INDUSTRIAL & INSTITUTIONAL CLEANING

MOPPING PERFORMANCE GUIDE

FIBERS

Cotton Mops—Basic Cleaning Needs!

The cut-end is the standard, most popular and MOST economical (in the beginning) mop style. Great for absorbing liquids. Used for spills, and basic floor cleaning at the lowest cost. They are a disposable item since they cannot be laundered and are not recommended for use with laying finish as they absorb too much liquid. Cotton mops need a break in period due to the natural oils in the fiber.

Rayon Mops—Great for Floor Finishing!

Rayon mops lint much less than cotton mops and have a slower absorption rate making this a cost effective mop to lay finish. Rayon mops need no break in period and can be used for basic cleaning needs.

Blended Mops—Commercial Use!

Blended mops offer the best combination of water retention/strength and performance. These are the choice of healthcare/commercial users.

Micro Fiber Mops—Great for Healthcare and Rough Surfaces!

Microfibers are densely constructed, polyester and polyamide (nylon) fibers that are approximately one-sixteenth the thickness of a human hair. The density of the material allows it to hold six times its weight in water, making it more absorbent than cotton mops and stronger than rayon fibers. These fibers offer the best characteristics of both absorption and strength and can be washed and reused many times. Our Heaviest Duty and Best Quality Mops

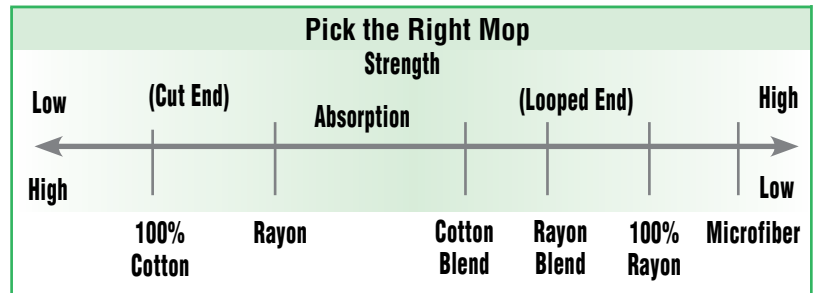

STYLES

Cut-End Mops—Lowest Cost!

Low initial cost, but not long lasting. Poor coverage area and tends to lint leaving yarn on floors. Tangles frequently due to the loose fibers.

Looped Mops—Improved Performance!

Looped-end mops perform better and last longer. They have a better coverage area than cut end mops and lint much less. Can be laundered in mesh bag.

BROOM CHART

CORN BROOMS

Corn brooms are made from 100% Corn Fiber and are the most durable type of broom available. They are great for flour and spice pick-up.

BLENDED FIBER CORN BROOMS

Blended brooms are made from 30% Corn and 70% Yucca Fibers. Yucca is much thicker and stiffer than corn, and also less expensive. However, it does not have the durability of an all Corn Broom.

ANGLE BROOMS

Angle Brooms have synthetic bristles with flagged ends. The flagging keeps dust from spreading around the room, and picks up fine dust particles.

COLOR CODED INTERCHANGEABLE HANDLE SYSTEM

PROGRAM AVAILABLE IN BOTH MALE AND FEMALE STYLE TOOLS

Introducing our NEW color coded Interchangeable Handle System designed to simplify cleaning, sanitary and safety procedures. Our NEW tool program helps reduce cross contamination and slip and fall incidents. Each specialty tool was designed for a specific purpose in the cleaning process, all while using one interchangeable handle system.
