Transfer Device Solutions

Hardwiring Made Easy™
ELECTRO **Lynx**®

McKINNEY QC hinge transfers power from the power supply to the exit device

Electromechanical exit device with ElectroLynx

3" cable, minimum, needed between electromechanical exit and QC hinge

Contents

How ElectroLynx® Helps

To answer the demand for "smart" electronic access control and locking solutions that require fast, easy, and cost-effective installation, ASSA ABLOY Group brands use the ElectroLynx standardized plug-in connectors and color-coded wiring system. With ElectroLynx, doorway components come pre-wired for easy hookup to the power source. Key to the system is the transfer device hinge that carries power from the frame to the locking hardware.

Overview:

- Makes it easy to bring power to the locking hardware

- Wires have connectors that snap together, like plugging a telephone into a jack

- Developed by ASSA ABLOY and rapidly becoming the industry standard

Key Benefits of ElectroLynx Include:

- Fast, fool-proof, and future-proof installations

- Easy upgrades and retrofitting while maintaining fire rating

- Snap-together Molex® connectors ensure proper connections

- No need to match up wires, create connections or drill holes in the door or frame

- Concealed wiring preserves aesthetics of the opening

Hardwiring Made Easy™

As part of their promise to provide innovative, fast and effective high security solutions to their customers, certain ASSA ABLOY Group brands offer ElectroLynx®, a universal quick-connect system that ssimplifies the electrification of the door opening.

ElectroLynx® is a registered trademark of ASSA ABLOY Inc.

Plug-and-Play

McKINNEY hinges and RIXSON pivots can have ElectroLynx® connectors to transfer power from the incoming source through to the electrified hardware. The only hardwiring is from the building's wiring system to the opening.

All ElectroLynx retrofit cables are 12 conductor, supplied with an 8-pin connector and a 4-pin connector. If you are utilizing only 8-pin conductors or less, you can cut off the excess 4-pin conductor connectors.

- Pre-wired doors from CECO DOOR, CURRIES, BARON and GRAHAM have special harnesses built in to house the wiring components.

- ElectroLynx is offered on the electrified hardware products of ADAMS RITE, CORBIN RUSSWIN, HES, RIXSON, SARGENT, SECURITRON and YALE

1. 15'2" ElectroLynx cable from hinge location to ceiling

2. Electric hinge or pivot bridges the power from the frame to the door

3. In-the-door wiring harness brings power to the locking hardware or exit device

4. Locking hardware or exit device comes pre-wired with connectors

Pre-wired Doors

The ElectroLynx system inside a door and frame includes a one-piece pre-fabricated wiring harness equipped with Molex connectors. The wiring harness consists of 8-pin and 4-pin ElectroLynx connectors with 22 gauge wire. It is an efficient labor-saving alternative to using conduit inside a door, which requires installation of wires at the job site.

In addition to standard doors, fire rated doors from ASSA ABLOY brands - BARON, CECO DOOR, CURRIES and GRAHAM - are also available with ElectroLynx cabling.
If you are not ordering ASSA ABLOY Door Group doors with the ElectroLynx® cable pre-installed in the door, you must order an ElectroLynx retrofit cable to go between ANY hardware and the hinge. This includes 3" cables to go from the hinge to an exit device and up to a 15' cable to go up and around a full lite metal door. To ensure you order the correct ElectroLynx connecting cables, follow these steps:

1

Are the doors preinstalled with ElectroLynx cables?

— YES →

2

You do not need to order a "through-door cable"

3

Also order a 15' cable to go from the frame side hinge location, inside the wall up to the ceiling for termination

↓ NO

Will the existing door accommodate a 5/8" chase or raceway to allow cable with Molex connectors be pulled through?

"Yes Example":
- A hollow metal door with no obstructions or a 5/8" conduit or raceway

"No Examples":
- Wood doors with a 3/8" raceway
- Hollow metal doors with steel stiffeners
- Hollow metal door with full lite glass kits

— YES →

Order cable with Molex connectors on both ends, illustrated below

— NO →

Order cable with one end with Molex connectors, and one end pinned, illustrated below

What length of retrofit cable should you order?

From the examples below, measure from the hinge location to the hardware location.
* Add 2" to the length

Door with 3 hinges

McKINNEY QC Concealed Circuit Electric Hinges

The McKINNEY ElectroLynx® hinge is an intermediate connector that passes a constant flow of current between the source of power (jamb) and the actuated devices in the door (electric locks, exit devices, etc.) regardless of door position. Each hinge features concealed plug connectors that eliminate the need for separate or exposed wiring. Brass eyelets add protection and durability to the ElectroLynx hinge and common wire colors and standard connectors make installation quick and simple. Once installed, it will give no outward indication of its function and will transmit power efficiently and reliably, as long as the wire capacity is not exceeded.

All ElectroLynx hinges are factory tested and specially packaged to minimize against damage during shipment. Installation instructions are packed with each hinge. 28 Gauge multi-strand wires are used. A 6" pigtail is provided for connection to the source wiring, and additional 6" pigtails may be requested. The wire colors are with the electromechanical hardware of other ASSA ABLOY brands.

- An 8 position connector is used for QC2, QC4 QC6 and QC8 wire hinges

- An 8 position and 4 position connector is used for QC12 wire hinges

- QC2, 4 or 6 hinges are available for special applications, but are not used with the decision tree found on page 4

Please call 1-800-810-WIRE (9473) if you are in doubt regarding hinge requirements.

Available up to 12 wires

- Rated 4 amp continuous @ 24 volts AC or DC, 16 amp pulse for 300 milliseconds (cycle time not less than 5 seconds), 10 amp pulse for 250 milliseconds (cycle time not less than 5 seconds)

- Optional MG-16 mortar guard available (mortar guard required on steel frames)

- Steel and Stainless Steel QC hinges are UL listed for use up to and including 3 hour rated openings

- QC2 wire hinges provided with 8 position connector for new construction, specify QC2

* Consult customer service for availability

McKINNEY ElectroLynx® Power over Ethernet (PoE) Hinge

The McKINNEY ElectroLynx PoE, the next phase of Quick Connect hinge products by McKINNEY, provides for the passing of Ethernet data through the door opening. Installation is a snap with the friendly "plug and play" connectors which allow power to be linked from the incoming source through the door to the electrified hardware. PoE data is bidirectional.

Brass eyelets add protection and durability to the PoE hinge which features common wire colors coordinated to work with intelligent Power over Ethernet electromechanical hardware from SARGENT and CORBIN RUSSWIN.

The PoE hinge should be installed in the second from bottom hinge position on the door. Once installed, it will give no outward indication of its function and will transfer power and data efficiently and reliably, as long as the wire capacity is not exceeded.

All PoE hinges are factory tested and specially packaged to minimize damage during shipment. Installation instructions are packed with each hinge. Along with the PoE hinge, mating PoE door and frame side harnesses are required, to complete the opening. The required PoE harnesses must be ordered separately (see below for detail).

Specify suffix PoE. Consult factory for the availability of additional finishes and hinge types.
U.S. Patent No. 7,824,200

Power over Ethernet Hinge Features

Each hinge features two 6-position and two 4-position Molex connectors, 9 multistrand wires; 2 twisted pairs (26 AWG), 4 straight conductors (28 gauge) and 1 straight conductor (24 AWG) with concealed plug connectors that eliminate the need for separate or exposed wiring. Rated 350 mA continuous @ 48 volts DC nominal, the hinge is capable of two PoE wiring configurations:

1. Power over Data (5 wire); Power and Data supplied together over the 2 twisted (26 AWG) pairs and the 24 AWG conductor is used for the earth ground connection.

2. Data with Power over spares (9 wire); Data over 2 twisted (26 AWG) pairs with Power over spare pairs (4 straight 28 AWG conductors) and the 24 Awg conductor is used for the earth ground connection.

McKINNEY Aluminum Continuous Electrified Hinges

The McKINNEY electrified continuous hinge is furnished with bonded, 4-conductor flat cable with connectors at each leaf. Two options allow variable degrees of service to be performed at the specific location of current carrying cables via either a removable 8" or a pivoting 8" section of the hinge. Both of these options, SER and ACC are available as 4, 8 or 12 wire configurations on our Full Mortise Aluminum Continuous Hinges.

Serviceable/Removable (SER) - The hinge is furnished to be installed in three sections, allowing the current carrying cables to be serviced or replaced without removing the door from the frame. Additionally the SER option allows the current carrying cables to be safely stored or delivered to the electrician or security contractor prior to the installation of the electrified hardware, eliminating the necessity of the electrician or security contractor being present when the doors are being hung.

Accessible (ACC) – The hinges are furnished to be installed in a single section with each leaf modified to pivot at the location of the current carrying cables and allow access to the cables and connected wiring. Electrical modification is in the center of the hinge.

Features:

• Performance tested 1,250,000 cycles with the 4-conductor flat cable

• Each 4-conductor cable carries 4 amps @ 24volts with a 16 amp inrush current for 300 milliseconds

• Each hinge is provided with a 4 amp in-line fuse to protect the cable from any overload or surge in power

• Flat cable conductor is warranted for 5 years

• Hinges are handed

• Available on full mortise aluminum continuous hinges

• Each electrical prep is supplied with a 48" and 96" wire harness

• ElectroLynx HC-6/4 or HC-6/8 pigtails are included in pack for installation with other ASSA ABLOY ElectroLynx products

• Electrical modification meets new SDI location at center of hinge

• Standardized prep locations on 83", 85", 95" and 120" hinges

1 bag (10 pc)	QC-DCC	Pinning assembly guide

QC-R003 Molex Hand Crimp Tool

The crimp tool is required for adding Molex terminals (connector pins) to wires used with ElectroLynx® products.

The tool is intended for low volume, or repair requirements only.
QC-R002 Extraction Tool

The extraction tool is a simple hand tool used to remove damaged terminals from an ElectroLynx female receptacle or male plug.

The plug and receptacle connectors are designed to mate and lock together as shown in the figure. Plug the connectors onto each other with the locking mechanism aligned as indicated.

QC-DCC Pinning Assembly Guide

Included with every pinned conductor to aid in wire assembly.

ASSA ABLOY Standard Pinout Colors

2 Thru 8 Wire

1	Black
2	Red
3	White
4	Green
5	Orange
6	Blue
7	Brown
8	Yellow

10 Thru 12 Wire

Connection Pin	Color Wire
1- #9	Violet
2- #10	Gray
3- #11	Pink
4- #12	Tan
NOTE: Door and frame should be prepared per the proper hinge template before installing the hinge.

Wire Specifications:

28 Gauge. stranded w/PTFE insulation, NEMA HP-3. Each conductor is colored differently for ease of identification.

Electrical Rating:

4 amp continuous @ 24 volts AC or DC, 16 amp pulse for 300 msec. (cycle time not less than 5 sec.), 10 amp pulse for 250 msec. (cycle time not less than 5 sec.)

Location:

The QC Hinge should be located in the second from the bottom hinge preparation on the door and frame.

NOTE: Hinges with up to 8 wires will have an 8 position connector on them. If there are more than 8 and up to 12 wires there will be a 4 position connector in addition to the 8 position connector.

Founded in 1864, McKINNEY Products Company is a market leader in the manufacture of quality architectural grade hinges including security hinges, and continuous hinges for the builders' hardware industry.

ASSA ABLOY is the global leader in door opening solutions, dedicated to satisfying end-user needs for security, safety and convenience.
