

Electronic Interconnected Lockset

Computer Managed Locking System

Introducing the Schlage FE210F electronic interconnect, the newest addition to the line of computer managed locks for multi-family applications. Designed for both new construction and retrofit projects, the electronic interconnect offers the latest in design choice and ease of installation.

To meet the demands of residents, the electronic interconnect is available with several new features:

- A full variety of commercial and all residential levers fit the FE210F
- Increased suiting opportunities with unit interior hardware
- Available in split lever designs and finishes
- Select levers are code compliant with return to door requirements
- The interconnect mechanism is adjustable

Computer managed locksets offer significant advantages.

- iButton credentials make key duplication impossible
- "Rekey" the lock without removing the lock from the door

Using Schlage Security Management System Express (SMS Express) software, the FE210F can:

- Generate audit reports showing date & time stamped access to all areas of the community
- Allow time zone access and auto-unlocking of openings

The FE210F delivers the latest features in security innovation to give both you and your residents the peace of mind that comes with real security.

Benefits

- Single motion egress meets Life & Safety code requirements
- Eliminates unauthorized key duplication
- Eliminates re-keying costs
- Reduces property liability
