

The Right Source for Electronic Door Controls

FIRST IN THE INDUSTRY FOR INNOVATION, QUALITY AND VALUE!

CM-54 SERIES

ILLUMINATED PUSH PLATE SWITCH

- Changes color (blue, green or red) upon activation
- Increased visibility for access control and restroom applications
- 3 Models: CM-54B blue only; CM-54BR blue/red; CM-54GR green/red illumination
- Supported with the industry's largest selection of 4 1/2" square push plates

AURA
BY CAMDEN

1ST *'Changing State' Illuminated Push Plate Switch*

CM-120 SERIES

DIGITAL KEYPADS

- Field selectable Stand-Alone or Wiegand Output
- Optional 2 Channel Plug-in Lazerpoint RF™ Wireless Transmitter
- 999 Users with 10 million variable length codes
- (2) 3 Amp. Form 'C' Relays with independent control

1ST *Stand-Alone, Wiegand or Wireless Keypad*

CX-EPD2000 SERIES

PRE LOAD STRIKES

- Standard body models with selection of 4 faceplates
- EZ FIT™ 'no cut' model offers both vertical and horizontal faceplate adjustment
- 'All in One' 12/24V AC/DC and selectable fail safe/fail secure
- Latch monitoring and adjustable keeper standard

1ST *'No Cut' Strike with 65 lb. Pre Load*

CM-75 SERIES

9" AND 36" PUSH PLATE SWITCHES

- ADA compliant, meets or exceeds California building code
- Over 94 square inches total activation area (CM-7536)
- Choice of 4 different graphics, and aluminum or dark bronze finishes
- Optional 'snap-in' Lazerpoint RF™ wireless transmitters

1ST *Push Plate with (2) Redundant 15 Amp. Switches*

ELECTRIC STRIKES

Camden strikes are designed for various commercial and industrial applications. They are precision engineered and UL1034 listed. All models are reversible for RH/LH doors and are continuous DC operation. Four stainless steel faceplate options are available. Latch monitoring is standard on pre-load 20 series and optional on 10/14/18 series. Five year warranty.

10 and 18 Series electric strikes are BHMA Grade 1 rated. Designed for heavy duty applications, the all-in-one strikes are factory tested to 1.5 million cycles and offer dual voltage, field selectable fail secure, fail safe operation. The 18 Series feature EZ Fit™ installation in any ANSI strike plate door frame opening without cutting or drilling. EZ Fit™ models are the only strikes on the market to offer both horizontal and vertical adjustability.

14 Series fire strikes are BMHA Grade 1 rated, factory tested to 1.5 million cycles. Dual voltage and field selectable fail safe/fail secure. CX-EL1400/10/20/30/40 electric strikes are UL1034 and Warnock Hersey fire rated. CX-EL1450A/AL models are UL10C fire rated for installation in fire rated doors without cutting or drilling. This eliminates the on-site inspection required by AHJ when installation of the strike alters the fire rating of the door.

CX-EL1450A

ELECTRIC STRIKES

20 Series Pre Load electric strikes offer the highest pre load rating, 12/24V AC/DC operation, adjustable keeper, fail safe/fail secure operation, and latch monitoring. Latch cavity accommodates cylindrical locksets with 1/2" to 5/8" projection (1/8" door gap required) with a range of faceplates for installation in steel, aluminum and wood doors. EZ FIT™ CX-EPD2850L installs in a standard ANSI strike plate opening without the need to cut or drill the door frame. CX-EPD2850L also features horizontal and vertical faceplate adjustment.

MAGNETIC LOCKS

- Compatible with all access/egress systems
- Aluminum/stainless steel casings are weather and vandal resistant
- On board MOV's provide protection against voltage spikes and surges
- Assorted mounting brackets and filler plates available

TDS models are supplied with a Lock Sensor (Bond Sensor) to indicate that the door is secure. The built-in timer eliminates the need for add-on exit delay timers. Also included with TDS models: door position switch, relay, and LED.

SPECIAL PURPOSE SWITCHES

Sure-Wave™ Hands-Free Switches offer the ultimate in performance, public health safety, and convenience.

Sure-Wave™ is recommended for use in barrier-free applications, restrooms, hospitals and clean rooms. Sure-Wave™ is also ideal for commercial and industrial applications where hands-free activation is desired, such as drive-up windows, and kitchen doors in restaurants.

Sure-Wave™ features an operating range of 1-26", adjustable time delay of 1-5 seconds, and provides superior performance in all ambient lighting conditions. Choice of one-piece molded ABS or stainless steel faceplates. May be used in all weather conditions and environments.

Sure-Wave™ operates on 12 – 24 V AC/DC, and has a heavy-duty 5 amp relay, ensuring compatibility with all automatic door operators and electrified locks.

ALL-ACTIVE PUSH PLATES

Aura™ CM-54 Series illuminated push plate kits provide high visibility and enhanced user convenience in ADA compliant automatic door and other applications.

CM-54B model features a continuous 'back lit' blue illumination. CM-54BR and CM-54GR models offer 3 additional features: selection of backlight colors (blue/red or green/red), an audible sounder that confirms switch activation, and Form 'C' contacts used to switch your device.

Aura™ illuminated mounting boxes are compatible with the widest range of 4 ½" square All-Active™ push plate switches in the industry.

OPTIONS

Lazerpoint RF™ Compatible Enclosure will accept CM-TX9 Transmitter and battery pack (power required for illumination).

Note: Enclosure will not accept DPDT contact option.

ALL-ACTIVE PUSH PLATES

CM-75 Series Column™ push plate switches offer an elegant design that is attractive, easy to operate and built to last. Models are available in anodized aluminum finish (epoxy printed blue graphics) or dark bronze anodized finish (epoxy printed white graphics).

The innovative end caps are made of impact and flame resistant polycarbonate, designed for easy 'snap-in' installation and service of Lazerpoint RF™ wireless transmitters and batteries. There is an option for a factory installed wireless transmitter. Column™ push plate switches are ADA compliant and exceed the requirements of the California Building Code, Section 1117B.6.

Column™ push plate switches are easily mounted on exterior or interior surfaces and offer 4 leveling screws to accommodate uneven walls, such as brick or concrete. For installations that require an exterior freestanding switch, Column™ switches are compatible with color matched Camden CM-42 and CM-48 Series anodized aluminum and dark bronze bollards.

WIRELESS DOOR CONTROL

Lazerpoint™ RF is a completely new RF solution for automatic door operators and introduces the many advantages of our proprietary 915MHz spread spectrum wireless technology. The system encompasses the widest range of transmitters, receivers, activation devices and switch enclosures available today. Lazerpoint RF™ has been designed to provide the very best performance and value in new installations and is 'backwards compatible' for use in retrofit upgrades with 300MHz., 318MHz., 390MHz. and 433MHz. daughterboards.

MOUNTING OPTIONS FOR ALL-ACTIVE SWITCHES

ABS Plastic Escutcheons. Vandal and weather resistant low profile escutcheons for mounting 4 1/2" round switches (CM-40 series) and 6" round switches (CM-60 series). Constructed of high impact, flame proof ABS. Patented 2-piece design and ideal for use with Lazerpoint RF™ wireless transmitters. Front section (CM-49A / 79A) attaches to in-wall one gang, two gang, or 4 x 4 boxes. Use CM-49B / 79B for surface mounting.

Mounting Posts are available in 42" (38" switch height) and 48" (44" switch height) models, constructed from 1/8" extruded aluminum. They are available in clear aluminum, dark bronze anodized, and mill finishes (suitable for painting). Posts are supplied with a flame and impact resistant ABS post cap, steel mounting base, and stainless steel mounting hardware. An optional in-ground mounting base has re-bar welded to the base and is supplied instead of the standard mounting base.

KEY SWITCHES

For over 20 years, Camden has built its business on manufacturing the most rugged and competitively priced key switches, for security, access control and automatic door applications. In addition to the stock key switch models shown in this catalog, Camden also offers a wide array of custom key switch options, including LEDs, faceplate finishes and printed or engraved logos and text.

CAST ALUMINUM KEY SWITCHES

Camden heavy duty cast aluminum key switches feature a 1/4" thick vandal resistant faceplate, one-piece faceplate/switch bracket casting, easy assembly of 1 or 2 switches, and accept virtually any 1" - 1 1/4" mortise cylinder (sold separately) and any cam.

See page 34 for a complete list of LED and mortise cylinder options.

KEY SWITCHES

STAINLESS STEEL KEY SWITCHES

'Camden Tough' stainless steel key switches offer thicker faceplates for longer life, rounded metal edges for safer installation and a preassembled key switch mounting bracket, to reduce installation time. These stainless steel key switches work with virtually any 1" - 1 1/4" mortise cylinder (sold separately) and any cam.

See page 34 for a complete list of LED and mortise cylinder options.

WIRELESS FLUSH MOUNT KEYPADS

CM-120TX Series wireless keypads utilize Lazerpoint RF™ 2-channel spread spectrum communications to provide the industry's most reliable wireless operation. These outdoor vandal resistant, backlit keypads support up to 999 users, with fixed or variable length codes. CM-RX 91/92 Series receiver required, sold separately.

FEATURES

- 999 Users with 10 million variable length codes
- Multi-year battery life, using inexpensive 'AA' alkaline batteries.
- Advanced 915Mhz. spread spectrum (Broadband) wireless communications for outstanding performance
- Exclusive 'low battery' test gauge, signal strength meter and auto enrollment.

TELEPHONE/ACCESS CONTROL SYSTEM

CV-TAC400 provides a full array of 'large system' features, combining telephone entry and card access at a remarkable 'small system' price. TAC™ supports the addition of card readers, elevator controls, RF controls and other wiegand devices, allowing for a fully integrated building security system. CV-TAC400 has been designed for easy property management. The system can be ordered for local (hardwire) programming via USB connection, where there is on-site management. Or it can be supplied with a modem, making it ideal for multiple building, off-site system management.

CV-TAC400 provides the ability to add fully integrated card access performance, easily and affordably. Both the telephone entry and access control systems utilize a common configuration and reporting software platform. CV-TAC400 is offered with a choice of HID/AWID compatible card readers. Camden also has a wide selection of other wiegand readers, keypads, and RF controls that may be used with the system.

For use in apartment/office buildings, condominiums, rec/sports centers, and other applications where a combination of security and communications are required for controlling resident and visitor traffic.

CV-TAC 400

TELEPHONE ENTRY FEATURES

- Built-in electronic display, with 8 line tenant listing
- 500 name directory
- Full audit capability for all entrances and other secured areas
- Master/slave configuration; up to 3 slave panels for visitor parking, garages, etc.
- Robust keypad with dedicated scroll and call buttons
- 15 digit dialing
- Supports after-hour auto attendant
- Local (via USB) or remote (via telephone modem) programming
- Supports PIN code access for emergency and other services
- Built-in proximity reader (optional)
- Wiegand output (for integration with other access control systems)
- Heavy-duty stainless steel faceplate
- Flush mount enclosure, with optional vandal/rain hood.
- Optional stainless steel surface enclosure with rain hood
- Optional heater kit

ACCESS CONTROL FEATURES

- HID/AWID format card reader built into front face of lobby panel, and up to 3 slave panels
- Up to 12 CV-TAC4WC Wiegand controllers, for adding card readers or other Wiegand devices (one device per controller)
- Up to 3,000 user codes
- 20 time zones, 8 access levels, and holiday schedules
- 4000 audit transactions
- RS485 polling
- Supervised inputs throughout the system
- Elevator control, up to 48 floors, 4 cabs per system

TELEPHONE/ACCESS CONTROL SYSTEM

GUARD/CONCIERGE PHONE SYSTEM

This auto-dialer is designed for staffed locations, where an attendant will greet visitors, call the resident's suite for authorization, then allow/deny access accordingly. Up to 1000 suite capacity. Kit includes keypad and privacy handset/cradle. There is no directory provided with this system.

GUARD/CONCIERGE PHONE SYSTEM

Model	Description	List Price
CV-TAC400G	Auto dialer for guard (concierge) station, with software, keypad and handset	1820.00

For additional auto-dial and no phone bill solutions, contact the factory.

CV-TAC400G

TELEPHONE ENTRY/ACCESS CONTROL INTERFACE

CV-800 Serial to Wiegand Converters, provide a flexible and efficient way to integrate a telephone entry system with an access control system, CV-800 works with virtually all card access systems, and select models of Viscount, SES, and Sentex phone entry systems.

Building security is greatly enhanced as CV-800 allows the access control system to manage/control the building entrance – not the telephone entry system. In addition, CV-800 provides the building owner and manager with a complete audit trail of all persons entering the building, as well as a record of residents granting visitors access via the telephone entry system. CV-800 also monitors the postal lock switch.

TELEPHONE ENTRY/ACCESS CONTROL INTERFACE

Model	Description	List Price

CV-800EP

SINGLE DOOR PROXIMITY CARD READERS

CV601 MPROX provides excellent security and functionality, and is easy to program and install. MPROX consists of two parts: a vandal and weather resistant mullion-mount proximity reader, and a small programmer/controller, which is installed on the secure side inside the facility. An additional reader can be added for in-out control of a single door or for ease of programming. The system has a capacity of 999 users. Cards/fobs can be individually or batch enrolled/deleted. All programming is done through the controller and reader – there is no need for computers or software to enroll or delete cardholders.

FEATURES

- Up to 999 users
- Jamb-mount proximity reader
- Vandal and water resistant reader (IP 67)
- Reader and controller may be up to 200 ft (70 metres) apart
- Operates with prox cards or fobs
- Request-To-Exit input (N/O)
- Bi-color LED and sounder
- Door open time: 1 - 180 seconds, or latching
- Programming password (optional use)
- Form C (N/O + N/C) relay, 5 amps
- 12V AC/DC operation
- Presence Input (parking, mantrap applications)

CV-32 A1

HARDWARE

- Flash firmware technology for easy upgrades
- Supports 2 card readers – card reader/keypad combo per panel
- R-MOD enables in/out control of one door on each reader port
- Stores up to 3,000 transactions off-line
- Supports fully supervised communication via RS-232, RS-485 and TCP/IP
- 8 fully supervised programmable inputs (4 state monitoring alarms)
- 8 programmable outputs
- Reads 5 card formats per panel
- TCP/IP network ready (CV-LNM required)
- 12V DC @ 2A power supply (included)
- Battery back-up on system memory
- HVAC and Lighting Control
- Elevator control 8 to 32 floors (optional hardware required)

SOFTWARE

- Up to 64 reader capacity, expandable to 128
- 5000 cardholders per panel (upgradeable to 8000)
- 40 holiday schedules
- Auto card expiry by date up to five years in advance
- Multiple credentials per user
- Global and timed anti-passback
- Time and attendance reports
- Multiple language – English, French, Spanish and Chinese
- Unlimited global link commands
- Customized formats for exporting reports
- Advanced client-server design with up to 10 simultaneous full function clients over LAN/WAN
- Multiple-site management
- Multi-swipe functionality (2, 3, and 4 swipes)
- Visitor management
- Photo badging (optional)
- Card import (from other systems - optional)

COVERT FACIAL IDENTIFICATION CAMERAS

EXIT WATCH™ COVERT DOOR FRAME, HIGH RESOLUTION COLOR CAMERAS

Exit Watch is installed on the frame of the exit door, which is the ideal location to capture clear and close-up video images. To all appearances, the unit is a typical height strip you would see anywhere. Exit Watch provides positive facial identification - perfect for use in banks, restaurants, filling stations and other retail applications.

The high quality optical lens and ultra-small high resolution CCD camera makes Exit Watch one of the most advanced units available. The heavy duty, dark brown or silver steel case and back-screened multi-color faceplate are designed to keep the unit looking new by protecting it in high traffic areas.

The adjustable/lockable swivel bracket mounts directly to the door frame, enabling Exit Watch to be precisely adjusted for single or double door applications. Exit Watch provides clear and distinct images to law enforcement agencies for identification needs.

The compact EX-7 (6.5" long) can be mounted on either the door frame or over the door (horizontally). Exit Watch kit includes mounting hardware and 12 VDC regulated plug-in power transformer.

TERMS AND CONDITIONS

Prices: All prices are in U.S. , and are subject to change without notice.

Freight: All goods are shipped F.O.B. Camden warehouses. Deliveries are made via FedEx / UPS ground service, unless otherwise specified by customer. Customer must make any claims for damage in transit or missing boxes to Camden and/or transport company. Claims for packing and/or ordering errors should be made directly to Camden within ten days of receipt of merchandise.

Minimum Order: Camden does not have a minimum order policy but reserves the right to charge a \$25 handling fee on orders less than \$50 upon notice.

Payment Terms: Net 30 days.

Return Policy: Returns will not be accepted unless accompanied by a Return Goods Authorization (RGA) number. Contact factory for details.

Warranty: All Camden product carry a 3 year warranty. Electric strikes offer a 5 year warranty. Piezo electric switches and magnetic locks carry a lifetime warranty. This warranty applies to products that have failed in the course of normal use, and not the result of improper installation or vandalism. Upon inspection, Camden will repair / replace returned goods, or issue credit. Returns must be shipped freight prepaid, and will be returned freight prepaid. Please note any shipment sent to Camden freight collect, will be refused. All returns must be accompanied by a returned goods authorization (RGA). Contact Camden for details.

Effective: October 1, 2012

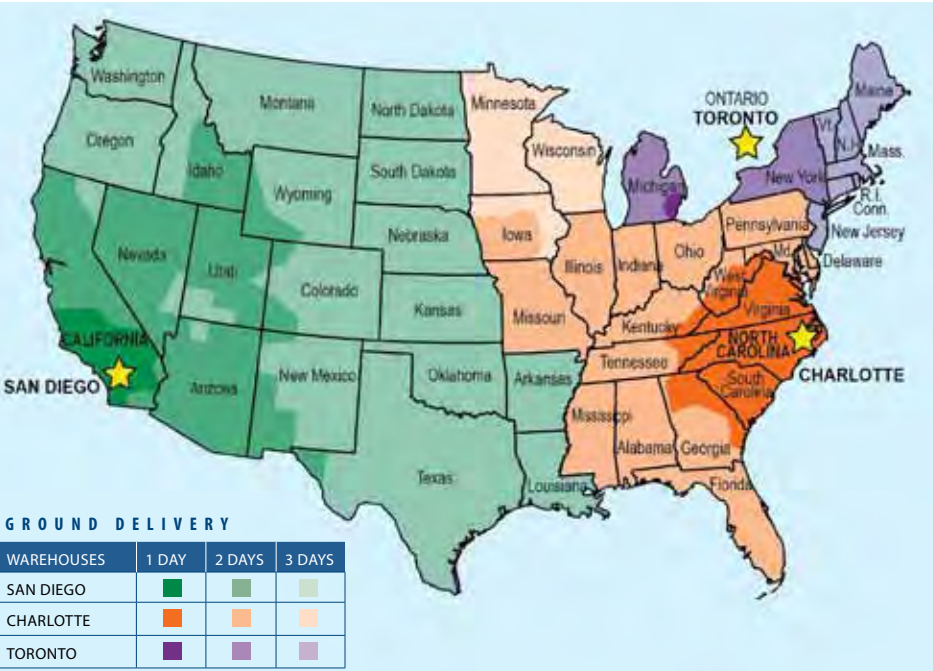

CAMDEN DELIVERS!

Camden works harder to earn your business with a true dedication to product quality, delivery and support.

Quick Ship

Multiple warehouses allow Camden to offer our customers the fastest delivery and reduced shipping costs. With the opening of our newest San Diego, California location, Camden now has 3 warehouses to support your business. The map below shows estimated Fed Ex/UPS ground delivery time-in-transit. Please confirm warehouse of origin to determine estimated times. For even faster delivery, air service is available from all locations.

Customer Service

For product selection, expedited shipping or warranty inquiries, our Customer Service department is available by toll free telephone or email and is always happy to assist you.

Camden maintains 3 Quick-Ship locations across North America to serve you better.

Each warehouse offers:

- An inventory of more than 100 Camden products (see listing and check for regular updates)
- No 'fine print' rules on qualifying orders, back-orders and cancellations
- Online tracking through the Camden web site (www.camdencontrols.com)

Quality /Warranty

Camden Door Controls is an ISO-9001:2008 certified manufacturer with internationally recognized quality management processes. It is this commitment to quality that allows Camden to provide the best product warranty in the industry; **Full life-time** warranty on Magnetic Locks, vandal proof switches and Piezo electric keypads, **5yr.** warranty on electric strikes, and **3yr.** warranty on our complete line!

Certified ISO 9001: 2008
