Stor & Go® Ethanol Fuel Treatment & Stabilizer

4-in-1 Formula

The **ULTIMATE** Protection & Performance

- Maximum Corrosion Protection
- Stabilize Fuel in Storage & in Use
- Cleans Entire Fuel System
- Restores Power & MPG

Ethanol-blended fuel can lead to excess water in the fuel system; water in the fuel system can lead to severe corrosion, engine damage and unanticipated shut-down.

Ethanol is naturally attracted to water and prone to separating from the gas and blending with any water molecules in the fuel system. This harmful "phase separation" of the fuel can lead to severe corrosion, decreased fuel economy and engine performance, rough starts and hesitation.

In addition, the cleaning properties of ethanol can loosen varnish and corrosion deposits which then travel through the fuel system.

STOR & GO helps prevent phase separation with the 4-in-1 formula that protects all gas-powered 2- and 4-cycle engines against corrosion, cleans the entire fuel system, stabilizes fuel for long-term storage and restores power and mileage potential.

Laboratory testing proves STOR & GO provides better water removal capability (per modified ASTM D 1401) and better corrosion protection (per ASTM D 665) than other leading ethanol fuel treatments.

1 oz treats 10 gallons for everyday protection. 1 oz treats 5 gallons for storage. Stabilizes fuel for 24+ months.
