

## PRODUCT SPECIFICATION

**Stainless steel swing-up grab bar, 1-1/4" (32mm) diameter,  
Bobrick Model B-4998.**

Stainless steel swing-up grab bar shall be constructed of type-304 stainless steel with satin finish (or satin finish with peened gripping surface; add .99 suffix to model number). Grab bar shall have wall thickness of 18-gauge (1.2mm) and outside diameter of 1-1/4" (32mm). Backplate shall be constructed of type-304 3/16" (5mm) thick stainless steel with satin finish with 4 countersunk holes for attachment to the wall. Swing-up grab bar shall be manually raised for approach or departure and lowered to horizontal position for support. Once bar is raised more than 45° from horizontal position, counterweighted design shall prevent bar from falling. Grab bar shall comply with ICC/ANSI A117.1-2003 Accessibility Standards in U. S. A.
