

PRODUCT SPECIFICATION

Specimen pass-thru cabinet, Bobrick Model B-505.

Specimen pass-thru cabinet shall be constructed entirely of type-304 stainless steel in satin finish. Flanges shall be drawn, one-piece, seamless beveled construction. Spring-loaded doors shall be self-closing, with full-length stainless steel piano-hinge. Doors shall also have interlocking mechanism to prevent both from being open simultaneously, and shall have international graphic symbol identifying usage. Unit shall be equipped with removable stainless steel spillage tray.
