

# ROLLED RADIUS CABINETS

Potter Roemer has been offering quality fire protection equipment for 75 years. Since 1937, we have been continually improving our products in order to offer you a product that is fully customizable.

**Close up of the rolled radius feature**

We are proud to announce the newest option for our fire extinguisher cabinets – a rolled radius edge, available on semi-recessed cabinets. The rolled radius cabinet has rounded edges and corners with a seamless appearance for a softer, more attractive look. Available in several durable, long lasting materials and door styles, rolled radius cabinets can be further customized to meet the needs of your facility.

## CABINET INFORMATION

Rolled radius edges for semi-recessed cabinets:

- Rounded edges and corners.
- Welds are ground smooth for a seamless appearance.
- Available on semi-recessed cabinets.

Customization options include:

- Materials
- Finishes
