
1700HD	Mortise locksets with a 1" deadbolt without a deadlatch. The deadbolt is not released.	32D
1700 HTD	Mortise locksets with a 1" deadbolt and a center-lined deadlatch. The deadbolt is not released.	32D

1. Models Available (cont.)

<u>Model</u>	<u>Description</u>	<u>Finish</u>
“M” model strikes listed below are designed to accommodate mortise locks with a deadlatch positioned below the latchbolt.		
1700KM	Mortise locksets with a deadlatch positioned below the latchbolt	32D
1700NM	Mortise locksets with a deadlatch positioned below the latchbolt and where the deadbolt is used for night-latch function only	32D
1700AM	Mortise locksets with a normally extended 1” deadbolt and deadlatch positioned below the latchbolt	32D
1700HM	Mortise locksets with a 1” deadbolt with a deadlatch positioned below the the latchbolt. The deadbolt is not released.	32D

Electric Strikes/Exit Devices

1783	Rim exits in metal frame applications with a 3/4” pullman latch	32D
1786	Rim exits in aluminum frame and surface vertical rod exit devices with up to 3/4” pullman latch	32D

2. Options

<u>Model</u>	<u>Description</u>
-2	Wood frame applications. Available with J, K, KD, KM, N, T, A, and H strikes.
F	Fail Safe
LBM	Monitors position of latchbolt. Available with J, K, KD, KM, N, ND, NM, Z, J-2, K-2, and KM-2 strikes.
LBSM	Monitors position of latchbolt and keeper. Available with K and KD strikes.

Note: Leave blank if no options are required.

3. Operating Voltage

Model
24VDC/12VDC Field Selectable

4. Finish

Model
Housings available in Black or 32D
Options/faceplates available in Black, 32D, 3, 4, 10, 26, and 10B

Accessories

<u>Model</u>	<u>Description</u>
2001	Plug-in bridge rectifier. Converts AC to DC for applications using an AC voltage source.
2005	Smart Pac II. In-line power control able to receive input voltages from 12-32V AC or DC. Built-in bridge regulator provides 12 or 24VDC output. Under continuous duty the output VDC is reduced by 25% to extend the life of the electric strike. Includes in-line fuse, MOV, and 2-8 second adjustable timer.
2006P	Plug-in buzzer. Audible operation indicator.

SERIES 3700 ELECTROMAGNETIC LOCKS

The Series 3700 UL Listed Electromagnetic Locks combine high security features with fail safe operation and conform with life-safety codes. The Series 3700 is designed for single or pairs of outswing or inswing doors.

Features

- UL Listed
- Variety of models available
- Positive fail safe security
- No moving parts - maintenance free
- Low power consumption
- Built-in surge and spike protection
- Built-in door position sensor

Options

- Magnetic bond sensors
- Built-in delay actuator switches
- Power LED
- Custom length housings
- Variety of architectural finishes
- Glass door brackets

Electrical Specifications

Current draw: .50 amps @ 12 volts
.25 amps @ 24 volts

3795 Shear locks are concealed in door frames.

3750 Magnetic locks will secure sliding doors.

LOCK INTO THE ACSI ADVANTAGE

SERIES 6100 COMMUNICATING BATH DOOR SYSTEM

SERIES 6100 COMMUNICATING BATH DOOR SYSTEM

The ACSI Series 6100 System is designed to coordinate access to a common bathroom facility from adjoining rooms. This System allows more efficient utilization of floor space in facilities by eliminating the need for a bathroom in each room.

Features

- Fail safe system - doors will unlock when power is removed
- Free egress at all times
- User privacy
- Eliminates accidental lock-out of either room to the bathroom
- Mechanical key override allows personnel to enter during an emergency
- 1400-6100 Power supply provided

Options

- Series 6100 System will require one of the following electric locking devices:
 - A** (2) mortise or cylindrical locks with ACSI 1510C-00-1-24VDC/AC modifications plus (2) ACSI Series 1100 Electric Hinges
 - B** (2) 8500-M-PL-24VDC/AC Gemini Locking Systems
- 1320-1 push button switch, normally closed, located above outside doors (used for emergency release).

Item	Qty	Description
1	2 Each	Fail Safe locks. Specify one of the following locks: • M1510C-00-1-24VDC/AC* • C1510C-00-1-24VDC/AC* • 8500-M1-PL-24VDC/AC*
2	2 Each	Electric hinges, Model 1104 (Not required on 8500 locking device)
3	2 Each	Indicators marked "Occupied"
4	2 Each	Push buttons with indicator marked "Push to Lock"
5	2 Each	Door position switches
6	1 Each	1400-6100 Power Supply, 24DC @ 2 amp (not pictured)

Description of System Function

When the bathroom is not occupied, both doors are unlocked, and all indicators are extinguished. Upon entering the bathroom from one of the rooms, the occupant depresses the inside push-button switch to lock both doors (both doors must be closed in order for them to lock). When the doors lock, the red indicators inside the bathroom indicate that both doors are locked from the outside. The green indicators outside the bathroom denote that the bathroom is occupied. **(Note:** Both doors are always free egress and can always be unlocked mechanically from the outside with a key). When the occupant exits either door, both doors automatically return to the unlocked condition and all indicators are extinguished.

HOW TO ORDER

1. Series 6100 System

2. Electric Locking Device Required

The Series 6100 System requires one of the following options:

- A.** 2-M1510C-00-1-24VAC (Electric Mortise Locks)
- B.** 2-C1510C-00-1-24VAC (Electric Cylindrical Locks)
- C.** 2-8500-M1-PL-24VAC (Gemini Locking System)

Note: Specify lock manufacturer being used - i.e. Schlage, Corbin, Sargent, Yale, etc.

3. Series 1104 Electric Hinges

Series 6100 System requires (2) ACSI Series 1104 electric hinges if options A or B are supplied.

Please specify manufacturer, weight, size, and finish of the hinge required.

- i.e. Hager BB1279 4.5 x 4.5 - 26D - 1104
- Stanley FBB191 5 x 4.5 - 10B - 1104

Example:

- 6100 - A - BB1279 4.5 x 4.5 - 26D - 1104
- 6100 - B - FBB191 5 x 4.5 - 10B - 1104

* **Note:** Electric lock/Gemini option and electric hinge option are not included in the Series 6100 price.

SERIES 8500 GEMINI® LOCKING SYSTEM

The patented ACSI Gemini Locking System provides safety and security for stairtower doors or controlled areas where both locking and latching are required. The Gemini system allows remote electric locking or unlocking while conforming to life-safety codes. The System consists of two components: a Gemini modified Mortise Lockset and a frame mounted Gemini Operator.

Features

- UL Listed Gemini Mortise Lock - no special door prep
- UL Listed Gemini Operator located in the frame
- Ability to work with a wide range of manufacturers of mortise locks:
 - Arrow - Corbin Russwin
 - Baldwin - Schlage
 - Best - Yale
- Fail Safe (Power Lock)
 - Outside trim is locked when power is applied, and unlocked when power is removed (store-room function when energized). Lockset will unlock in event of power failure (passage function).
- Fail Secure (Power Unlock)
 - Outside trim is unlocked when power is applied and locked when power is removed. Lockset will lock in event of power failure.
- 115VAC, 24VDC, 24VAC, 12VDC, 12VAC, or Pneumatic operation
- Mechanical Key Override
 - When key cylinders are provided in the locks, the latchbolt may be momentarily retracted with key even though electrically locked.
 - Note: Locks that are electrically unlocked may not be locked via the key cylinder.
- Interface with life-safety systems
- Easy installation: Gemini operator fits easily into 2" face frames. Only one wiring termination.
- Optional quick connect cable
- Continuous duty solenoids
- Heavy duty stainless steel housing
- Security monitoring available
- Interface with Life-Safety Systems
