For more than 90 years, Schlage has been creating the strongest and most technologically advanced security products for schools, hospitals, hotels, commercial and institutional buildings, multi-family properties and homes. From durable mechanical locks to comprehensive electronic access control solutions and biometrics, Schlage provides protection at critical moments – when property and personal security are at stake. With a wide range of products, styles and finishes, Schlage has products for the most demanding project specifications. In public buildings, in the workplace, and in homes, at the end of the day Schlage stands for one thing: strong.

Flexible Configurations

Real security is knowing exactly what you want and getting it

When you know exactly what you want, you don't want to waste time finding out whether it meets your project specifications. That's why we offer the world's largest team of hardware specification writers to help you and your clients turn your vision into reality. And when it comes to products, our commercial suiting options, wide variety of lever designs and rich selection of finishes give you the tools you need to make your projects perfect. You know what you want. With Schlage, you can be sure you'll get it.

Safety, security and confidence

When you choose a Schlage lock, you can be sure you've done the job right, the first time. After all, our products are among the most durable and dependable on the market today. Our locks are easy to install, and simple to repair and maintain. That means fewer callbacks for you, and total safety and security for your customers.

AL Series

Dependable performance for high traffic commercial applications

At Schlage, we know that every product you specify has to stand up to constant use, while meeting your needs for security at every level. Our AL Series locks are designed to deliver ADA compliant accessibility and constant, reliable performance. The AL Series is best for buildings with medium to high traffic flow, such as interior office doors, banks, retail spaces and hotel guest areas. With a Grade 2 ANSI rating, and styles and finishes to suit your building's design, the AL Series fits right where you need it.

Pictured here: Jupiter lever shown in 626 satin chrome

We don't compromise on security

The safety and security of your clients' buildings is something we take very seriously. That's why every Schlage lock and deadbolt undergoes intensive testing to determine its ANSI grade level:

- Cycle tests
- Resistance tests
- Door impact tests
- Warped door tests
- Bolt strength tests

We pay attention to these details so you can focus on creating a functional and aesthetically pleasing environment for your clients. In fact, every one of our AL Series locks meets ANSI Grade 2 standards for safety.

The lever that looks as good as it performs

- Cold-rolled steel, machined and threaded hubs, and locking nuts prevent the loosening of the lockset by securely bolting the chassis to the door
- Large diameter of mounting plate and rose covers new ANSI hollow metal door cutout
- Patented door range adjuster allows quick and easy adjustment for doors ranging from 1³/₈" to 1⁷/₈" (35 mm to 48 mm) thick

e = an equivalent finish to the BHMA standard.

Door handing

All Schlage locks are reversible. Hand information is necessary to ensure proper cylinder orientation in keyed functions, and finish of latchbolt and strike for locks that are to be installed on reverse bevel doors. Follow the diagram to correctly determine the hand of the door.

ADA-compliant products

In compliance with the American National Standards Institute (ANSI A117.1) and the Americans with Disabilities Act (ADA), Schlage Lock Company offers a wide selection of locks designed for the needs of the physically challenged. This act is designed to provide protection for people with disabilities.

The intent of ADA is that owners of certain types of buildings must remove barriers and provide people with disabilities with access equal to, or similar to, that available to the general public.

Product information and specifications contained in this catalog are subject to change without notice. Please consult the factory.

Lock functions

Cylinders and key systems

Protect new key systems with Everest 29

Schlage can help you design a system that can grow and change along with your needs, allowing you the flexibility to upgrade your security without the need to replace all your cylinders.

Upgrade existing classic key systems with Primus XP

Schlage offers key system solutions that are ideal for upgrading an existing key system to control key management. Our patent-protected cylinders help prevent unauthorized duplication and can be integrated into virtually any existing system.

What it operates		What it is	
<ul style="list-style-type: none"> Everest 29 Primus[®] XP cylinders Everest 29 restricted cylinders Everest 29 open cylinders 	<ul style="list-style-type: none"> UL 437 version UL 437 versions provide drill and pick resistance and withstand physical attack High security cylinders have a second set of pins for added security Patented key control sold with various levels of geographic exclusivity Keys operate high security, as well as restricted security or standard security cylinders Available only in conventional 	<ul style="list-style-type: none"> Everest 29 Primus XP cylinders Everest 29 restricted cylinders Everest 29 open cylinders 	<ul style="list-style-type: none"> Controlled access Patented key control sold with various levels of geographic exclusivity High security cylinders have a second set of pins for added security and pick resistance Keys operate high security, as well as restricted security or standard security cylinders Available only in conventional and FSIC  <p>EVEREST 29[™] PRIMUS XP High security</p>

Standard cylinders

Standard cylinders are available in Classic keyways or in patented Everest 29 keyways.

Specify keyway to differentiate between Everest 29 and Classic.

Example: C (Classic) vs. S123 (Everest 29).

Standard cylinders - options

- Conventional 6-pin cylinder (standard)
- Primus high security cylinder
- Primus UL437 listed high security cylinder
- Conventional 6-pin AL85 function with occupancy indicator

Available in 606 and 626 finish only.
Everest 29 S123 keyway standard.

Example of lock with cylinder for most functions

AL85 cylinder with occupancy indicator

Primus XP access control and high security cylinders

Primus XP access control and high security cylinders are available to add patented key control and varying degrees of geographical exclusivity to most Schlage 6-pin key systems, whether Everest 29 or Classic keyways.

In addition to a conventional pin tumbler mechanism, Primus cylinders incorporate a patented finger pin and sidebar design, providing a “dual-locking” cylinder that is virtually pick-proof. Resistance to drilling and other physical attack is optional by specifying 20-500 Series UL437 Listed cylinders.

Classic Primus XP cylinders are recommended for upgrading existing Classic key systems. Due to its extended patent life, the newly designed Everest 29 Primus XP is recommended for new key systems and for upgrading existing Everest key systems. Specify keyway to differentiate between Everest 29 and Classic. Example: C or CP (Classic) vs. S123 (Everest 29).

Visit allegion.com/us for more information.

Full size interchangeable core

Schlage interchangeable core (IC) locksets allow immediate rekeying at the door simply by using the special control key to replace the core in seconds.

IC locksets are available in Saturn design only.

Full size core

FSIC can be integrated into any 5 or 6-pin Schlage key system.

Full size interchangeable cores - options (for JD suffix locksets)

- Conventional core
- Primus XP high security core

Available in 606 and 626 finish only.
Everest 29 S123 keyway standard.

Small format interchangeable core

The SFIC version is designed for Schlage Everest 29 R family restricted keyway cores and is also completely compatible with Best®, Falcon and other competitive small format cores.

Small format core

Small format interchangeable cores - options (For BD suffix locksets)

- 7-pin uncombined Everest 29 R family restricted keyways
- 7-pin combined Everest 29 R family restricted keyways
- 6-pin uncombined Falcon / Best keyways
- 7-pin uncombined Falcon / Best keyways
- Disposable plastic construction core

Available in 606 and 626 finish only. Specify keyway for existing systems.

80-033 and 80-043 cores are available in A, D, E, F, G, H, J, K, L, and M keyways.

80-036 and 80-037 restricted keyway cores require a letter of authorization from the end user. Schlage assigns the keyway when establishing new Everest 29 restricted key systems.

IC conversion kits

It is easy to convert standard AL Series locksets to accept Schlage full size interchangeable cores by changing the lever and adding the parts shown.

Conversion to SFIC requires different components, as well as dismantling the lockset to replace internal parts. No kits are available for this purpose.

Interchangeable core components - options

- Conversion kit: driver, retainer, lever, core *
- Conversion kit: driver, retainer, lever
- Driver, retainer
- Lever only (Saturn)*
- IC installation tool

*Specify finish.

IC installation tool
M504-413

Latches

AL Series latches are adjustable for flat or beveled edge doors. Latches and strikes are furnished in brass, bronze or chrome finishes compatible with lock trim. When ordering separately, specify quantity, part number, and finish. Standard latches shown in bold type.

Latches

Backset	Faceplate description	Hsg dia	Deadlatch 1/2" (13 mm) throw	Springlatch 1/2" (13 mm) throw
2 3/8" (60 mm)	1" x 2 1/4" (25 mm x 57 mm) square corner	7/8" (22 mm)	11-085	11-068

Rabbeted latch and strike kit
39-030

Specifications

Handing:

Non-handed.

Door thickness:

1³/₈" to 1⁷/₈" (35 mm to 48 mm) standard.

2" (51 mm) optional.

Backset:

2³/₄" (70 mm) standard. 2³/₈" (60 mm), 3³/₄" (95 mm)

and 5" (127 mm) optional.

Front:

Steel. 2¹/₄" x 1¹/₈" square corner, beveled, for 2³/₄" backset standard. Optional 1" square corner, 1" radius corner, and non-UL drive-in / round face. For availability with specific backsets, see page 16.

Lock chassis:

Steel, zinc dichromated for corrosion resistance

Latch bolt:

Brass, chrome plated, 1/2" throw, deadlocking on keyed and exterior functions.

Exposed trim:

Wrought brass and bronze. Levers are pressure cast zinc, plated to match finish symbols.

Strike:

ANSI curved lip strike 4⁷/₈" x 1¹/₄" x 1¹/₄" lip to center standard. Optional strikes, lip lengths and ANSI wrought strike box available. See page 17.

Cylinder and keys:

6-pin patented Everest 29 S123 keyway standard with two nickel silver keys per lock.

Keying options:

Interchangeable core and Primus® high security cylinders. Master keying, grand master keying, and construction keying.

Warranty:

Three-year limited.

Certifications

ANSI:

Meets or exceeds A156.2 Series 4000, Grade 2 strength and operational requirements.

Meets A117.1 Accessibility Code.

Federal:

Meets FF-H-106C.

California State Reference Code:

(Formerly Title 19, California State Fire Marshal Standard)

All levers with a return to door of 1/2" (64 mm) or less comply.

UL / cUL:

All locks listed for A label single doors, 4' x 8'.

Letter F and UL symbol on latch front indicate listing.

UL437 Listed locking cylinder optional: specify Primus 20-500 Series cylinder.

ADA compliant:

Schlage Lock Company offers a wide selection of locks designed to meet the Americans With Disabilities Act.

Antimicrobial solutions

Overview

Bacteria reside on every surface we touch. The vast majority of bacteria are rendered risk-free by the human immune system, but infections that result from harmful bacteria are an increasing concern in areas such as healthcare, education and food service. By protecting high-touch surfaces with an antimicrobial coating, the number of bacteria that cause infections are reduced and environments where we heal, learn, work and eat are safer.

How does the antimicrobial surface work?

For bacteria to grow, its cells must be able to multiply by forming new protoplasm from nutrients available in the environment. The antimicrobial coating, made using ionic silver (AG+), is specially formulated to inhibit the growth of bacteria by interrupting cell multiplication. Ionic silver coatings interact with the bonding sites on the microbe surface. The result is that the silver ions surround bacterial cells, blockading food and slowing the growth of bacteria, mold and mildew.

Where are the best applications for this type of hardware?

High traffic, public use areas are ideally suited to antimicrobial coated door hardware. With hundreds or thousands of people using accessing these areas every day, safety should be top of mind. Adding door hardware with an antimicrobial coating can make a big difference by inhibiting the growth of bacteria on these high-touch surfaces.

Applications where antimicrobial coated hardware makes sense include:

- Healthcare
- Government
- Childcare
- Education
- Food service
- Restrooms

Antimicrobial solutions from Allegion

Allegion offers a wide range of products that feature a silver ion antimicrobial coating. A choice of styles, functions and finishes ensures a solution that fits building use and design.

Put your trust in the name you know

For more than 90 years, Schlage has been creating the strongest and most technologically advanced security products for schools, hospitals, hotels, commercial and institutional buildings, multi-family properties and homes. From durable mechanical locks to comprehensive electronic access control solutions and biometrics, Schlage provides protection at critical moments – when property and personal security are at stake. With a wide range of products, styles and finishes, Schlage has products for the most demanding project specifications. In public buildings, in the workplace, and in homes, at the end of the day Schlage stands for one thing: strong.

Real security is knowing exactly what you want and getting it

When you know exactly what you want, you don't want to waste time finding out whether it meets your project specifications. That's why we offer the world's largest team of hardware specification writers to help you and your clients turn your vision into reality. And when it comes to products, our commercial suiting options, wide variety of lever designs and rich selection of finishes give you the tools you need to make your projects perfect. You know what you want. With Schlage, you can be sure you'll get it.

Safety, security and confidence

When you choose a Schlage lock, you can be sure you've done the job right, the first time. After all, our products are among the most durable and dependable on the market today. Our locks are easy to install, and simple to repair and maintain. That means fewer callbacks for you, and total safety and security for your customers.

Rev. 11/13

A Series

Medium traffic commercial and heavy-duty residential locks

From military barracks and offices, to fine residential homes, Schlage A Series knobs easily stand up to constant use and abuse, while keeping people and property safe. Our A Series locks have an ANSI Grade 2 rating and come in a choice of styles and finishes that fit your building's design.

We don't compromise on security

The safety and security of your buildings is something we take very seriously. That's why every Schlage lock and deadbolt undergoes intensive testing to determine its ANSI grade level:

- Cycle tests
- Resistance tests
- Door impact tests
- Warped door tests
- Bolt strength tests

Pictured here: Tulip knob shown in 626 satin chrome

The lock that's built to last

- Cold-rolled steel, and machined and threaded hubs prevent loosening of the lockset by bolting the chassis to the door.
- Heavy-duty cast mounting plate with specially tapped holes, keeps lockset tight on the door.
- Patented door range adjuster allows quick and easy adjustment for doors ranging from 1³/₈" to 1⁷/₈" (35 mm to 48 mm) thick

Door handing

Many Schlage locks are reversible. Hand information is necessary to ensure proper cylinder orientation in keyed functions, and finish of latchbolt and strike for locks that are to be installed on reverse bevel doors. Follow the diagram to correctly determine the hand of the door.

ADA-compliant products

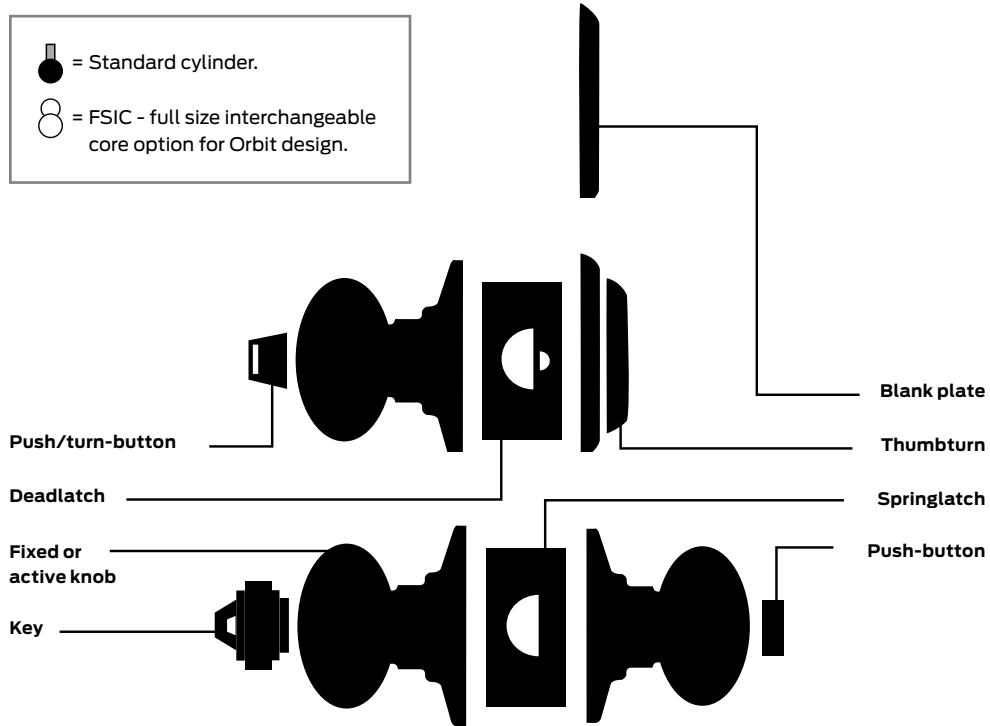

In compliance with the American National Standards Institute (ANSI A117.1) and the Americans with Disabilities Act (ADA), Schlage Lock Company offers a wide selection of locks designed for the needs of the physically challenged. This act is designed to provide protection for people with disabilities.

The intent of ADA is that owners of certain types of buildings must remove barriers and provide people with disabilities with access equal to, or similar to, that available to the general public.

Product information and specifications contained in this catalog are subject to change without notice. Please consult the factory.

--	---	---

Standard cylinders

Standard cylinders are available in the patented Everest 29 or Classic keyways. Standard keyways are the Everest 29 S123 and S145 (factory masterkeyed systems). All other keyways available when requested.

Cylinder for most functions

Hotel function indicator cylinder

Standard cylinders - options

- 6-pin conventional (standard)
- Primus high security
- Primus UL437 Listed high security
- Hotel function (A85) with indicator

Available in 606 and 626 finish only. Everest 29 S123 keyway standard for commercial; C keyway standard for residential.

Primus XP access control and high security cylinders

Primus XP access control and high security cylinders are available to add patented key control and varying degrees of geographical exclusivity to most Schlage 6-pin key systems, whether Everest 29™ or Classic keyways.

In addition to a conventional pin tumbler mechanism, Primus cylinders incorporate a patented finger pin and sidebar design, providing a “dual-locking” cylinder that is virtually pick-proof. Resistance to drilling and other physical attack is optional by specifying 20-500 Series UL437 Listed cylinders.

Classic Primus XP cylinders are recommended for upgrading existing Classic key systems. Due to its extended patent life, the newly designed Everest 29 Primus XP is recommended for new key systems and for upgrading existing Everest key systems. Specify keyway to differentiate between Everest 29 and Classic. Example: C or CP (Classic) vs. S123 (Everest 29).

Visit allegion.com/us for more information.

Full size interchangeable core 8

Schlage FSIC full size interchangeable core (IC) locksets allow immediate rekeying at the door simply by using the special control key to replace the core in seconds.

IC locksets are available in Orbit design only.

Cores only

Full size interchangeable cores - options
(For JD suffix locksets)

- Conventional core
- Primus® XP high security core

Available in 606 and 626 finish only. Everest 29 S123 keyway standard for commercial; C keyway standard for residential.

FSIC - full size interchangeable core option for Orbit design.

Full size core

FSIC conversion kits

It is easy to convert standard A Series locksets to accept Schlage FSIC interchangeable cores by changing the knob and adding the parts shown.

Interchangeable core components - options

- Conversion kit: driver, retainer, knob, core
- Conversion kit: driver, retainer, knob
- Knob only (Orbit)
- IC installation tool

Latches

A Series latches are adjustable for flat or beveled edge doors. Latches and strikes are furnished in brass, bronze, or chrome finishes, compatible with lock trim. When ordering separately, specify quantity, part number, and finish. Standard latches shown in bold type.

Latch front adapter A501-878

Used to convert 1" wide square front faceplates for 1 1/8" wide door preparations. Furnished in black plastic. Order in units of 100 each.

Long backsets

Backsets 5" require extension links. A Series locks with long backsets are normally furnished with 1" faceplates and 7/8" housings. Links installed in 1" latch holes require one G506-815 sleeve (order separately) to join latch and link.

5" extension link

41-005

(add to 2 3/8"
backset latch)

Sleeve

G506-815
(order separately)

Door reinforcement

Reinforcing unit is required to reinforce and help prevent the collapse of hollow metal doors when locksets are tightly mounted. This kit should be used with long backsets for A Series lock installations in hollow metal doors to prevent lateral movement of the latchbolt. Specify door thickness, 1 3/8" (35 mm) or 1 3/4" (44 mm), when ordering reinforcement kits.

Reinforcement kit 37-001

Kit includes:

Reinforcement

A501-566 for 1 3/4" doors or
A501-565 for 1 3/8" doors

Strikes

All Schlage strikes are furnished complete with screws. The 10-001 standard A Series strike has a 1 1/8" (29 mm) lip.

Standard strikes shown in bold type.

Specifications

Handing:

Keyed functions are reversible. Non-keyed functions are not handed.

Door thickness:

1³/₈" to 1⁷/₈" (35 mm to 48 mm) standard.
2" (51 mm) to 2¹/₂" (64 mm) optional extended inside.

Backset:

2³/₈" (60 mm) standard. 2³/₄" (70 mm), 3³/₄" (95 mm) and 5" (127 mm) optional.

Front:

Steel. 1¹/₈" x 2¹/₄" square corner, beveled, for 2³/₄" backset standard. Optional 1" square corner, 1" radius corner, and non-UL drive-in/round face. For availability with specific backsets, see page 16.

Lock chassis:

Steel, zinc dichromate plated for corrosion resistance.

Latch bolt:

Brass, chrome plated, 1/2" throw, deadlocking on keyed and exterior functions.

Exposed trim:

Wrought brass, bronze or stainless steel. Levers are pressure cast zinc, plated to match finish symbols.

Strike:

T-strike 1¹/₈" x 2³/₄" (29 mm x 70 mm) x 1¹/₈" (29 mm) lip to center with box standard. Optional strikes, lip lengths and ANSI strike box available. See page 17.

Cylinder and keys:

Commercial: 6-pin patented Everest 29 S123 keyway standard with two nickel silver keys per lock.

Residential: 6-pin C keyway, keyed 5-pin.

Keying options:

Interchangeable core and Primus XP high security cylinders. Master keying, grand master keying, and construction keying.

Warranty:

Commercial: three-year limited.

Certifications

ANSI:

Meets or exceeds A156.2 Series 4000, Grade 2 strength and operational requirements.

Federal:

Meets FF-H-106C.

California state reference code:

(Formerly Title 19, California State Fire Marshal Standard)
All levers with a return to door of 1/2" (64mm) or less comply.

UL/cUL:

All locks listed for A label single doors, 4' x 8'.
Letter F and UL symbol on latch front indicate listing.
UL437 Listed locking cylinder optional: specify Primus XP 20-500 Series cylinder.

ADA compliant:

Schlage Lock Company offers a wide selection of locks designed to meet the Americans With Disabilities Act.

B Series

B250 deadlatches

B500 deadbolts

B600/700/800 deadbolts

Auxiliary locks for added security

Auxiliary locks not only provide added protection for exterior entrance doors, they can also protect common use areas like pool gates and storage/utility spaces from unauthorized access. Schlage delivers flexibility and performance with a full line of auxiliary locks that range from heavy-duty to high-traffic performance, and complement our lock lines. A choice of styles and finishes ensures a consistent look across doors and throughout your building.

We don't compromise on security

The safety and security of your clients' buildings is something we take very seriously. That's why every Schlage lock and deadbolt undergoes intensive testing to determine its ANSI grade level:

- Cycle tests
- Resistance tests
- Door impact tests
- Warped door tests
- Bolt strength tests

We pay attention to these details so you can focus on creating a functional and aesthetically pleasing environment for your clients. In fact, every one of our B Series locks meets ANSI Grade 1 or Grade 2 standards for safety.

ADA-compliant products

In compliance with the American National Standards Institute (ANSI A117.1) and the Americans with Disabilities Act (ADA), Schlage Lock Company offers a wide selection of locks designed for the needs of the physically challenged.

This act is designed to provide protection for people with disabilities.

The intent of ADA is that owners of certain types of buildings must remove barriers and provide people with disabilities with access equal to, or similar to, that available to the general public.

Product information and specifications contained in this catalog are subject to change without notice. Please consult the factory.

B600/700/800 Series

The B600/700/800 Series are Schlage's highest grade deadbolt locks. Choose the 600 for Grade 1 security in high-traffic commercial applications. Choose the 700 or 800 and get standard a Primus XP controlled access cylinder (700) or Primus® XP high security cylinder with UL 437 rating (800). A variety of functions and finishes makes the B600/700/800 Series a versatile choice for added security no matter where you use it.

ELECTRICAL

The toughest deadbolts in the business

- 1" (25 mm) throw, high-strength steel alloy deadbolt with hardened steel roller resists sawing and kick-in attacks
- Precision-built solid brass 6-pin cylinders with phosphor bronze springs and nickel silver pins ensure long life and smooth operation
- Tough nickel silver keys for smooth, long-lasting operation
- Exclusive concealed wood frame reinforcer protects wood jamb against kick-in attacks
- Free-spinning solid cylinder collar resists wrenching and prying
- Large inside thumbturn makes it easy to throw and retract deadbolt
- Metal shield protects bolt from ice-pick attack through the door
- Hardened steel ball-bearings protect mounting bolts from drill attack

Deadbolt designs

B600 Series

Schlage's toughest heavy duty Grade 1 commercial deadbolt.

Furnished with conventional cylinder standard.

Also available with full size interchangeable core cylinder or small format interchangeable core (SFIC) cylinder.

Requires 2 1/8" (54mm) prep. UL10B listing standard for auxiliary lock on A label fire doors.

B700 Series

Same lock as B600 Series but furnished with Primus XP controlled access cylinder for patented key control, geographical exclusivity and resistance to picking and impressioning. Also available with Primus XP full size interchangeable core cylinder.

B800 Series

Same lock as B700 Series but Primus XP high security cylinder is UL437 listed to resist drilling and other forms of physical attack. Not available in interchangeable core.

B500 Series

The B500 Series deadbolt is a revolutionary new deadbolt that delivers higher security, tougher performance and the ultimate in installation versatility.

Designed by locksmiths for locksmiths, the B500 Series deadbolt can be fitted with any Schlage cylinder, fits virtually every door you service, enhances lock strength on the jamb side of the door and will change forever the way you look at deadbolts.

Pictured here: B500 (Grade 2) deadbolt with ND Series Athens lever shown in 626 satin chrome

The best deadbolt ever designed by locksmiths

- Adjustable backset with lock-in-place helix design
- Integrated anti-pry shield protects latch
- Thicker metal security strike back-up on jamb side
- Security strike on jamb has third screw for stronger, deeper anchoring
- Added space inside strike box for true deadlatch
- Seamless steel construction from beginning of latch to back of bolt
- 10% larger diameter deadbolt
- Zinc bolt with spinning hardened steel pin inside
- Tapered front housing that can't be unscrewed
- Integrated trim piece for fewer pieces out of the box
- Large, easy-to-use, ADA compliant thumbturn

Deadbolt designs

B500 Series

A versatile and economical Grade 2 deadbolt for medium duty commercial and heavy duty residential applications.

Furnished with conventional cylinder standard.

Available with Primus XP high security cylinder, Primus XP UL437 Listed high security cylinder, full size interchangeable core cylinder, Primus XP interchangeable core cylinder, or small format interchangeable core (SFIC) cylinder.

Fits 2 1/8" (54 mm) prep standard and anti-pry shield can be removed to fit 1 1/2" (38 mm) prep.

B250 Series

Ideally suited for pool, apartment and condominium gates, utility panels and pipe chases, the Schlage B250 Series is tough, reliable and has a proven design that has been the industry standard for decades.

Pictured here: B250 deadbolt with ND Series Rhodes lever shown in 626 satin chrome

The industry standard for tubular deadlatches.

- $\frac{9}{16}$ " (14 mm) throw deadlatch resists pry-in attacks and "shimming" of the latch
- Precision-built brass 6-pin cylinders with phosphor bronze springs and nickel silver pins ensure long life and smooth operation
- Tough nickel silver keys for smooth, long-lasting operation
- Exclusive concealed wood frame reinforcer protects wood jamb against kick-in attacks
- Cylinder collar reinforced with security inserts to resist wrenching and prying
- Thumbturn "holdback" feature retains the deadlatch in a retracted position when desired

Deadbolt designs

B250 Series

Cylinders and key systems

Protect new key systems with Everest 29

Schlage can help you design a system that can grow and change along with your needs, allowing you the flexibility to upgrade your security without the need to replace all your cylinders.

Upgrade existing classic key systems with Primus XP

Schlage offers key system solutions that are ideal for upgrading an existing key system to control key management. Our patent-protected cylinders help prevent unauthorized duplication and can be integrated into virtually any existing system.

Standard cylinders

Schlage locks are provided with cylinders precision built to extremely close tolerances and the highest standards of accuracy. Using only solid brass plugs, phosphor bronze springs, and nickel silver keys and bottom pins, ensures long life and ease of operation.

Cylinder plug face available in 606 and 626 finishes only.

Conventional cylinders are available in Classic keyways or in the patented Everest 29 keyways. Specify keyway to differentiate between Everest 29 and Classic.

Finishes: 605, 606, 609, 612, 613, 619, 625, 626, 643e

Available in B250, B500, B600 and B700 Series, full size interchangeable cores can be integrated into any 5 or 6-pin Schlage key with no adverse affects on keying capacity.

Full size interchangeable cores and housings - options

- Conventional core
- Primus XP core

Cores available 606 and 626 finish only.
Everest 29 S123 keyway standard.

Full size core

Small format interchangeable core (SFIC)

Available in B500 and B600 Series, the small format IC option is designed for Schlage Everest 29 R Family restricted keyway cores and is also completely compatible with Best®, Falcon, and other small format cores.

- 7-pin uncombined Everest 29 R family restricted keyways
- 7-pin combined Everest 29 R family restricted keyways
- 6-pin uncombined Falcon / Best keyways
- 7-pin uncombined Falcon / Best keyways
- Disposable plastic construction core

Small format core

Disposable construction core

80-033 and 80-043 cores are available in Best A, B, C, D, DD, E, F, G, H, J, K, L, N, O, R, TB and TD keyways. Specify keyway by suffixing "B" to keyway letter, e.g. "AB".

80-036 and 80-037 restricted keyway cores require a letter of authorization from the end user. Schlage assigns the keyway when establishing new Everest 29 restricted key systems.

Latches and bolts

B Series bolt and latch fronts are available in a variety of configurations to fit your door prep dimensions.

Latches are furnished in brass, bronze or chrome finishes compatible with the lock finish.

B250 Series deadlatches

Number	Backset	Description	Housing
12-100	2 ³ / ₈ "	1 ¹ / ₈ " x 2 ¹ / ₄ " - square corner standard	1"
12-103	2 ³ / ₄ "	1 ¹ / ₈ " x 2 ¹ / ₄ " - square corner	1"

B500 Series deadbolts

Square corner bolt

Radius corner bolt

Circular/drive-in bolt

Triple option bolt

Door reinforcement

Reinforcing unit is required to reinforce and help prevent the collapse of hollow metal doors when locksets are tightly mounted. This kit should be used with long backsets for B Series lock installations in hollow metal doors to prevent lateral movement of the latchbolt. Specify door thickness, 1³/₈" (35 mm) or 1³/₄" (44 mm), when ordering reinforcement kits.

Reinforcement kit 37-001

Kit includes:
Reinforcement
A501-566 for 1³/₈" doors or
A501-565 for 1³/₄" doors

Sleeve
A501-567 for
5" backsets

x	x	10-103		1/4" round corner 1" x 2 1/4", no reinforcement strike provided. 605, 609, 630 only

Strikes for deadlatches

Number	Lip length	Description
10-001	1", 1 1/8", 1 1/4", 1 1/2", 1 3/16", 1 3/4"	1 1/8" x 2 3/4" square corner
10-004	1 1/8"	1 1/8" x 2 3/4" radius round corner
10-025	1 3/16", 1 3/8"	1 1/4" x 2 7/8" ANSI
C603-623	-	Box for T-strike
K510-066	-	Box for 10-025

Rabbeted latch and strike kit
39-030

Wood frame reinforcer
37-016

Furnished with standard and round corner deadbolt strikes, this reinforcer significantly strengthens a jamb against “kick-in” attack and greatly increases the security of the lock. The reinforcer is concealed under the strike and is anchored to the jamb with two 3" long screws. B500 Series metal dust box reinforcer anchors (B520-622) to jamb with three 3" screws.

Specifications

Handing:

B250 Series deadlatches are reversible. All other B Series locksets are non-handed.

Door thickness:

B500 Series, 5-pin: 1³/₈" to 1³/₄" (35 mm to 44 mm) standard. Available to 2¹/₄" (57 mm), assembled to order.

B250 Series, 5-pin: 1³/₈" to 1³/₄" (35 mm to 44 mm) standard. Available to 2¹/₄" (57 mm), assembled to order.

B600/700/800 Series: 1³/₄" to 2" (44 mm to 51 mm) standard. Available for 1³/₈" (35 mm) and doors up to 2¹/₂" (63mm), assembled to order. Door ranges may vary by function.

Backset:

B500 Series: Adjustable for 2³/₈" (60 mm) or 2³/₄" (70 mm) standard.

B250 Series: 2³/₈" (60 mm) standard. 2³/₄" (70 mm) optional.

B600/700/800 Series: 2³/₄" (70 mm) standard, 2³/₈" (60 mm), 3³/₄" (95 mm), 5" (127 mm) optional.

Front:

Brass, bronze or stainless steel. 1¹/₈" x 2¹/₄" (29 mm x 57 mm) square corner, beveled.

Dead bolt:

1" (25 mm) throw with saw-resistant hardened steel insert.

Latch bolt:

Brass, ⁹/₁₆" (14 mm) throw, deadlocking on keyed and exterior functions.

Exposed trim:

Wrought or forged brass or bronze, or pressure cast zinc.

Thumbturn:

Pressure cast zinc, plated to match finish symbols.

Strike:

B250 and B600/700/800 Series: 1¹/₈" x 2³/₄" (32 mm x 70 mm) with steel reinforcer and two 3" screws standard. B500 Series: 1¹/₈" x 2³/₄", metal dust box reinforcer and three 3" screws. Optional strikes, lip lengths and ANSI strike box available. See page 27.

Cylinder and keys:

6-pin patented Everest 29 S123 keyway standard with two nickel silver keys per lock. Items specified in C keyway will be furnished 5-pin.

Keying options:

Interchangeable core and Primus XP high security cylinders. Master keying, grand master keying and construction keying.

Warranty:

Commercial: Three-year limited.

Certifications

ANSI:

B500 and B250 Series meet or exceed A156.5 Grade 2 strength and operational requirements. B600/700/800 Series meets or exceeds A156.5 Grade 1 strength and operational requirements.

UL / cUL:

B600/700/800-Series locks are UL10B Listed auxiliary locks for A label single doors, 4' x 8'. UL10B Listing optional for B500-Series as auxiliary locks. Letter F and UL symbol on latch front indicate listing.

UL437 Listed locking cylinder optional:

Specify Primus 20-500 Series cylinder for B500 and B250 Series Grade 2 products, or specify B800 Series Grade 1 products.

ADA compliant:

Schlage Lock Company offers a wide selection of locks designed to meet the Americans with Disabilities Act.

About Allegion

Allegion (NYSE: ALLE) creates peace of mind by pioneering safety and security. As a \$2 billion provider of security solutions for homes and businesses, Allegion employs more than 8,000 people and sells products in more than 120 countries across the world. B500 Series

Commercial deadbolts

Overview

The B500 Series deadbolt from Schlage is the toughest, most versatile deadbolt in the business. Designed by locksmiths for locksmiths, the B500 Series deadbolt accepts every Schlage cylinder on the market, fits virtually every door you service, enhances lock strength on the jamb side of the door, and will change forever the way you look at deadbolts.

Functions

- B560 - Single cylinder deadbolt lock
- B561 - One-way deadbolt lock
- B562 - Double cylinder deadbolt lock
- B563 - Classroom deadbolt lock
- B571 - Door bolt occupancy indicator
- B580 - Door bolt (no outside trim)
- B581 - Door bolt (with outside blank plate)

Features and benefits

- ANSI A156.5, 2001 Grade 2
- Available UL Listed for three-hour fire door
- Quick, easy installation
- Adjustable backset locks into place
- Anti-pry shield protects latch from attacks
- Metal dust box provides deep anchoring and added strength
- Primary or auxiliary locking for commercial buildings
- High security locking for residential buildings
- Can be suited with virtually all Schlage levers and knobs

Rev. 11/13

D Series

Heavy-duty performance for high traffic applications

At Schlage, we know that every product you specify has to stand up to constant use and abuse without compromising security. The D Series gets the job done with tough, dependable ANSI Grade 1 locks designed for use in military barracks, back-of-house hospitality and retrofit applications. Built for heavy traffic applications, D Series locks are easy to service and maintain, and come in a range of styles and finishes to fit your building.

Pictured here: Tulip knob shown
in 626 satin chrome

Real security is knowing exactly what you want and getting it

When you know exactly what you want, you don't want to waste time finding out whether it meets your project specifications. That's why we offer the world's largest team of hardware specification writers to help you and your clients turn your vision into reality. And when it comes to products, our commercial suiting options, wide variety of lever designs and rich selection of finishes give you the tools you need to make your projects perfect. You know what you want. With Schlage, you can be sure you'll get it.

Safety, security and confidence

When you choose a Schlage lock, you can be sure you've done the job right, the first time. After all, our products are among the most durable and dependable on the market today. Our locks are easy to install, and simple to repair and maintain. That means fewer callbacks for you, and total safety and security for your customers.

We don't compromise on security

The safety and security of your clients' buildings is something we take very seriously. That's why every Schlage lock and deadbolt undergoes intensive testing to determine its ANSI grade level:

- Cycle tests
- Resistance tests
- Door impact tests
- Warped door tests
- Bolt strength tests

We pay attention to these details so you can focus on creating a functional and aesthetically pleasing environment for your clients. In fact, every one of our D Series locks meets ANSI Grade 1 standards for safety.

D Series

Schlage D Series knobs are built to tough manufacturing standards that ensure a long life with smooth performance. With finishes to fit your building design, and a choice of styles, the D Series is one of the toughest knobs we make.

Pictured here: Plymouth knob shown in 626 satin chrome

Heavy-duty hardware for premium performance

- Exceeds 800,000-cycle ANSI Grade 1 requirements
- Exceeds ANSI A156.2, Series 4000 Grade 1 lock knob torque requirements
- Heavy-gauge, cold-rolled steel mechanisms are corrosion treated for normal atmosphere conditions

e = an equivalent finish to the BHMA standard.

Door handing

All Schlage locks are reversible. Hand information is necessary to ensure proper cylinder orientation in keyed functions, and finish of latchbolt and strike for locks that are to be installed on reverse bevel doors. Follow the diagram to correctly determine the hand of the door.

Product information and specifications contained in this catalog are subject to change without notice. Please consult the factory.

D Series lock functions

ANSI A156.2 Series 2003 Grade 1

Non-keyed locks

Schlage ANSI
D10S **F75**

Passage latch

- Both knobs always unlocked.
- Inside knob is always free for immediate egress.

Schlage ANSI
D25D -
Exit lock with blank plate

- Blank plate outside.
- Inside knob always unlocked.
- Inside knob is always free for immediate egress.
- Specify door thickness.

Schlage ANSI
D40S **F76**
Bath/bedroom privacy lock

- Push-button locking.
- Can be opened from outside with small screwdriver.
- Turn the inside knob or close the door to release button.
- Inside knob is always free for immediate egress.

Schlage ANSI
D44S -
Hospital privacy lock

- Push-button locking.
- Unlock from outside by pushing emergency turn-button.
- Turn inside knob or close door to release button.
- Inside knob is always free for immediate egress.

Schlage ANSI
D170 -
Single dummy trim

- Dummy trim for one side of door.
- Used for door pull or as matching inactive trim.

Lock functions

ANSI A156.2 Series 2003 Grade 1

Keyed locks

Schlage ANSI
D53PD **F109**

Entrance lock

- Push button to lock outside knob.
- Knob stays locked until unlocked by key or by turning inside knob.
- Pushing and turning button locks outside knob, which stays locked until opened with a key.
- Inside knob is always free for immediate egress.

Outside Inside

● ○ ORB

Schlage ANSI
D60PD **F88**

Vestibule lock

- Latch is retracted by key from the outside when the outside knob is locked by a key in the inside knob.
- Inside knob is always free for immediate egress.

Outside Inside

● ○ ORB

Schlage ANSI
D66PD **F91**

Store door lock

- Key in either knob locks or unlocks both knobs.

Caution: Double cylinder locks are a life safety hazard in times of emergency and their use is not recommended. Installation should be in accordance with existing codes only.

Outside Inside

● ○ ORB

Schlage ANSI
D70PD **F84**

Classroom lock

- Outside knob is locked and unlocked by key.
- Inside knob is always free for immediate egress.

Outside Inside

● ○ ORB

Schlage ANSI
D72PD **F80**

Communicating lock

- Key in either knob locks or unlocks its own knob independently.

Caution: Double cylinder locks are a life safety hazard in times of emergency and their use is not recommended. Installation should be in accordance with existing codes only.

Outside Inside

● ○ ORB

Lock functions

ANSI A156.2 Series 2003 Grade 1

Keyed locks (continued)

Schlage ANSI
D73PD **F90**

Corridor lock

- Locked or unlocked by key from outside.
- Push-button locking from inside.
- Turn inside knob or close door to release button.
- Inside knob is always free for immediate egress.

● ○ ORB

Schlage ANSI
D80PD **F86**

Storeroom lock

- Outside knob is fixed.
- Entrance by key only.
- Inside knob is always free for immediate egress.

● ○ ORB

Schlage ANSI
D82PD **F87**

Institution lock

- Both knobs fixed.
- Entrance by key in either knob.

Caution: Double cylinder locks are a life safety hazard in times of emergency and their use is not recommended. Installation should be in accordance with existing codes only.

● ○ ORB

Schlage ANSI
D85PD **F93**

Hotel or restroom lock

- Outside knob is fixed.
- Entrance by key only.
- Push-button on inside knob activates "shut-out" mode with visual occupancy indicator, allowing only master key to operate.
- Rotate inside knob to release shut-out mode, except when inside spinner-button has been rotated to keep lock in shut-out mode.
- Inside knob is always free for immediate egress.

● ○ ORB

● = Standard cylinder.
 ○ = FSIC - full size interchangeable core option for Orbit design.

Electrified Functions

Schlage ANSI
D80PDEL D12DEL

Electrically locked (fail safe)

- Auxiliary latch deadlocks latchbolt when door is closed.
- Outside knob continuously locked electrically until unlocked by key, switch or power failure.
- Inside knob is always free for immediate egress.

Schlage ANSI
D80PDEU D12DEU

Electrically locked (fail safe)

- Auxiliary latch deadlocks latchbolt when door is closed.
- Outside knob continuously locked until it is unlocked by key or electric current.
- Inside knob is always free for immediate egress.

Mechanical and electrical control:

Schlage D Series locks are available for remote electrical locking and unlocking for high security and fire safety applications.

Applications:

Security control centers, cashier rooms, fire safety alarms, stairwell doors, telephone equipment rooms, computer rooms, hospital equipment and narcotics areas.

Controlling devices:

Security alarms, wall switches, security consoles, access card readers, thermo-sensitive devices, smoke and fire alarms, telephone access controls, automatic time devices, biometrics readers and computerized controls.

Cylinders and key systems

Protect new key systems with Everest 29

Schlage can help you design a system that can grow and change along with your needs, allowing you the flexibility to upgrade your security without the need to replace all your cylinders.

Upgrade existing classic key systems with Primus XP

Schlage offers key system solutions that are ideal for upgrading an existing key system to control key management. Our patent-protected cylinders help prevent unauthorized duplication and can be integrated into virtually any existing system.

Standard cylinders

Standard cylinders are available in the patented Everest 29 or Classic keyways. Standard keyways are the Everest 29 S123 and S145 (factory masterkeyed systems). All other keyways available when requested.

Cylinder for most functions

Hotel function indicator cylinder

Standard cylinders

Number	Description
23-001	Conventional 6-pin cylinder (standard)
20-748	Primus high security cylinder
20-548	Primus UL437 Listed high security cylinder
23-003	6-pin hotel function (D85) with occupancy indicator
21-017	Temporary construction plug, plastic

Available in 606 and 626 finish only.
Everest 29 S123 keyway standard.

Full size interchangeable core

Schlage® interchangeable core (IC) locksets allow immediate rekeying at the door simply by using the special control key to replace the core in seconds.

Available in all lever designs and the Orbit knob, full size interchangeable cores can be integrated into any 5 or 6-pin Schlage key with no adverse affects on keying capacity.

Full size interchangeable cores

Number	Description
23-030	Conventional core
20-740	Primus high security core

Available in 606 and 626 finish only.
Everest 29 S123 keyway standard.

Primus XP access control and high security cylinders

Primus XP access control and high security cylinders are available to add patented key control and varying degrees of geographical exclusivity to most Schlage 6-pin key systems, whether Everest 29 or Classic keyways.

In addition to a conventional pin tumbler mechanism, Primus cylinders incorporate a patented finger pin and sidebar design, providing a “dual-locking” cylinder that is virtually pick-proof. Resistance to drilling and other physical attack is optional by specifying 20-500 Series UL437 Listed cylinders.

Classic Primus XP cylinders are recommended for upgrading existing Classic key systems. Due to its extended patent life, the newly designed Everest 29 Primus XP is recommended for new key systems and for upgrading existing Everest key systems. Specify keyway to differentiate between Everest 29 and Classic. Example: C or CP (Classic) vs. S123 (Everest 29).

Visit allegion.com/us for more information.

IC retrofit kits

To convert standard D Series locksets to accept Schlage full size interchangeable cores, change the knob and add parts shown. Orbit design only.

Full size interchangeable core retrofit

Number	Description
04-034	Retrofit kit (parts below + core, specify finish)

Latches

D Series latches are adjustable for flat or beveled edge doors. Latches and strikes are furnished in brass, bronze, or chrome finishes to be compatible with lock trim. When ordering, specify quantity, part number, and finish. All D Series latches have 1/2" throw and 1" housings except 2 3/8" backset latches, which includes sleeve G506-815 to fill a 1" edge bore. Standard letters are shown in bold type.

Latches

Backset	Description	Deadlatch 1/2" (13 mm) throw	Springlatch 1/2" (13 mm) throw
2 3/8" (60 mm)	1 1/8" (29 mm) x 2 1/4" (57 mm) square corner	14-047	—
	1" (25 mm) x 2 1/4" (57 mm) square corner	14-048	—

Long Backsets

D Series locks with 5" backsets are normally furnished with 1 1/8" faceplates and 1" housings. Links installed in metal doors require one A501-567 sleeve and 43-005 (order separately) to join latch and link.

2 3/4" latch

Extension link
(43-005)

Sleeve
(A501-567)
(add to 2 3/4" backset latch)

Door Reinforcement

Reinforcing unit is required to reinforce and help prevent the collapse of hollow metal doors when locksets are tightly mounted. This kit should be used with long backsets for D Series lock installations in hollow metal doors to prevent lateral movement of the latchbolt. Specify door thickness, 1 3/8" (35 mm) or 1 3/4" (44 mm), when ordering reinforcement kits.

Reinforcement Kit
37-001

Kit includes:
Reinforcement
A501-566 for 1 3/4" doors or
A501-565 for 1 3/8" doors

Sleeve
A501-567 for
5" backsets

Strikes

All Schlage strikes are furnished complete with screws. The standard D Series strike has a 1³/₁₆" lip. When ordering separately specify quantity, product number, finish, and lip length. Standard strikes are shown in bold type.

Strikes

Number	Lip length	Description
10-013	1 ¹ / ₈ " (28 mm) 1 ¹ / ₂ " (38 mm)	1 ¹ / ₈ " x 2 ³ / ₄ " (28 mm x 70 mm) square corner, box 1 ³ / ₄ " (38 mm)
10-016	1 ¹ / ₈ " (28 mm)	1 ¹ / ₈ " x 2 ³ / ₄ " (28 mm x 70 mm), ³ / ₄ " (19 mm) deep box for 14-042 fire door latch.

Rabbeted latch and strike kit

Rabbeted latch and strike kit finishes: 605, 626. This kit adapts square corner latches and 2³/₄" (28 mm) high strikes for 1¹/₂" (13 mm) rabbeted door and frame preparations.

Rabbeted latch and strike kit
(39-030)

Accessories and adapters

Retrofit lever handle
04-032

Number	Description
04-032	Retrofit lever for Orbit, Plymouth and Tulip knobs
38-018	Thin door spacer for knob locks. 2 required per lock, specify finish.
39-008	Instruction plate for D85 hotel function knob locks
A501-878	Latch front adapter for 1" face plate in 1 1/8" prep

Specifications

Handing:

Keyed functions of knob designs are field reversible.

Door thickness:

1³/₈" to 2" (35 mm-51 mm) standard.

2" to 2¹/₂" (51 mm-64 mm) optional.

Backset:

2³/₄" (70 mm) standard. 2³/₈", 3³/₄" and 5"

(60 mm, 95 mm, and 127 mm) optional.

Faceplate:

Brass, bronze or stainless steel. 1¹/₈" x 2¹/₄"

(29 mm x 57 mm) square corner, beveled.

Lock chassis:

Steel, zinc dichromate plated for corrosion resistance.

Latch bolt:

Brass, 1/2" (12 mm) throw, deadlocking on keyed and

exterior functions. 3/4" (19 mm) throw, anti-friction latch available for pairs of fire doors.

Exposed trim:

Wrought brass, bronze or stainless steel.

Strike:

ANSI curved lip strike 1¹/₄" x 4⁷/₈" x 1³/₁₆" lip to center standard. Optional strikes, lip lengths and ANSI strike box available. See page 20.

Cylinder and keys:

6-pin patented Everest 29 S123 keyway standard with two nickel silver keys per lock.

Keying options:

Full size interchangeable core and Primus XP high security cylinders. Master keying, grand master keying, and construction keying.

Warranty:

Three-year limited warranty.

Certifications

ANSI:

Meets or exceeds A156.2 Series 4000, Grade 1 strength and operational requirements.

Federal:

Meets FF-H-106C Series 161.

UL / cUL:

All locks listed for A label single doors, 4' x 8'.

Letter F and UL symbol on latch front indicate listing.

Electrified functions are UL19X Listed for single point

locking applications. UL437 Listed locking cylinder

optional: specify Primus 20-500 Series cylinder.

ADA compliant:

Schlage Lock Company offers a wide selection of locks designed to meet the Americans With Disabilities Act.

Door preparation

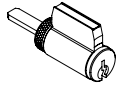

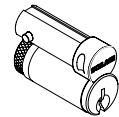

Ordering guidelines

To order Schlage products, descriptive data should be in the same sequence as shown.

Line item	Qty	Products	Outside		Inside		Hand	Latch	Strike	Thk	Ext	Dim	Additional details
			Des	Fin	Des	Fin							
1	2	3	4	5	6	7	8	9	10	11	12	13	14

- 1 Line item number
- 2 Quantity
- 3 Complete model number with function and cylinder type

To order cylinder options, change “PD” at the end of the model number as follows:

	D53PD	Standard.
	D53LD	Less standard cylinder. For Primus cylinder, specify this option and order Primus cylinder separately.
	D53CD	With temporary plastic construction cylinder. Double cylinder functions ordered less cylinder are furnished with these construction cylinders to maintain timing of key cams.
	D53JD	Prepared for full size interchangeable core, less core. For Primus core, specify this option and order Primus core separately.
	D53RD	With full size conventional interchangeable core installed. Order control keys separately.
	D53TD	With full size (temporary) construction core installed. Order all keys separately.

- 4 / 5 Outside design / finish. Specify tactile warning (knurling) here as “8AT” for Athens, “8RO” for Rhodes or “8SP” for Sparta.
- 6 / 7 Inside design / finish. Leave blank if same as outside.
- 8 Hand. Required for keyed knob designs and all split finish locksets. One hand per line item.
- 9 Latch. Leave blank for standard or specify part number for optional latch. LLL=less latch.
- 10 Strike. Leave blank for standard or specify part number for optional strike. LLL=less strike.
- 11 Door thickness, if non-standard. Example: 200 = 2".
- 12 Extension, to specify whether thick door is extended inside (EI), outside (EO), differently (ED) or equally (EE).
- 13 Dimension for strike lip lengths. See price book for availability of specific dimensions with specific strikes (e.g. 138 = 1³/₈").
- 14 Keying detail (e.g. key symbol, keyway, bitting) and other special requirements.

Example

Line item	Qty	Product	Outside		Inside		Hand	Latch	Strike	DR Thk	Ext	Dim	Additional details

Put your trust in the name you know

For more than 90 years, Schlage has been creating the strongest and most technologically advanced security products for schools, hospitals, hotels, commercial and institutional buildings, multi-family properties and homes. From durable mechanical locks to comprehensive electronic access control solutions and biometrics, Schlage provides protection at critical moments – when property and personal security are at stake. With a wide range of products, styles and finishes, Schlage has products for the most demanding project specifications. In public buildings, in the workplace, and in homes, at the end of the day Schlage stands for one thing: strong.

H Series

Tough, dependable multi-family safety and security

Multi-family applications demand tough hardware that also provides quick, easy egress for guests or residents. Our H Series is also well suited for small hotels and military housing, a choice of cylinders, and styles and finishes that fit your building's design.

We don't compromise on security

The safety and security of your clients' buildings is something we take very seriously. That's why every Schlage lock and deadbolt undergoes intensive testing:

- Cycle tests
- Resistance tests
- Door impact tests
- Warped door tests
- Bolt strength tests

We pay attention to these details so you can focus on creating a functional and aesthetically pleasing environment for your clients.

Pictured here: Plymouth interconnected lock shown in 626 satin chrome

Real security is knowing exactly what you want and getting it

When you know exactly what you want, you don't want to waste time finding out whether it meets your project specifications. That's why we offer the world's largest team of hardware specification writers to help you and your clients turn your vision into reality. And when it comes to products, our commercial suiting options, wide variety of lever designs and rich selection of finishes give you the tools you need to make your projects perfect. You know what you want. With Schlage, you can be sure you'll get it.

Safety, security and confidence

When you choose a Schlage lock, you can be sure you've done the job right, the first time. After all, our products are among the most durable and dependable on the market today. Our locks are easy to install, and simple to repair and maintain. That means fewer callbacks for you, and total safety and security for your customers.

H Series

In condominiums, apartments and small hotel/motel applications, the H Series interconnected lock delivers lasting performance, easy installation and a choice of finishes to fit the building's design.

Pictured here: Orbit interconnected lock shown in 626 satin chrome

A tough, dependable lock

- Heat-treated steel locking components for extra strength
- Independent heavy-duty lever torsion springs for durability and long life
- Non-handed levers for easy field installation
- Extra-strong Everest 29™ patented keys standard for commercial applications

Door handing

All Schlage locks are reversible. Hand information is necessary to ensure proper cylinder orientation in keyed functions, and finish of latchbolt and strike for locks that are to be installed on reverse bevel doors. Follow the diagram to correctly determine the hand of the door.

ADA-compliant products

In compliance with the American National Standards Institute (ANSI A117.1) and the Americans with Disabilities Act (ADA), Schlage Lock Company offers a wide selection of locks designed for the needs of the physically challenged. This act is designed to provide protection for people with disabilities.

The intent of ADA is that owners of certain types of buildings must remove barriers and provide people with disabilities with access equal to, or similar to, that available to the general public.

Product information and specifications contained in this catalog are subject to change without notice. Please consult the factory.

H Series lock functions

ANSI A156.2 Series

Keyed functions

Schlage ANSI
H110 **F95**

Entrance, single locking

- Deadbolt thrown or retracted by key in upper cylinder from the outside or thumbturn inside.
- Latchbolt retracted by knob from either side.
- Turn inside knob or lever to simultaneously retract latchbolt and deadbolt for immediate exit.

Outside Inside

Schlage ANSI
H153 **F97**

Entrance, double locking

- Deadbolt thrown or retracted by key in upper cylinder from outside or thumbturn inside.
- Deadlatch is retracted by key in outside knob or by pushing turn-button in inside knob or lever.
- Outside knob may be fixed in locked position by rotating turn-button.
- Turn inside knob or lever to simultaneously retract deadbolt and deadlatch for immediate exit.

Outside Inside

Schlage ANSI
H180 –

Storeroom lock

- Deadbolt operated by key from outside or thumbturn inside.
- Bolt automatically deadlocks when fully thrown.
- Deadlatch retracted by key from outside.
- Inside knob simultaneously retracts both latch and deadbolt for immediate exit.
- Outside knob is always locked.

Outside Inside

Schlage ANSI
H185 **F100**

Hotel/motel lock

- Deadbolt thrown or retracted by emergency master key in upper cylinder from outside or thumbturn inside.
- Deadlatch retracted by key in outside knob, except when the lock is in "shut-out" mode, by pushing button on inside knob or lever.
- Pushing button on inside knob or lever activates visual occupancy indicator.
- Only emergency master key operates outside knob when lock is in shut-out mode.
- Turn inside knob or lever to release shut-out mode and simultaneously retract deadbolt and latchbolt for immediate exit.

Outside Inside

Schlage ANSI
H170 –

Inside half dummy trim

- Snap-on rose and knob.
- Concealed mounting screws.

Cylinders and key systems

Protect new key systems with Everest 29

Schlage can help you design a system that can grow and change along with your needs, allowing you the flexibility to upgrade your security without the need to replace all your cylinders.

Upgrade existing classic key systems with Primus XP

Schlage offers key system solutions that are ideal for upgrading an existing key system to control key management. Our patent-protected cylinders help prevent unauthorized duplication and can be integrated into virtually any existing system.

- Primus XP UL437 Listed high security

Cylinder only

Cylinder and housing

Primus XP access control and high security cylinders

Primus XP access control and high security cylinders are available to add patented key control and varying degrees of geographical exclusivity to most Schlage 6-pin key systems, whether Everest 29 or Classic keyways.

In addition to a conventional pin tumbler mechanism, Primus cylinders incorporate a patented finger pin and sidebar design, providing a “dual-locking” cylinder that is virtually pick-proof. Resistance to drilling and other physical attack is optional by specifying 20-500 Series UL437 Listed cylinders.

Classic Primus XP cylinders are recommended for upgrading existing Classic key systems. Due to its extended patent life, the newly designed Everest 29 Primus XP is recommended for new key systems and for upgrading existing Everest key systems. Specify keyway to differentiate between Everest 29 and Classic. Example: C or CP (Classic) vs. S123 (Everest 29).

[Visit \[allegion.com/us\]\(http://allegion.com/us\) for more information.](http://allegion.com/us)

Full size interchangeable core 8

Schlage interchangeable core (IC) locksets allow immediate rekeying at the door simply by using the special control key to replace the core in seconds.

Only the Orbit knob is available with IC. Full size interchangeable cores can be integrated into any 5 or 6-pin Schlage key with no adverse affects on keying capacity.

To order complete locks with full size cores, add suffix **R**. Example: H153**R**. To order locks less core, change suffix to **J**. To order with full size construction core, change suffix to **T**.

Orbit

Symbol: ORB

Material: Wrought brass or bronze

Finishes: 605, 606, 609, 612, 613, 625, 626

Design shown in 626 satin chrome

Cores, IC cylinders and parts

Full size interchangeable cores - options

- Conventional core
- Primus XP high security core

Available in 606 and 626 finish only. Everest 29 S123 keyway standard for commercial; C keyway standard for residential.

IC cylinders for deadbolt (top) - options

Tailpiece not included.

- Housing less core
- Housing with conventional core
- Housing with Primus core

Available in 605, 606, 609, 610, 611, 612, 613, 616, 625, 626. Everest 29 S123 keyway standard for commercial; C keyway standard for residential.

Driver and retainer for
IC knob
01-053

IC installation tool

This tool is used to install the driver and retainer for full size IC in Schlage knobs and levers. Its other ends are designed to install and remove mortise cylinder housings and test mortise cylinder cam action for both small format and full size interchangeable core cylinders.

Latches and deadbolts

H Series latches and deadbolts can be ordered in combinations, separately or with locks. When ordering separately, specify quantity, product number, and finish. Standard deadbolt/latchbolt combinations, per backset, are shown in bold type.

Specifications

Handing:

Field reversible.

Door thickness:

1³/₈" to 1³/₄" (35 mm - 44 mm).

Backset:

2³/₈" (60 mm) standard, 2³/₄" (70 mm) and 5" (127 mm) optional.

Fronts:

Brass or bronze. 1¹/₈" x 2¹/₄" (29 mm x 57 mm) square corner, beveled, for 2³/₄" (70 mm) backset standard. For availability with specific backsets, see page 18.

Lock chassis:

Steel, zinc dichromate plated for corrosion resistance.

Deadbolt:

1" (25 mm) throw with hardened steel roller, and 1" (25 mm) housings standard.

Latch bolt:

Brass, chrome plated, 1/2" (13 mm) throw, deadlocking.

Exposed trim:

Knobs, roses, escutcheons, latch faceplates and strikes are wrought brass or bronze. Levers are zinc base, plated to match finish symbols.

Strike:

T-strike 1¹/₈" x 2³/₄" x 1¹/₈" (29 mm x 70 mm x 29 mm) lip to center with box standard. Optional strikes, lip lengths and ANSI strike box available. See page 19.

Cylinder and keys:

Commercial: 6-pin patented Everest 29 S123 keyway standard with two nickel silver keys per lock.

Residential: 6-pin C keyway, keyed 5-pin.

Keying options:

Interchangeable core and Primus® high security cylinders. Master keying, grand master keying, and construction keying.

Warranty:

Commercial: Three-year limited.

Certifications

Federal:

Meets FF-H-106C.

UL / cUL:

All locks listed for A label single doors, 4' x 8'.

Letter F and UL symbol on latch front indicate listing.

UL437 Listed locking cylinder optional:

Specify Primus 20-500 Series cylinder.

ADA compliant:

Schlage Lock Company offers a wide selection of locks designed to meet the Americans With Disabilities Act.

ALLEGION™

Cylinders and key blanks

Quick reference guide

The height of security.

Introducing a whole new look for high-security key systems. With a new undercut design and patent protection until 2029, the all-new Everest 29™ key system delivers unparalleled security that can't be duplicated. Available in full size and SFIC cylinder formats, Everest 29 is backward compatible with current Everest B, C and D keyways, making migration of an existing key system less complex.

Schlage has reinvented high security key systems.

In settings like schools, hospitals and universities, key systems are the foundation of a comprehensive, multi-level security management system. Everest 29 delivers a higher level of security because it cannot be duplicated without authorization. Its distinctive design is based on creating a key like no other.

Patent protection until 2029

thanks to a new undercut design that provides patent protection for Everest 29 keys until 2029.

Distinctive bow

a larger, rounded key bow creates quick visual differentiation between Everest and Everest 29.

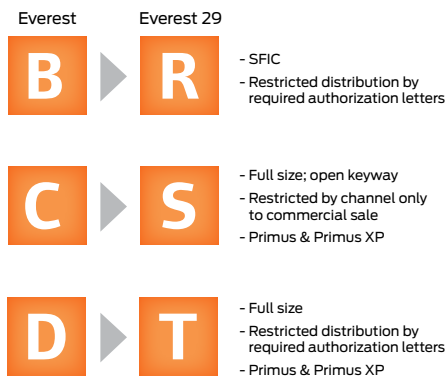

Everest 29™ through-cut technology

utilizes a unique process to create the patented Everest 29 undercut design.

Proven strength

shear-strength tested to perform with the same toughness and reliability the Everest family is known for.

Backward compatibility makes it simple to migrate your key system to Everest 29.

Everest 29 S123 are the default keyways for Schlage locks
 Everest 29 S145 are the default keyway for new master key systems
 Legacy Everest keyways are still available to order

Put your trust in the name you know

For more than 90 years, Schlage® has been providing innovative security solutions for schools, hospitals, hotels, condominiums and a host of other commercial buildings. Today, Schlage is at the forefront of cutting-edge technology including wireless security, access control systems including readers, credentials and biometrics. With a wide range of products, styles and finishes, Schlage has what you need, no matter how demanding your project specifications may be. And, we stand behind every product we make with the best after-sales service in the business. It's this commitment to design, performance and technology that ensures you can stand behind our products too.

Rev. 11/13

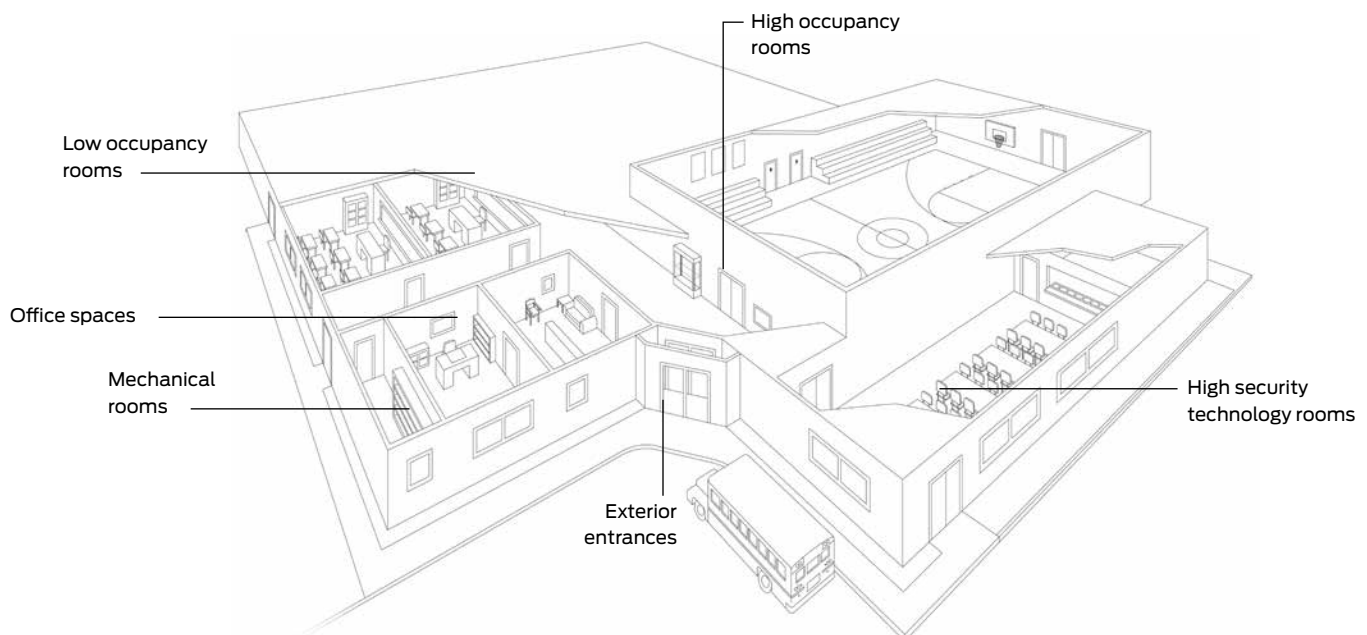

What is a key system?

A key system allows you to control access to all of the locked openings in your facility from the front door to high security server rooms. It is the result of the choices you make for the cylinders on your locks as well as ease of key duplication you prefer for your facility. For instance, if high security is your top priority you should consider a system where key design is patent protected and duplication is tightly controlled. Other facilities may prefer convenient and easily accessible key duplication.

Identify the openings in your building

Before you begin to configure your system, identify all of the openings in your facility. Start at the exterior and move through the building's core. Consider grouping openings into categories, such as by building, department or floor. This will allow you to consider the security level and key control for each area of the building.

Be sure to know your options

Schlage offers innovative and high quality solutions to match your desired level of security and convenience. We offer products for new systems or to upgrade or expand security in an existing system. With Schlage Key Systems, you can:

Choose a cylinder format for Schlage products or other manufacturers' products

We offer a selection of cylinder formats designed to complement our complete family of products or cylinders which allow you to upgrade the security of products from other manufacturers.

Upgrade your cylinder mechanism for higher security

Primus® XP is pick-resistant and features two independent locking mechanisms that must both align to the key cuts to allow entry.

Select patented protection for the ultimate in key duplication control

Schlage offers both open and restricted keyways to fit the need of your facility. Restricted control limits who and how keys can be duplicated. The unique undercut design of Everest 29™ provides patent protection until 2029, allowing tight control of key blank distribution through highly enforceable key control.

How to choose the right system

Making the right choices will ensure the success of your key system. Use this chart as a guideline to design your system.

Choose the right cylinder format			
	<p>Conventional cylinders Full size cylinders designed specifically for Schlage products. Conventional cylinders require some breakdown of the lock for removal and replacement. The types of cylinders available are:</p> <p>Key-in-knob/lever, mortise and rim cylinders, based on the industry standard plug diameter of 1/2".</p>	<p>Interchangeable cylinders Can be replaced and installed without breakdown of the lock</p> <p>Small format (SFIC) Can be used to replace cores from other brands (Best, Falcon, etc.). Based on the industry standard plug diameter of 1/2".</p> <p>Full size (FSIC) Full size interchangeable cores are based on the industry standard plug diameter of 1/2" utilizing the same key families as conventional cylinders. (These vary from manufacturer to manufacturer.)</p>	 
Choose the right cylinder mechanism			
	<p>Standard Normal, standard cylinders and the default mechanism unless you upgrade to Primus XP.</p>	<p>Primus XP High security dual locking cylinder mechanism provides patented key control, geographical exclusivity, and pick-resistance. UL437 drill-resistance is optional.</p>	
Choose the right keyway and key control			
	<p>Classic keyway Popular design found on many existing products. New systems are no longer available in the Quad, Numbered or Reverse families.</p>	<p>Everest 29 keyway Features a new undercut design with patent protection through 2029. It delivers a higher level of security because it cannot be duplicated without authorization.</p>	
	<p>Open key control Standard keyways easily duplicated and available without any ordering formalities.</p>	<p>Restricted key control Special non-stock keyways set aside for limited use and a higher degree of key control. A letter of authorization is required to process orders for keys, blanks and cylinders.</p>	

Contact your local SSC representative for assistance in determining which format and level of exclusivity best suits your needs.

Choose the right cylinder format

Schlage cylinders and key systems are ideal for a wide range of commercial applications, from airports, hospitals, school districts, universities and offices, to research laboratories, and government and military buildings. On the following pages, we provide a brief overview of the steps to develop a system that fits the security level of your application.

Conventional (standard) cylinders

Schlage's high quality conventional cylinders provide the standard level of security and functionality for Schlage locks and are backed by over 90 years of industry leading innovation. The exclusive use of solid brass bar stock plugs and modular design, phosphor bronze springs, nickel silver keys and bottom pins ensures long life and ease of operation. 6-pin Everest 29 cylinders in S123 keyway with two patented keys are standard for stock. S145 is standard for new master key systems.

Interchangeable core (IC) cylinders

For use where fast and labor-saving rekeying is desired, even by non-technical personnel. Interchangeable cores can be replaced easily without needing to breakdown the lock by using a control key. Unlike most other brands, Schlage interchangeable cores can always be integrated into existing systems with no adverse effect on the key system. IC cylinders are available in two sizes:

Full size interchangeable core (FSIC)

Based on the industry standard plug diameter of 1/2", Schlage full size interchangeable cores (FSIC) are available for a variety of different key system types from standard and basic, to restricted and Primus XP high security.

Small format interchangeable core (SFIC)

Based on a plug diameter smaller than the standard 1/2", SFIC cores are completely interchangeable with Best, Falcon and other SFIC installations. No Primus XP version exists.

Choose the right cylinder mechanism

Your cylinder will feature our time tested, pin and tumbler **standard mechanism**. For additional security, you can upgrade your cylinder with our Primus XP mechanism.

Primus XP is pick-resistant and built with the highest standards of quality. Primus XP provides additional cylinder security and helps eliminate unauthorized key duplication.

- Two independent locking mechanisms - a conventional pin and tumbler plus 5 finger pins and sidebar mechanism
- Top pins and sidebar must be engaged simultaneously for cylinder to operate
- Requires specially designed side bit milled Primus key for operation
- Unique side bit milling on key makes unauthorized duplication highly enforceable
- Allows creation of geographically exclusive keys in a thousand available combinations
- Can be used to upgrade an Everest 29 or Classic system to a high-security cylinder

Primus XP dual locking design

Everest 29 Primus XP key with patented side bit design engages both locking mechanisms simultaneously. The unique design eliminates unauthorized key duplication.

Add UL437 for the highest protection

Optional UL437 listed cylinders feature hardened steel drill pins. They are tested and certified to be pick and drill resistant and can withstand extreme physical attacks.

Conventional pin tumbler locking mechanism with springs, top pins, master pins (as required), and bottom pins.

Primus XP sidebar locking mechanism is engaged with a patented side bit milled Primus key that operates the springs and finger pins.

Choose the right keyway and key control

Patented key systems provide better protection against unauthorized duplication. Key blanks are tightly controlled by the manufacturer and attempts to duplicate the design without permission are subject to federal law.

Our Everest 29 key systems are patented until 2029 and are designed to give you the level of security you need for every application. With optional keyway exclusivity, multi-level key hierarchy and cylinders that fit a wide variety of locks, Everest 29 gives you total control of your building's security.

Everest 29

Everest 29 patented keyways provide a higher level of protection against unauthorized key duplication and non-authorized manufacturing and distribution of key blanks.

Everest 29 keys work by lifting the check pin when the key is inserted into the cylinder, allowing the key to turn and the lock to open. This patented interaction ensures the integrity of the system at every opening.

Everest 29 can be integrated into your existing Everest B, C or D system

Everest 29 is backward compatible with Everest B, C and D keyways making migration of an existing key system less complex.

The backward compatibility of Everest 29 keyways to the legacy Everest keyways provides you with flexibility and security that adapts to your needs. Everest 29 keys will work in an existing Everest keyway, but current Everest keys will not work in a new Everest 29 keyway. This is because of the patent enabling feature of Everest 29 and what prohibits duplication of the new Everest 29 keys.

Undercut keyway profile is patented

When check pin is lifted, cylinder is free to rotate

EVEREST

EVEREST 29

- SFIC
- Restricted distribution by required authorization letters

- Full size; open keyway
- Restricted by channel only to commercial sales
- Primus and Primus XP

utilizes a unique process to create the patented Everest 29 undercut design.

Proven strength
shear-strength tested to perform with the same toughness and reliability the Everest family is known for.

Everest 29 keyways

Everest 29 R

- Available in a small format interchangeable core only
- Restricted non-stock keyway set aside for limited use and a higher degree of key control
- Backward compatible with Everest B family

Everest 29 S

- Available in full size conventional and full size interchangeable cores
- Open keyway without any ordering formalities for fast and easy key duplication
- Available for Primus XP cylinder mechanism or standard
- Backward compatible with Everest C family

Everest 29 T

- Available in full size conventional and full size interchangeable cores
- Restricted non-stock keyway set aside for limited use and a higher degree of key control
- Available for Primus XP cylinder mechanism or standard
- Backward compatible with Everest D family

The Classic keyway

Our Classic keyway design has become one of the defaults on many products sold and installed throughout the country. If you have products with a Classic keyway, you can make them more secure by upgrading them to Primus XP. New key systems in our classic keyway designs are limited to the obverse sections. Numbered, Quad and Reverse key systems are limited to existing system maintenance and remain subject to our restricted key system policy.

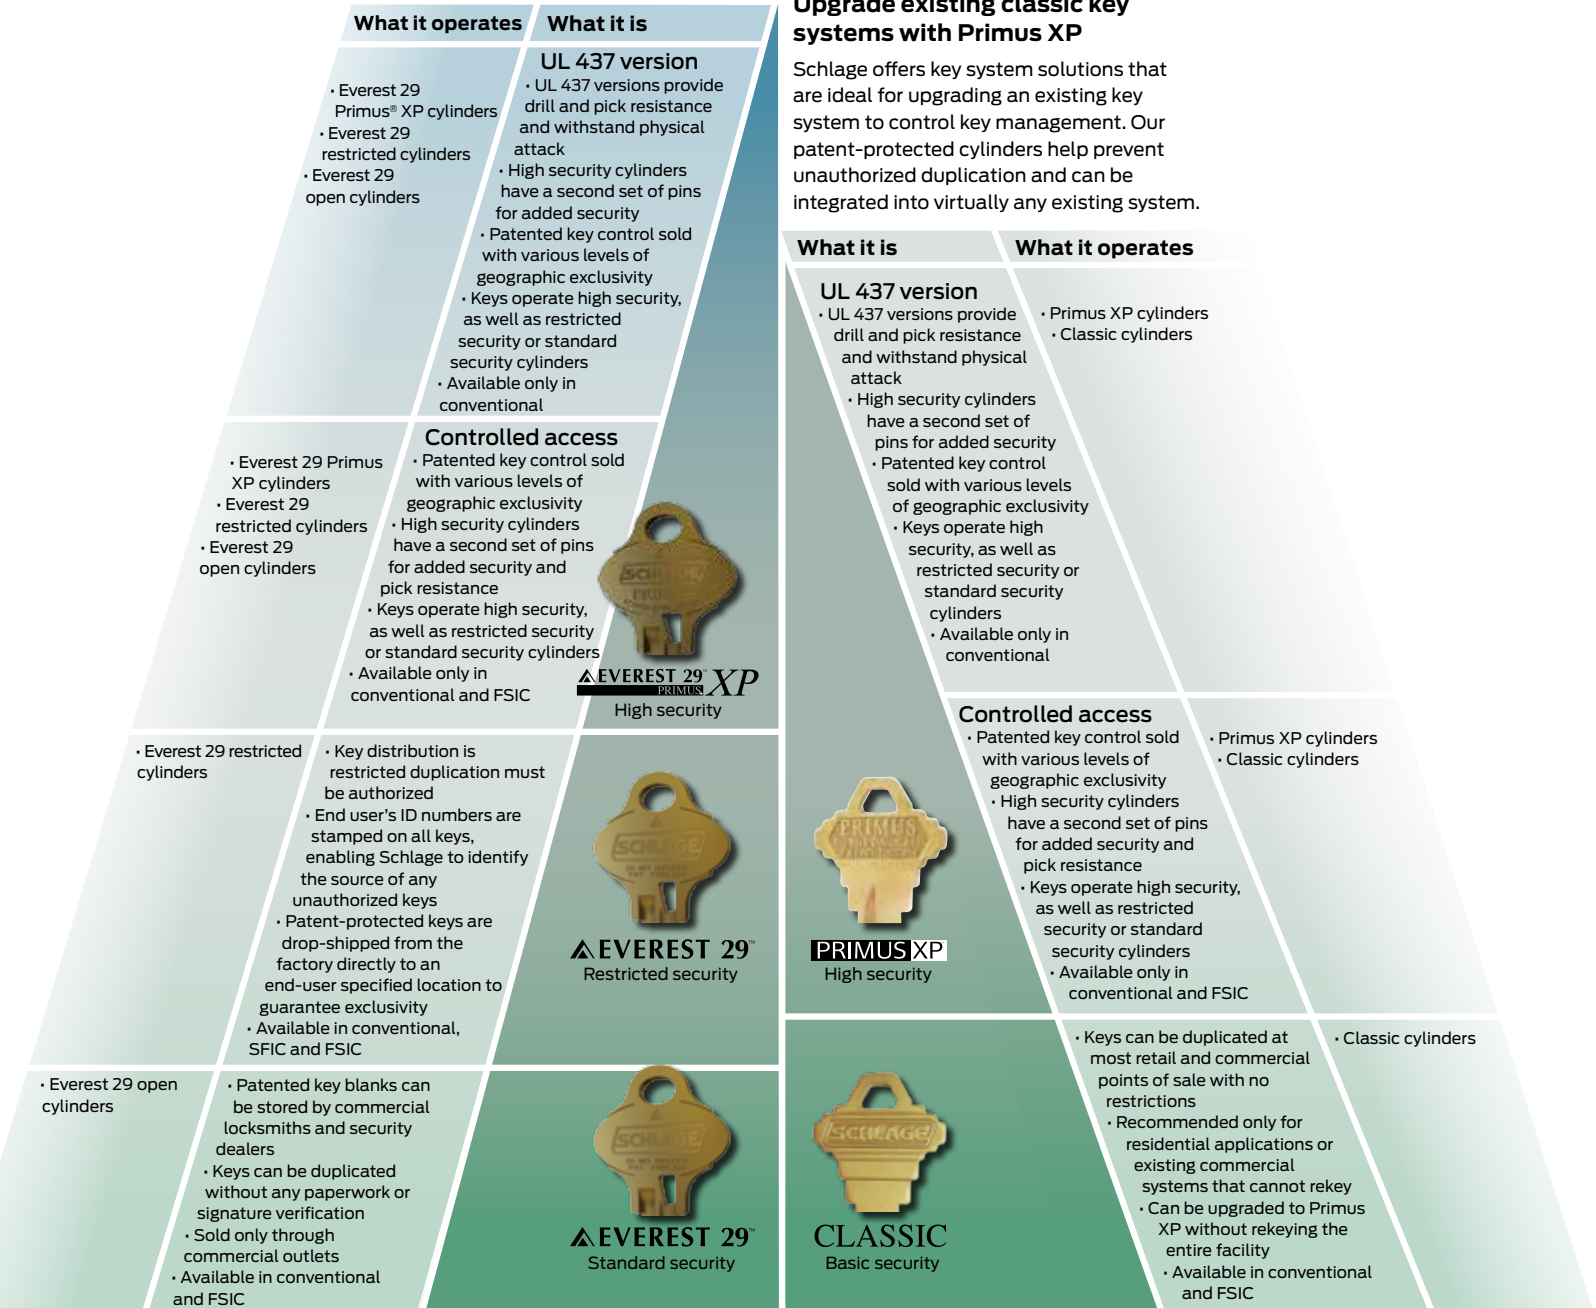

Choose the right level of key control

Protect new key systems with Everest 29

Schlage can help you design a system that can grow and change along with your needs, allowing you the flexibility to upgrade your security without the need to replace all your cylinders.

Upgrade existing classic key systems with Primus XP

Schlage offers key system solutions that are ideal for upgrading an existing key system to control key management. Our patent-protected cylinders help prevent unauthorized duplication and can be integrated into virtually any existing system.

The top choice for all new and existing key systems

Schlage will help you design a system that can grow and change along with your needs, allowing you the flexibility to upgrade your security without the need to replace all your cylinders. If you need the highest level of key system protection, choose Primus XP.

Everest 29 Primus XP

Traceability

Primus XP keys are marked with an ID number.

Distinctive bow

a larger, rounded key bow for quick visual differentiation.

Side bit milling

factory cut to provide geographical exclusivity for end users or dealers.

Six standard key cuts

for easy dealer service with standard pin kits and key machines; can operate conventional cylinders.

15% thicker key for added strength.

Primus XP Key Compatibility

Everest 29 T Primus XP

Everest 29 T Primus XP keys can open locks with either standard T or D keyways or Primus XP keyways.

Note: Same restrictions apply to Everest 29 S Primus and Everest 29 S keyways.

Everest 29 T

Everest 29 T keys can open only those locks with a standard T keyway.

Key control

Key system variety

Patented key systems prevent unauthorized duplication of keys providing greater key control and reduce the threat of a compromised key system. Everest 29 keyway families provide the flexibility to secure and restrict the most sensitive openings in a facility while maintaining access control across the entire system.

Everest 29, Everest, and Classic key systems can be enhanced and restricted to limited distribution with the addition of Primus XP. Primus XP, Schlage's high security sidebar cylinder mechanism, introduces an added level of security control. It delivers patented key control, geographical exclusivity, and pick resistance with the option of adding UL437 drill resistance.

Whether you're retrofitting a building or implementing a key system for a newly constructed complex, Schlage key systems deliver the security you need at every level throughout your building or campus.

Everest 29 T family – end user restricted security

Everest 29 restricted key systems are for end users only and are ideal when there is a significant need to eliminate unauthorized duplication by lock shops, hardware and home centers. Everest 29 T keyways provide a higher level of security, with authorization required for the order of key blanks for duplication. Cylinders with Everest 29 T family keyways are 6-pin and cannot be interkeyed with any 5- or 7-pin products. In addition, Everest 29 T keys can be used to open T keyways, but cannot be used to open Everest 29 Primus XP locks with a T keyway.

Key control

All Everest 29 T family keys are protected against unauthorized manufacture and distribution by U.S. patent 7,665,337 until 2029. These keyways offer substantial key control at a mid-price point between conventional cylinders and Primus XP high security cylinders.

Establishing a new key system

Restricted keyways are reserved for large key systems. A letter of authorization on the end user's official stationery must be submitted with the initial order to establish the authorized ship-to location.

Ordering products for existing systems

Restricted keyway locks, cylinders and blanks on subsequent orders will be drop-shipped to the location originally specified by the end user. Any order that must be shipped to a different destination or change of supplier requires a letter of authorization on the end user's official stationery.

Key machines

Factory provides key blanks which can be cut on key punch #40-099, or use rotary cutter key machines to duplicate these keys or cut them by code. Standard Schlage depths and spacing are used, so there are no new settings for code machines.

Pin kits

Cylinders with T family keyways are compatible with all existing Schlage pin kits. Pinning Kit 40-119 is the standard Schlage commercial pin kit and the latest version of this kit has check pins and check pin springs included.

Sales samples

Restricted keyways are not available as sample cylinders; however, the key and mechanism can be evaluated with an Everest 29 S family sample. The only difference is the shape of the keyway.

Primus XP high security cylinders

Everest 29 Primus XP cylinders are available in T family keyways at Level 9 only.

Compatible with Everest D cylinders

Everest 29 T keys are backward compatible with Everest D cylinders, but Everest D keys will not operate an Everest 29 T cylinder.

Everest 29 S family – standard security

Everest 29 S open keyways provide limited key control, but are protected by patents that reduce the availability to approved Schlage distributors and professional locksmiths. They are best suited for applications where fast and easy key duplication is required and low restriction key control is required. Cylinders with Everest 29 S family keyways are 6-pin and cannot be interkeyed with any 5- or 7-pin products. Primus XP high security cylinders are available in Everest 29 S keyways and those keys are restricted.

Key control

Although Everest 29 S family keys are covered by the same patents as Everest 29 restricted keys, they are openly available to locksmiths, contract hardware dealers, etc. Keys stamped DO NOT DUPLICATE are available as an option.

Establishing a new key system

S145 is the default keyway for new Schlage master key systems. Additional keyways are used to expand systems which need more than one keyway.

Ordering products for existing systems

Everest 29 S family products are available through Schlage authorized distributors and professional locksmiths.

Key machines

Everest 29 S family keys can be cut on the popular Blue Punch for Schlage, even if it is an old machine; however, most key sections need top jaw upgrade kit 40-074. The Blue Punch will cut conventional and Primus Classic (obverse) after the conversion. Pro-Lok Blue Punches of serial number 993058 and higher do not need the upgrade kit. You can also use rotary cutter key machines to duplicate these keys or cut them by code. Standard Schlage depths and spacing are used, so there are no new settings for code machines.

Pin kits

Cylinders with S family keyways are compatible with all existing Schlage pin kits. Pinning Kit 40-119 is the standard Schlage commercial pin kit and the latest version of this kit has check pins and check pin springs included.

Sales samples

The keyway for sample cylinders is S123.

Primus XP high security cylinders

Everest 29 Primus XP cylinders are available in S family keyways at Levels 7, 8, and 9.

Compatible with Everest C cylinders

Everest 29 S keys are backward compatible with Everest C keyway, but Everest C keys will not operate an Everest 29 S keyway.

Everest 29 R family – restricted security for SFIC

Everest 29 R keyways provide restricted security because distribution and duplication are limited. Everest 29 delivers higher performance and long life for the keys and cores for all of your SFIC applications. Most keyways are for large end users with in-house locksmiths to cut keys and combine cores. Everest 29 R family keyway cores are 7-pin and cannot be interkeyed with any full size cylinders.

Key control

All R family keys are protected against unauthorized manufacture and distribution by U.S. patent 7,665,337 until 2029.

Establishing a new key system

A letter of authorization on the end user's official stationery is required with the initial order to establish the authorized ship-to location.

Ordering products for existing systems

Restricted keyway locks, cores and blanks on each subsequent order will be drop shipped to the location originally specified by the end user. Any order that must be shipped to a different destination or change of supplier requires a letter of authorization on the end user's official stationery.

Key machines

R family keys can be cut on a special version of the Blue Punch available through Schlage as 40-071. It is not possible to retrofit any existing Best or Blue Punches to cut B and R family keys. You can also use a rotary cutter key machine to duplicate these keys or cut them by code. The stop is at the shoulder of the key, even though the bittings are read and written tip to bow. This merely requires using new spacing specifications on existing rotary cutter code machines.

Pin kits

All Schlage small format cores are compatible with most brands of A2 system kits. However, Schlage does not recommend using Arrow™ or Kaba Peaks bottom pins in Everest cores. If you do not already have an A2 pin kit, you can purchase Schlage SFIC pin kit 40-129.

Sales samples

Sales sample cores have the R125 keyway. No key blanks or uncombined cores are available for samples since this is a restricted keyway. Each sample core comes with one operating key and one control key. Please specify sales samples when ordering.

Compatible with Everest B cylinders

Everest 29 R keys are backward compatible with an Everest B keyway, but Everest B keys will not operate an Everest 29 R keyway.

Sole sourced R234 and R235 programs

For details, refer to pages 46-47.

Levels and exclusivity

The Primus system features multiple levels of security. For the Classic Primus XP system, security increases from Level One through Level Four. For Everest 29 Primus XP, security increases from Level Seven to Level Nine. Each level requires an appropriate I.D. card and/or signature verification for key duplication. All levels utilize patent-protected Primus cylinders and keys to protect against unauthorized duplication. To select the proper level of security, consideration should be given to the overall key control, convenience and service required for the installation.

The Primus system provides high security and patented cylinders with patented keys distributed with geographic exclusivity.

Classic Primus XP

Ideal for existing key systems
patent protected through 2024

Everest 29 Primus XP

Ideal for new key systems

Purchasing and distribution

Classic Primus XP purchasing and distribution exclusivity

The Primus XP keyway provides various levels of geographic exclusivity and requires authorization for duplication, ensuring better key control.

Level 1

Highlights of level 1

- No exclusivity for side bit milling – shared by all dealers and distributors
- Dealer can purchase products from any Schlage Primus XP authorized dealer
- End user can purchase from any Primus Level 1 authorized dealer, no sole-source relationship

To set up a new dealer:

- Submit a Classic Primus XP Level 1 signed agreement to the distributor

Level 1+

Zip code exclusivity based on first three digits

- Dealer-owned side bit milling exclusivity based on the first three digits of zip code
- Dealer can purchase products from any Schlage Primus XP authorized dealer
- Available to direct and indirect dealers
- Key blanks are not available to end users
- End user must purchase from originating dealer, sole-source relationship

To set up a new dealer:

- Submit Classic Primus XP Level 1+ (and Level 7) signed agreement
- Have local SSC manager sign and approve the agreement
- For dealers who are new to Primus, submit purchase order of a total of \$7500 (list) to cover both Classic and Everest Primus inventories
- For those who are existing Primus dealers, submit purchase order of a total of \$5000 (list) to cover both Classic and Everest Primus inventories

Re-ordering customers need to:

- Provide dealer ID and Primus sequence number with order
- Primus keys will always be drop-shipped to dealer location

Level 2

Time zone exclusivity

- Dealer-owned side bit milling exclusivity based on time zone
- Dealer can purchase products from any Schlage Primus XP authorized dealer
- Available for direct and indirect dealers
- Key blanks are not available to end users
- End user must purchase from originating dealer, sole-source relationship

To set up a new dealer:

- Submit Classic Primus XP Level 2 (and Level 8) signed agreement
- Have local SSC manager sign and approve the agreement
- For dealers who are new to Primus XP, submit purchase order of a total of \$25,000 (list) to cover both Classic and Everest Primus XP inventories
- For existing Primus dealers, submit purchase order of a total of \$15,000 (list) to cover both Classic and Everest Primus inventories

Re-ordering customers need to:

- Provide dealer ID and Primus sequence number with order
- Primus keys will always be drop-shipped to dealer location

Purchasing and distribution

Classic Primus XP purchasing and distribution exclusivity

Levels 3 and 4

End user exclusive

This level is for end users who may want to cut their own keys and/or must be able to obtain competitive bids on subsequent additions to their Classic Primus XP key system.

Highlights of levels 3 and 4:

- Side bit milling is assigned to end user, not dealer, based upon commitment level
- End user is not tied to originating dealer, but can purchase from any Schlage Primus authorized dealer
- Key blanks are available for end user only
- Face sheet is required for each subsequent order

To set up a new dealer:

- Submit signed signature sheet
- Submit signed face sheet
- Submit an order with the above two items

Re-ordering customers need to:

- Submit signed face sheet with order
- Specify keyway on order form

Level 3U (universal) – fewer than 60 cylinders

Schlage randomly assigns a side bit milling from a small pool of combinations which may be repeated locally. There are no guarantees of geographical exclusivity.

Level 3G (geographical) – more than 60 cylinders

Schlage assigns an exclusive side bit milling based on the first two digits of the end user's zip code.

Level 4Z (time zone) – minimum of 2,000 cylinders

Inventory of 2,000 cylinders must be maintained over two years or pay a fee. End user buys exclusivity of one side bit milling within his time zone and country.

Level 4N (nationwide) – minimum of 4,000 cylinders

Inventory of 4,000 cylinders must be maintained over two years or pay a fee. End user buys nationwide exclusivity of one side bit milling.

Purchasing and distribution

Everest 29 Primus XP purchasing and distribution exclusivity

When you upgrade your key system to Primus XP, you automatically move up to one of our three highest security levels, 7, 8 or 9. These levels offer different methods of distribution and purchasing that are important to understand when choosing a key system that meets your needs for flexibility, security, and ongoing service and maintenance.

Zip code exclusivity based on first three digits

Dealer invests in a side bit milling that will be exclusive to him defined by the first three digits of the locksmith's physical location zip code. Dealers sign an appropriate agreement that ensures the integrity of the system and, among other things, prohibits the dealer from cutting other dealers' keys. Each dealer is assigned a unique ID number that is stamped on all keys. Dealers can purchase products and keys from any Schlage authorized Primus distributor.

The dealer then issues an ID card to each end user and verifies orders for duplicate keys against the signature panel on the card.

This is a sole source level similar to Classic Primus XP Level 1 Plus. End users must come back to the originating level 7 locksmith for keys.

Highlights of level 7:

- Dealer-owned side bit milling exclusivity based on the first three digits of zip code
- Dealer can purchase products from any Schlage Primus XP authorized dealer
- Available to direct and indirect dealers
- Key blanks are not available to end users
- End user must purchase from originating dealer, sole-source relationship

To set up a new dealer:

- Submit a Classic Primus XP Level 7 (and level 1+) signed agreement
- Have local SSC manager sign and approve the agreement
- For dealers who are new to Primus, submit purchase order of a total of \$7,500 (list) to cover both Classic and Everest 29 Primus inventories
- For existing Primus dealers, submit purchase order of a total of \$5,000 (list) to cover both Classic and Everest 29 Primus inventories

Re-ordering customers need to:

- Provider dealer ID and key section with order
- Primus keys will always be drop-shipped to dealer location

Purchasing and distribution

Everest 29 Primus XP purchasing and distribution exclusivity

Level 8

Time zone exclusivity

Direct and indirect dealers with aftermarket service and large locksmith companies buy in for a side bit milling exclusive within a time zone. They sell product with this side bit milling to their end user customers. Schlage assigns an ID number to the participating dealer. The dealer must sign a key control contract that, among other things, prevents the dealer from cutting keys bearing another dealer's ID number.

The dealer then issues an ID card to each end user and verifies orders for duplicate keys against the signature panel on the card.

This is a sole source level similar to Classic Primus XP Level 2. End users must come back to the originating Level 8 dealer for keys. The indirect dealers can purchase products from any Schlage authorized distributor.

Highlights of level 8:

- Dealer-owned side bit milling exclusivity based on the time zone
- Dealer can purchase products from any Schlage Primus XP authorized dealer
- Available to direct and indirect dealers
- Key blanks are not available to end users
- End user must purchase from originating dealer sole-source relationship

To set up a new dealer:

- Submit a Classic Primus XP Level 8 (and Level 2) signed agreement
- Have local SSC manager sign and approve the agreement
- For dealers new to Primus, submit purchase order of a total of \$25,000 (list) to cover both Classic and Everest 29 Primus inventories

Re-ordering customers need to:

- Provide dealer ID and key section with order
- Primus keys will always be drop-shipped to dealer location
- For existing Primus dealers, submit a purchase order of a total of \$15,000 (list) to cover both Classic and Everest 29 Primus inventories

Purchasing and distribution

Everest 29 Primus XP purchasing and distribution exclusivity

Level 9

End user exclusive

This level is for end users who may want to cut their own keys and/or must be able to obtain competitive bids on subsequent additions to their Everest 29 Primus XP key system. Level 9 is subdivided to provide varying degrees of side bit milling exclusivity, depending on the amount of cylinders purchased.

Level 9 is comparable to Classic Primus XP Levels 3 and 4. Highlights of level 9:

- Side bit milling assigned to end user, not dealer, based upon commitment level
- End user is not tied to originating dealer, but can purchase from any Schlage authorized Primus dealer
- Key blanks are available for end user only
- Face sheet is required for each subsequent order
- Available in Everest 29 S and Everest 29 T key sections

To set up a new Primus account:

- Submit signed signature sheet
- Submit signed face sheet
- Submit an order with the above two items

Re-ordering customers need to:

- Submit signed face sheet and specify key section with order

Level 9U (universal)

End user buys fewer than 60 cylinders and may share a side bit milling with another small end user in the same area.

Level 9G (geographical)

End users buys 60 cylinders or more; Schlage assigns a side bit milling exclusive within the first two digits of the end user's zip code.

Level 9Z (time zone)

End users buys a minimum of 2,000 Primus XP cylinders over a two-year period or buys the exclusivity outright; Schlage assigns a side bit milling exclusive within the end user's time zone. Inventory must be maintained over two years or pay a fee.

Level 9N (nationwide)

End user buys a minimum of 4,000 Primus XP cylinders over a two-year period or pays for the exclusivity outright; Schlage assigns a nationwide exclusive side bit milling. The end user is free to purchase Level 9 Primus XP products from any Schlage Primus XP dealer nationwide, rather than being tied to a sole source dealer. All Level 9 key systems require a Primus XP signature card to be submitted initially and a Primus XP Face Sheet to accompany every order. Schlage's Key Control Department verifies the signature for each Level 9 order.

Cylinders

Cylinders for Schlage locksets

Cylinders for A Series knobs

Number	Description
21-002	6-pin conventional cylinder (standard, non-Orbit)
21-002-122	6-pin conventional cylinder (standard, Orbit design only)
20-724	Primus cylinder, non-Orbit
20-724-XP	Primus XP cylinder, non-Orbit
20-724-122	Primus cylinder, Orbit design only
20-724-122-XP	Primus XP cylinder, Orbit design only
20-524	Primus UL437 Listed high security cylinder, non-Orbit
20-524-XP	Primus XP UL437 Listed high security cylinder, non-Orbit

Cores

What is an interchangeable core?

An interchangeable core looks like a figure 8 and is easily removed with a control key. It is best suited for larger commercial key systems where it is time consuming to perform a traditional cylinder change (exit devices, certain types of all-glass doors, etc.) FSIC allows fast re-keying and can be integrated into an existing key system, or built into a new key system to allow for future growth. Common applications include hospitals, universities, large office complexes and financial institutions. There are two types of cores: Small Format Interchangeable Core (SFIC) and Full Size Interchangeable Core (FSIC).

1. Small format (SFIC)

2. Full size (FSIC)

Full size interchangeable core (FSIC) availability

A full size interchangeable core (FSIC) is usually manufacturer specific and cannot interchange with other cores.

Classic

Numbers shown are for key blanks. For cut keys, change “35” prefix to “48” for change keys and “49” for master keys. Suffix key section, e.g. 35-101 E. See facing page for available key sections.

Conventional

Primus XP

Standard bow

To order conventional key blanks with DO NOT DUPLICATE, specify XQ06-878. Specify plain bow keys for applications when keys must be stamped with additional information such as special die stamps, serial numbering, etc.

Large bow

Ideal for special keys which must be visibly distinctive within a key system, or for very specialized marking.

Access bow

Conforms to California Title 24 for handicap access.

Specify control keys in architectural specifications and on purchase orders.

Key blanks

Everest full size key blanks

Numbers shown are for key blanks. For cut keys, change “35” prefix to “48” for change keys and “49” for master keys. Suffix key section, e.g. 35-009 C123. See facing page for available key sections.

Conventional

Everest Primus XP

To order, specify quantity, 6-digit ID number, and key section. Key blanks are packed 50 per box, 1000 per case. Specify Control Keys in architectural specifications and on purchase orders.

Everest conventional keys are available with and without DO NOT DUPLICATE. Specify plain bow keys for applications when keys must be stamped with additional information such as special die stamps, serial numbering, etc.

Everest 29 Full Size Key Blanks

Numbers shown are for key blanks. For cut keys, change “35” prefix to “48” for change keys and “49” for master keys. Suffix key section, e.g. 35-270 S123. See facing page for available key sections.

Conventional

Everest 29 Primus XP

To order, specify quantity, 6-digit ID number, and key section. Key blanks are packed 50 per box, 1000 per case. Specify Control Keys in architectural specifications and on purchase orders.

Everest 29 conventional keys are available with and without DO NOT DUPLICATE. Specify plain bow keys for applications when keys must be stamped with additional information such as special die stamps, serial numbering, etc.

Key blanks

Small format interchangeable core key blanks

For cut keys, change “35” prefix to “48” for change keys and “49” for master keys.
 Suffix key section, e.g. 35-009 C123. All keyways are restricted so they are not published.

Everest B family patented restricted key blanks

B235 dealer keyway

Available to locksmiths and service-oriented contract hardware dealers, this keyway is controlled similar to Primus XP Levels 1+ and 7. Each dealer signs a contract agreeing to certain key control procedures and agreeing not to duplicate keys marked with another dealer's ID number.

The dealer cuts all B235 keys and cannot sell key blanks to the end user. If the end user needs to cut keys, B family end user keyways (below) should be furnished instead of B235. Contact your Schlage commercial wholesaler or local SSC representative for further information.

B family end user keyways

The B family end user restricted keyways are not stocked by locksmiths or other dealers. They are drop shipped directly to the end user and offer economical patent protection without geographical exclusivity. All orders for B Family keys and blanks require a letter of authorization from the end user.

For cut keys, change "35" prefix to "48" for change keys and "49" for master keys.
 Suffix key section, e.g. 35-270 S123. All keyways are restricted so they are not published.

Everest 29 R family patented restricted key blanks

R235 dealer keyway

Available to locksmiths and service-oriented contract hardware dealers, this keyway is controlled similar to Primus XP Levels 1+ and 7. Each dealer signs a contract agreeing to certain key control procedures and agreeing not to duplicate keys marked with another dealer's ID number.

The dealer cuts all R235 keys and cannot sell key blanks to the end user. If the end user needs to cut keys, R family end user keyways (below) should be furnished instead of R235. Contact your Schlage commercial wholesaler or local SSC representative for further information.

R family end user keyways

The R family end user restricted keyways are not stocked by locksmiths or other dealers. They are drop shipped directly to the end user and offer economical patent protection without geographical exclusivity. All orders for R Family keys and blanks require a letter of authorization from the end user.

Best® type key blanks

Available in the ten most popular Best key sections. Suffix key section plus “B” to number when ordering, (example 35-310 AB).

Cylinder service equipment and tools

Primus XP I.D. cards

Primus XP I.D. cards are used as authorization credentials for Primus XP Level 1, 1+, 2, 7 and 8 keys. Cards have a signature panel on the back and are issued by the servicing locksmith or dealer who directly supports the system owner. The owner must present the I.D. card to obtain duplicate keys or additions to his system. The signature will be validated by the dealer.

Everest 29 Primus XP I.D. card

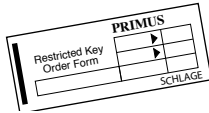

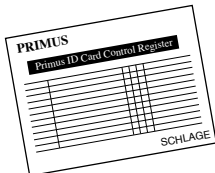

Modular cylinder sales kit
Part # 40-224

Modular cylinder service kit
Part # 40-223
Includes cylinder front housings, back housings, key cams, and cam screws.

Primus XP authorization forms

Number	Description
009162	<p>Primus XP restricted key order form</p> <p>This form is a three-part imprintable form used to record and track the issuance of Primus keys.</p> 
009159	<p>Primus XP face sheet form</p> <p>This form must accompany all Level 3, 4 and 9 orders, and provides the factory with a customer-authorized signature which is compared to the signature on file, a Primus XP reference number (for additions to an existing Primus XP system) and shipping instructions for that order.</p> 
009160	<p>Primus XP signature card form</p> <p>This form is used as a permanent record against which the signature of individuals authorized to obtain service and support for their Primus system is validated. This form must accompany all new Level 3, 4 and 9 factory orders.</p> 
009161	<p>Primus XP I.D. Card control register</p> <p>This form is used by locksmiths and dealers to account for the issuance of Primus XP I.D. Cards.</p> 

Contact Schlage commercial customer service to order these forms, or visit www.allegion.com/us.

Specifications

Standard conventional keying:

Everest 29

Everest 29 products are available to commercial customers. When no other keyway is specified on a commercial customer's order, Schlage supplies Everest 29 keyways in a S123 keyway for stock products and in a S145 keyway for master keyed products. All Everest 29 conventional cylinders have six standard pins and a check pin. Legacy Everest keyways are available, but must be specified at the time of ordering.

Classic

Classic products are supplied upon request to commercial customers and are the standard keyway for residential customers. C keyway is the default for stock products and E keyway is supplied for master keyed products.

Primus XP

Primus XP products are available to qualifying commercial customers. All Primus XP cylinders have six standard pins and five finger pins.

Keys

Classic cylinders are supplied with two 5-pin keys unless otherwise specified. All Everest 29 and Primus XP pinned cylinders are supplied with two 6-pin keys, except certain stocking levels of Primus XP which are supplied less key blanks (LKB) for security reasons.

Keying Options

Interchangeable core cylinders. Master keying, grand master keying and construction keying. Construction master keying is not available for Primus XP cylinders; however, construction cores can be furnished if the job is interchangeable core.

Warranty

Three year limited mechanical warranty and one year limited electromechanical warranty. Everest 29 Primus, Everest 29 Primus XP, Everest Primus. Everest 29 Primus limited lifetime key breakage warranty. Portable security limited lifetime warranty.

Software

All Schlage cylinders and keys can be used in conjunction with SITEMASTER 200® key control management software for highly effective key control.

Certifications

UL / cUL:

20-500 Series Primus cylinders are UL437 Listed locking cylinders.

Purchasing and distribution

Sole source R234 and R235 systems

The R235 keyway is sold primarily through wholesalers to commercial locksmiths or similar security dealers. There is a \$2,500 (list price) inventory commitment of uncombined cores and key blanks unless an existing Primus dealer; then the inventory investment is \$500 list. Each locksmith is assigned an ID number by Schlage, which is stamped on all key blanks. Locksmiths/dealers are not permitted to cut keys for any system set up by another dealer as indicated by the ID number on such keys.

Blanks are drop-shipped by Schlage directly to the locksmith, but cores can be stocked by the participating wholesaler. The locksmith must sign Schlage's key control contract agreeing to maintain the security of key blanks. The wholesaler provides the contract to the locksmith. All R235 keys must be cut by the dealer/locksmith. No blanks can be sold to end users or institutional locksmiths. End users who require in-house key cutting need the end user restricted keyways described earlier.

R235 is also available to Schlage Authorized Security Centers. Schlage contract hardware distributors can only purchase the R235 keyway if they already provide complete key cutting and master keying service for their end users, and they actively promote and sell SFIC restricted key systems.

Separate key control contracts are used for these two types of dealers, but they contain the same key control policies as the contracts signed by commercial locksmiths. The local SSC representative provides these contracts.

Keying options

Since most of the key systems and combining will be done by the commercial locksmith, most of these cores will be furnished uncombined. Factory master keying is also available. There is no such thing as O-bitted for small format cores.

Security center keyway R234

- Available to Security Centers only – distribution controlled by Schlage
- End user must purchase from originating dealer, sole-source relationship
- No geographical exclusivity
- Dealer ID code is stamped on all keys for tracking purposes
- Key blanks are not available to end users

To set up a new Everest 29 R234 dealer:

- \$1,000 (list) inventory commitment order
- Signed Everest 29 R234 agreement approved by SSC manager

Re-ordering customers need to:

- Provide dealer ID with order
- Keys will always be drop-shipped to dealer location

Purchasing and distribution

R keyway – dealer restricted

The R234 keyway is sold exclusively through Schlage Authorized Security Centers. Each Service Center is assigned an ID number by Schlage, which is stamped on all key blanks. This keyway is primarily for national accounts. Security centers are not permitted to cut each other's keys, subject to conditions set forth in the R234 key control contract.

Blanks are drop-shipped by Schlage directly to the Security Center, but uncombined cores may be stocked by the participating wholesaler for fast local delivery. The Security Center must sign Schlage's key control contract agreeing to maintain the security of key blanks.

All R234 keys must be cut by the Security Center. No blanks can be sold to end users or institutional locksmiths. Those types of customers need the end user restricted keyways described earlier.

Keying options

Since most of the key systems and combining will be done by the Service Center, most of these cores will be furnished uncombined. Factory master keying is also available. There is no such thing as 0-bitted for small format cores.

Sole source keyway R235

- Available to indirect locksmith dealers through wholesale channels with distribution controlled by Schlage
- End user must purchase from originating dealer – sole-source relationship
- Indirect locksmith ID code is stamped on all keys for tracking purposes
- Key blanks are not available to end user

To set up a new Everest R235 dealer:

- Submit an order for \$2,500 list for inventory commitment. Reduced inventory commitment of \$500 (list) for existing Primus XP dealers.
- Signed Everest R235 agreement approved by SSC manager

Re-ordering customers need to:

- Provide dealer ID on purchase order
- Keys will always be drop-shipped to indirect locksmith location

The classic keyway family

Obverse keyways for Classic Primus XP cylinders levels 1 through 4

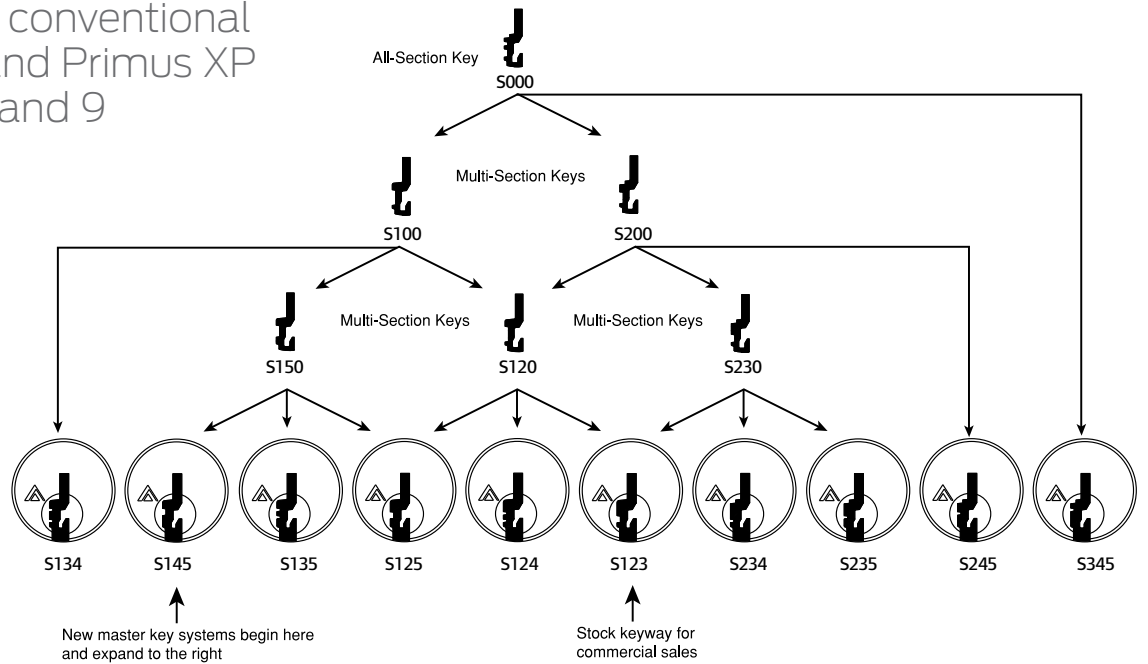

Obverse keyways for classic conventional cylinders

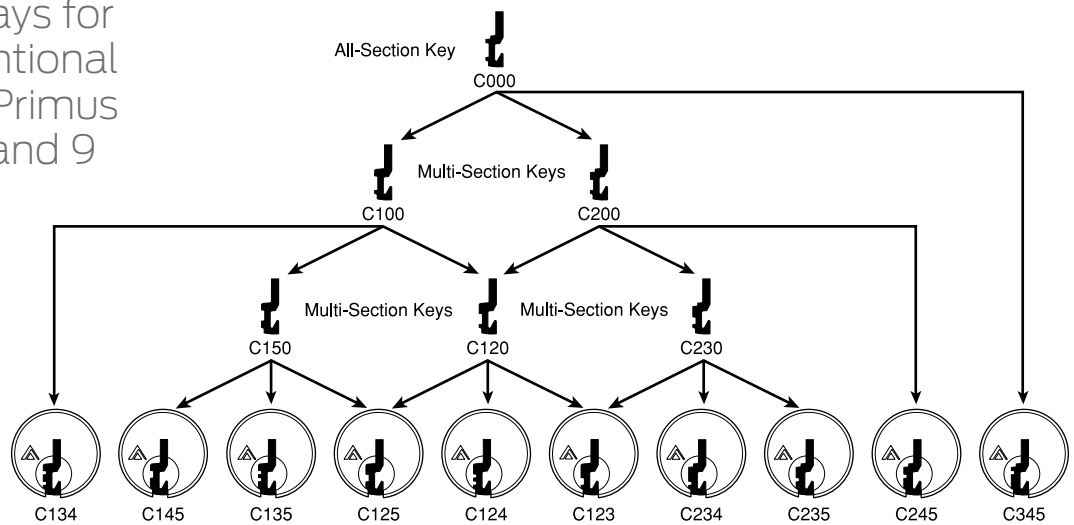

Everest 29 S keyway family

S family keyways for Everest 29 conventional cylinders and Primus XP levels 7, 8, and 9

Everest keyways

C family keyways for Everest conventional cylinders and Primus XP levels 7, 8, and 9

Useful definitions

Bitting - the numbers which represent the cuts of a key; the actual cuts or combination of a key

Blade - the part of a key that may contain the cuts and the millings

Bottom pin - a cylindrical shaped tumbler with a conical point at the end that comes in direct contact with a key

Bow - the portion of the key that serves as the grip or handle

Cam - a lock or cylinder component that transfers the rotational motion of a key or cylinder plug to the bolt that works of a lock

Capping block - a fixture used to aid installation of caps on small format interchangeable cores

Change key - a key that operates one cylinder or a group of keyed alike cylinders in a key system

Construction cores - temporary cores for use during the construction phase of a building that can later be easily removed and replaced with permanent cores

Control key - a special key used for the removal and replacement of an interchangeable core

Ejector pin - a tool used to drive all the elements of a pin chamber out of small format interchangeable cores

High security cylinder - a cylinder that offers a greater degree of resistance to any two or more of the following: picking, impressioning, key duplication, drilling or other forms of forcible entry. The keys also are controlled so only authorized people can make duplicates.

Housing - that part of a locking device designed to enclose the core

Interchangeable core - a cylinder designed to be removed and/or installed with only a special key called a control key; no tools or removal of the lock required to change the core

Key blank - an uncut key manufactured to allow its entry into the keyway of a specific cylinder

Master key - a key that operates all master keyed locks or cylinders in a key system or a part thereof

Master pin - a cylindrical shaped tumbler, flat or crowned on both ends, used between the bottom and top pins to create additional shear lines

Pin tumbler - usually a cylindrical shaped tumbler; three types are used: bottom pin, master pin, and top pin

Plug - the part of the cylinder which contains the keyway, with tumbler chambers usually corresponding to those in the cylinder shell

Plug follower - a tool used to remove the plug while retaining the top pins and springs, and possibly other components in the shell

Rim cylinder - a cylinder with a tailpiece to actuate the lock mechanism typically used with surface applied locks and attached to the lock or door with a mounting plate and machine screws

Shell - the part of the cylinder that surrounds the plug, usually containing tumbler chambers corresponding to those in the plug

Shim - a thin piece of curved stainless steel used to unlock the cylinder plug from the shell by separating the pin tumblers at the shear line

Sidebar - the secondary locking device operated with a patented side bit milling design found in the Primus XP cylinder mechanism

Tailpiece - an actuator attached to the rear of a cylinder, parallel to the plug, used on rim, key-in-knob or other special cylinders

Top pin - a cylindrical shaped tumbler, flat or crowned on both ends, that is installed in direct contact with the tumbler spring

Tumbler - a movable obstruction of varying length in a cylinder that makes direct contact with a key or another tumbler and prevents an incorrect key from operating the lock or cylinder

About Allegion

Allegion (NYSE: ALLE) creates peace of mind by pioneering safety and security. Modular cylinder

Overview

One cylinder is the foundation for every lock you need, add more flexibility with less inventory dollars, and make your job easier, faster and more profitable.

Now you can service almost any lock on any door with just one cylinder. Simply by adding or changing the front and back housing you can convert a modular cylinder into multiple cylinder types, including mortise, rim and key-in-lever. The revolutionary Schlage® Modular cylinder will dramatically reduce your inventory because you will be able to make almost any cylinder type from a series of modular components and parts.

Now, one cylinder changes everything.

Our modular cylinder is the foundation for every lock you need

- One cylinder converts to three different cylinder types by changing the tailpiece, cam or rear housing
- Accommodates thicker doors with six available lengths of rear housing sizes
- Front housing available in all finishes to match the locks
- Supports interchangeability between Everest 29™, Primus® XP, and Classic key systems
- Fewer parts required to fill orders means less inventory and lower costs
- Never be caught on the job without the right part

One cylinder really does fit all

Thanks to the extraordinary versatility of the Schlage® modular cylinder you'll never be caught on the job again without the right part. You'll be able to assemble almost any Schlage cylinder on the spot, while providing your customers the same security, toughness and quality that has made Schlage one of the best names in the business.

- Adaptable to mortise, rim and key-in-lever or key-in-knob applications
- Available in all Schlage keyways, including Everest 29™ and Primus® XP

Electronic validation

For Schlage® Primus and Everest key systems

At Schlage we take key control as seriously as you do. Visit our secure web portal that takes all the hassle out of ordering keys and cylinders for patented or restricted key systems.

Users can now manage all orders on mycredentials.allegion.com, a one stop shop for all validation orders.

Benefits:

- Manage who can generate restricted product authorizations for your keyways
- Get validations completed quicker, rather than waiting on them through the mail
- Ability to review order authorization history
- Eliminate the current paperwork intensive process
- All restricted product authorizations are securely generated by Schlage

How to register

1. Go to **mycredentials.allegion.com**

2. Click "Register new user?"
3. Fill in the user information that will be used to locate and link your e-validation account with your Allegion restricted product account.

4. Company information should be for the parent organization of the restricted key system installed (i.e. County School Corporation versus County High School).
5. Login name will be your company/corporate e-mail address. Cloud based e-mail addresses (Yahoo, Gmail, Hotmail) will not be accepted.
6. Clicking submit will send your request for an account to Allegion for approval. You will receive an authentication e-mail that will require action. Check your e-mail inbox.

Account and contact maintenance

Through your MyCredentials account you can simultaneously manage all account and contact information

How to create a restricted product authorization

1. Go to **mycredentials.allegion.com** and select e-validation
2. Navigate to Create Order Authorization
3. Select the appropriate restricted product account if you have more than one account for your organization.
4. Select existing addresses and contacts for each of the restricted product categories (Locks, Cut Keys, Cut Master Keys and Key Blanks).
 - a. If one doesn't exist – there is an option to add new

5. Click "Preview", review address and ship to contact information and accept to submit or reject to correct.
6. The authorization will be processed with the selections made. An e-mail will be generated and sent to the e-mail address on file for account holder that will contain the electronic facesheet in .pdf file format.
7. Forward the .pdf file received to your distributor via e-mail or fax along with your order for restricted product.

Review restricted product authorization history

Through your MyCredentials account you can review your history of Restricted Product Authorizations (RPA).

- RPA number
- When created
- Who created
- Addresses used
- Ability to "Repeat" a previous RPA

About Allegion

Allegion (NYSE: ALLE) is a global pioneer in safety and security, with leading brands like CISA®, Interflex®, LCN®, Schlage® and Von Duprin®. Focusing on security around the door and adjacent areas, Allegion produces a range of solutions for homes, businesses, schools and other institutions. Allegion is a \$2 billion company, with products sold in almost 130 countries. For more, visit **www.allegion.com**.

Rev. 04/14

Real security is knowing exactly what you want and getting it

When you know exactly what you want, you don't want to waste time finding out whether it meets your project specifications. That's why we offer the world's largest team of hardware specification writers to help you and your clients turn your vision into reality. And when it comes to products, our commercial suiting options, wide variety of lever designs and rich selection of finishes give you the tools you need to make your projects perfect. You know what you want. With Schlage you can be sure you'll get it.

Safety, security and confidence

When you choose a Schlage lock you can be sure you've done the job right the first time. After all, our products are among the most durable and dependable on the market today. Our locks are easy to install, and simple to repair and maintain. That means fewer callbacks for you and total safety and security for your customers.

L Series

Nothing is tougher

At Schlage we know that every product you specify has to stand up to constant use and abuse. Your building's locking systems face an additional challenge – keeping people and other assets safe while delivering constant, reliable performance. Schlage L Series Extra Heavy Duty Mortise Locks are built to withstand the rigors of daily use without fail.

We don't compromise on security

The safety and security of your clients' buildings is something we take very seriously. That's why every Schlage lock and deadbolt undergoes intensive testing to determine its ANSI grade level:

- Cycle tests
- Resistance tests
- Door impact tests
- Warped door tests
- Bolt strength tests

We pay attention to these details so you can focus on creating a functional and aesthetically pleasing environment for your clients. In fact, every one of our L Series locks meets ANSI Grade 1 standards for safety.

Vandlgard®

The L Series Vandlgard is ideal for areas subject to abuse or anywhere vandalism is likely to be present. Vandlgard prevents damage to internal lock components caused by excessive force from kicking, hitting or standing on the lever to gain access.

It's easy to retrofit standard L Series locks with Vandlgard using the Vandlgard Retrofit Kit and an instructional DVD that shows installation on existing hardware.

The right lock for every application

Schlage L9000 Series

Our L9000 Series locks are ideal for use in schools, hospitals and factories, where the finest hardware must also deliver consistent, dependable operation and stand up to constant use and abuse.

Strength and durability

1. Fully wrapped heavy-gauge steel case protects against door edge attacks
2. All-metal zinc dichromate-plated working parts
3. Inside lock case protects electronic components
4. Two-piece anti-friction tongue reduces wear and tear
5. Outside and inside trim thru-bolted together and through the door

Security built in

6. Break-away spindle prevents unsecured failures and provides easy spindle replacement
7. Hub blocking plate protects lock against spindle manipulation
8. Spring-loaded fusible link provides fail secure mode in case of fire
9. Inside lever applied by screwless shank mounting – no exposed trim mount screws

Adaptable to your application

10. Universal lock case – ten functions in one case
11. Floating mounting tabs automatically adjust to fit a beveled door edge
12. Field-reversible handing without opening lock case
13. External spring cages allow for simple trim retrofit
14. Locking thumbturn on the inside of door visually shows when the door is locked and unlocked
15. Lever rotation in both directions (up and down) for ease of use
16. Independent lever rotation

Schlage L400 Series

Our L400 Series locks are designed for use as primary locks where no latching is required, such as restrooms and small doors to utility spaces. They also offer optimum security when used as auxiliary locks in other applications.

1. High-strength steel alloy cylinder retainer
2. Armored front in brass, bronze or stainless steel; adjustable for door bevel
3. 1" (25 mm) stainless steel throw deadbolt
4. Deeper retainer groove in cylinder shell increases security against wrenching and pullout; all cylinders backward compatible
5. 6-pin Everest® cylinder with patented keys standard
6. Steel case and parts are corrosion resistant

The M Collection

A range of options. A single standard of quality.

Introducing the M Collection, an entire lineup of decorative levers designed to maintain a custom high-style look on doors throughout any building—from the main entrance to the supply closet.

The ability to suite M Collection levers across multiple platforms from Schlage and Von Duprin means consistent style and functionality—along with unrivaled security.

The M Collection was designed to function as a visual extension of any interior, from contemporary to classic.

All lever designs shown (M Collection and Standard) can be paired with any of the following commercial graded products for suiting across an office, a floor or an entire building.

Locks

Schlage L Series mortise locks Grade 1

Schlage L Series locks have long been the industry standard for mortise locks, with a comprehensive offering of functions and options to support any opening need.

Schlage LT Series tubular locks Grade 2

The perfect compliment to the Schlage L Series or the Von Duprin exit devices, the LT Series tubular chassis is based on venerable L Series mortise lock and provides an alternative to lever suiting for interior doors.

Exit devices

Von Duprin 98/99 exit devices Grade 1

Von Duprin created the first exit device in 1908, and continues to redefine the industry today with unsurpassed quality and industry-unique features such as concealed vertical cables. The 98/99 Series exit device is intended for standard-stile doors. For use with 996L trim only.

Von Duprin 33A/35A exit devices Grade 1

Offering the same innovate features as the 98/99 Series, the 33A/35A Series of exit devices is intended for narrow-stile doors. For use with 360L trim only.

Von Duprin 94/95 exit devices Grade 1

The 94/95 has the pushbar trim recessed into the door to minimize the external profile, allowing more room for people and equipment to pass through. For use with 940L trim only.

Images shown with Schlage L Mortise 'A' rose; additional rose and escutcheon designs available.

The Standard Collection

Built on our tradition of raising industry standards.

Like the M Collection, these lever designs suite with exit devices and locks from our trusted Schlage and Von Duprin brands. And, they are built to the same exacting standards.

Our Standard Collection levers offer a more traditional style that is appropriate for use in a number of commercial applications.

2 1/8" (54 mm) diameter
Available for use on L Series knob and lever designs. Specify by adding 'A' after lever design

Finishes: 605, 606, 609, 612, 613, 619, 625, 626, 629, 630, 643e

B Wrought rose

2 9/16" (65 mm) diameter
Available for use on L Series knob and lever designs. Specify by adding 'B' after lever design.

Finishes: 605, 606, 609, 612, 613, 619, 625, 626, 629, 630, 643e

C Wrought rose

2 5/8" (66 mm) diameter
Available for use on L Series knob and lever designs. Specify by adding 'C' after lever design.

Finishes: 605, 606, 609, 619, 625, 626, 629, 630, 643e

Thumbturns

Choose from three variations of thumbturn locks that help you meet the demands of specialized commercial projects.

Hotel occupancy indicator 09-611

For lock function L9486P, this unit can be used with A or B roses. Requires a 1 3/8" (35 mm) cylinder for 1 3/4" (44 mm) doors. Specify finish when ordering separately.

Optional EZ turn L583-363

Available for rose and escutcheon trim. Disability turn (ADA) option to standard thumbturn. Can be used with thumbturn-function L Series lock except L9463 and L463. Specify lock per L583-363 when ordering.

Coin turn

For lock function L9044 and L9444 with rose trim. Specify 09-509 and finish per L283-124 when ordering.

03 Lever shown

Products featuring a knurled surface will be indicated by adding the prefix "8" to the lever number. For example, L9050P 803A/03A.

Tactile warning (knurling)

Schlage L Series commercial levers feature knurling only on the outside lever unless otherwise specified.

This feature is available on the following lever models:
01, 02, 03, 05, 06, 07, 12, 17, 18, 41, 42 and 93.

Lock functions

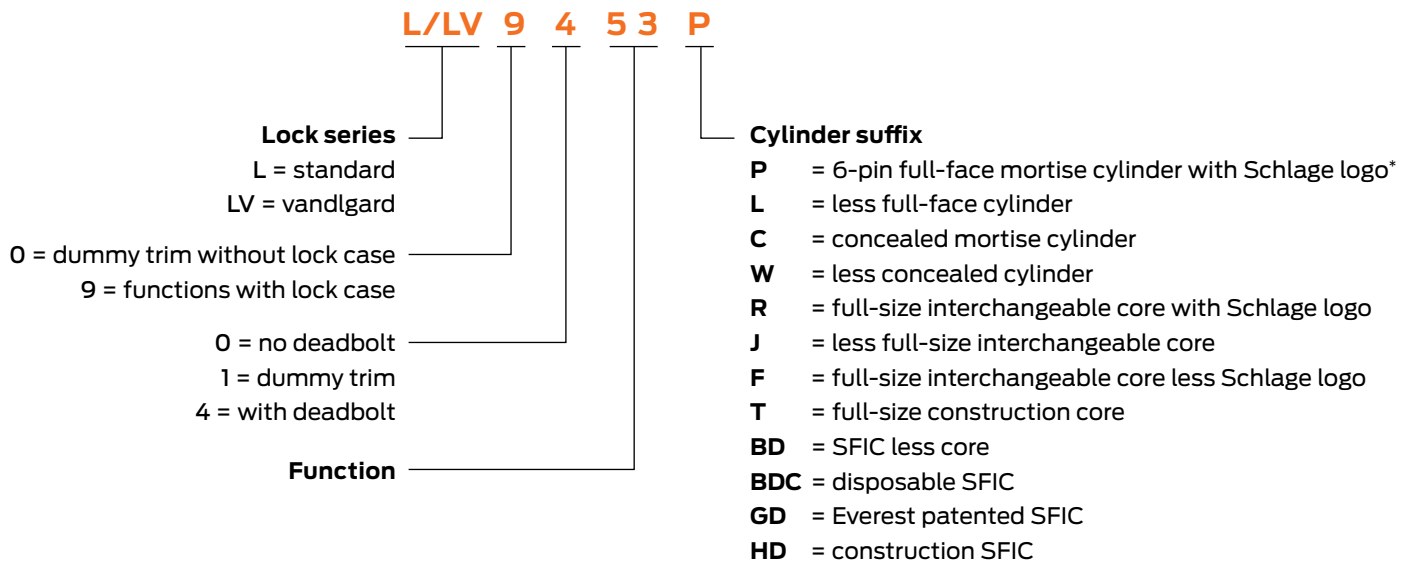

Lock components

Symbol key

SFIC = Small Format (Best® style) Interchangeable Core
 To order less Schlage logo, specify lock
 "with K510-612 faceplate."

LV = Vandlgard® function allows exterior lever to rotate freely down while remaining securely locked.

Lock functions

ANSI A156.13, Series 1000

Schlage ANSI
L9010 F01

Passage latch

Latchbolt retracted by knob/lever from either side at all times. Inside lever is always free for immediate egress.

L9040 F22
LV9040

Bath/bedroom privacy lock

Latchbolt retracted by knob/lever from either side unless outside is locked by inside thumbturn. Turning inside knob/lever or closing door unlocks outside knob/lever. To unlock from outside remove emergency button, insert emergency thumbturn (furnished) in access hole and rotate. Inside lever is always free for immediate egress.

L9044
LV9044

Privacy with coin turn outside

Latchbolt retracted by knob/lever from either side unless outside is locked by inside thumbturn or outside coin turn. Operating inside knob/lever, closing door, rotating inside thumbturn or rotating outside coin turn unlocks outside knob/lever. Specify per L283-056 for Torx® screws. Available with rose trim only. (Previously XL11-868)

L9440 F19
LV9440

Privacy with deadbolt

Latchbolt retracted by knob/lever from either side. Deadbolt thrown or retracted by inside thumbturn. Throwing deadbolt locks outside knob/lever. Rotating inside knob/lever simultaneously retracts deadbolt and latchbolt, and unlocks outside knob/lever. To unlock from outside remove emergency button, insert emergency thumbturn in access hole and rotate. Inside liner is always free for immediate egress. (Previously XL11-761.)

Schlage ANSI
L9444
LV9444

Privacy with deadbolt and coin turn outside

Latchbolt retracted by knob/lever from either side. Deadbolt thrown or retracted by inside thumbturn or outside coin turn. Throwing deadbolt locks outside knob/lever. Rotating inside knob/lever simultaneously retracts deadbolt and latchbolt, and unlocks outside knob/lever. Rotating outside coin turn retracts deadbolt and unlocks outside knob/lever. Specify per L283-056 for Torx screws. Available with rose trim only. Inside lever is always free for immediate egress. (Previously XL11-868)

L0170
Half dummy trim

Knob/lever on one side fixed by mounting bar.

L0172
Full dummy trim

Knob/lever on both sides fixed by mounting bar.

L9175
Half dummy trim with lock case

Fixed knob/lever on one side inoperable. Includes lock case and armored front. Options same as L9176 below.

L9176
Full dummy trim with lock case*

Fixed knob/lever on both sides. Includes lock case and blank armor front. May be ordered with optional XL11-743 armored front with cutout to receive deadbolt.

*In a double-door application where the dummy will be used as the strike order 10-091 Armored Front Strike separately.

Lock functions

Single cylinder non-deadbolt functions

Schlage ANSI
L9050 **F04**
LV9050

Office and inner entry lock

Latchbolt retracted by knob/lever from either side unless outside is made inoperative by key outside or by turning inside thumbturn. When outside is locked, latchbolt is retracted by key outside or by knob/lever inside. Outside knob/lever remains locked until thumbturn is returned to vertical or unlocked by key. Auxiliary latch deadlocks latchbolt when door is closed. Inside liner is always free for immediate egress.

L9056
LV9056

L9050 with automatic unlocking

Latchbolt retracted by knob/lever from either side unless outside is made inoperative by key outside or by rotating inside thumbturn. Outside knob/lever unlocked by key outside, thumbturn or closing door. Rotating inside knob/lever simultaneously retracts latchbolt and unlocks outside knob/lever. Auxiliary latch deadlocks latchbolt when door is closed. Inside lever is always free for immediate egress.

L9070 **F05**
LV9070

Classroom lock

Latchbolt retracted by knob/lever from either side unless outside is locked by key. Unlocked from outside by key. Inside knob/lever always free for immediate exit. Auxiliary latch deadlocks latchbolt when door is closed. Inside lever is always free for immediate egress.

L9076 **F06**
LV9076

Classroom holdback lock

Latchbolt retracted by knob/lever from either side unless outside is locked by key. When locked, latchbolt retracted by key outside or knob/lever inside. Auxiliary latch deadlocks latchbolt when door is closed. Depress inside knob/lever and turn key 360° for holdback feature. Inside lever is always free for immediate egress.

L9080 **F07**
LV9080

Storeroom lock

Latchbolt retracted by key outside or by knob/lever inside. Outside knob/lever is always inoperative. Auxiliary latch deadlocks latchbolt when door is closed. Inside lever is always free for immediate egress.

Schlage ANSI
L9080EL
LV9080EL

Electrically locked (fail safe)

Outside knob/lever continuously locked by 24V AC or DC. Latchbolt retracted by key outside or by knob/lever inside. Switch or power failure allows outside knob/lever to retract latchbolt. Auxiliary latch deadlocks latchbolt when door is closed. Inside knob/lever always free for immediate exit. Inside lever is always free for immediate egress.

L9080EU
LV9080EU

Electrically unlocked (fail secure)

Outside knob/lever unlocked by 24V AC or DC. Latchbolt retracted by key outside or knob/lever inside. Auxiliary latch deadlocks latchbolt when door is closed. Inside lever is always free for immediate egress.

L9080EL-RX / LV9080EL-RX
L9080EU-RX / LV9080EU-RX

Request to exit (RX) electrified lock

Same as L9080EL and L9080EU functions. In addition, a micro-switch positioned inside the lock case monitors the retractor crank, and is actuated when rotation of the inside or outside knob/levers rotates the retractor hub. The switch signals the use of that opening to security systems, allowing a non-disruptive means of immediate egress. Specify per L283-263 with L functions, specify L283-239 with LV functions. Inside lever is always free for immediate egress.

Lock functions

Single cylinder deadbolt functions

Schlage ANSI
L9453 F20
LV9453
Entrance lock

Latchbolt retracted by knob/lever from either side unless outside is locked by 20° rotation of thumbturn. Deadbolt thrown or retracted by 90° rotation of thumbturn. When locked, key outside or knob/lever inside retracts deadbolt and latchbolt simultaneously. Outside knob/lever remains locked until thumbturn is restored to vertical position. Throwing deadbolt automatically locks outside knob/lever. Auxiliary latch deadlocks latchbolt when door is closed. Inside lever is always free for immediate egress.

L9456 F13
LV9456
Corridor lock

Latchbolt retracted by knob/lever from either side. Deadbolt thrown or retracted by key outside or inside thumbturn. Throwing deadbolt locks outside knob/lever. Turning inside knob/lever simultaneously retracts deadbolt and latchbolt and unlocks outside knob/lever. Inside lever is always free for immediate egress.

L9465
Closet/storeroom lock

Latchbolt retracted by knob/lever from either side. Deadbolt thrown or retracted by key outside.

L9473 F21
Dormitory/bedroom lock

Latchbolt retracted by knob/lever from either side. Deadbolt thrown or retracted by key outside or thumbturn inside.

L9480 LV9480
Storeroom lock with deadbolt

Latchbolt retracted by key outside or by lever or knob inside. Outside knob/lever always fixed. Deadbolt thrown or retracted by key outside or thumbturn inside. Turning inside knob/lever simultaneously retracts both deadbolt and latchbolt. Auxiliary latch deadlocks latchbolt when door is closed. Inside lever is always free for immediate egress. (Previously XL11-591)

L9485 x XL11-557
Prison function lock

Latch retracted by key outside or knob inside. Outside knob always free spinning. Deadbolt only thrown or retracted by guard's key. Inside knob becomes fixed when deadbolt is thrown. Prisoner's key only retracts latchbolt. Furnished standard with tamper-resistant Torx screws. Specify per XL11-557.

Schlage ANSI
L9485 F20
LV9485
Faculty/hotel/restroom lock

Latchbolt retracted by key outside or by knob/lever inside. Outside knob/lever always fixed. Deadbolt thrown or retracted by inside thumbturn. When deadbolt is thrown all keys become inoperative except emergency or display keys. Turning inside knob/lever retracts both deadbolt and latchbolt simultaneously. Auxiliary latch deadlocks latchbolt when door is closed. Inside lever is always free for immediate egress.

L9486 F15
LV9486
Faculty/hotel/restroom lock
“do not disturb” indicator

Latchbolt retracted by key outside or by knob/lever inside. Outside knob/lever always fixed. Deadbolt thrown or retracted by inside thumbturn. When deadbolt is thrown “do not disturb” plate is displayed. All keys become inoperative except emergency or display keys. Turning inside knob/lever retracts both deadbolt and latchbolt simultaneously. Auxiliary latch deadlocks latchbolt when door is closed. Inside lever is always free for immediate egress.

L9486 x L583-375 LV9486 x L583-375
L9486 with “occupied” indicator

Latchbolt retracted by key outside or by knob/lever inside. Outside knob/lever always fixed. Deadbolt thrown or retracted by inside thumbturn. When deadbolt is thrown “Occupied” plate is displayed and all keys become inoperative except emergency keys. Turning inside knob/lever simultaneously retracts both deadbolt and latchbolt. Auxiliary latch deadlocks latchbolt when door is closed. Inside lever is always free for immediate egress. (Previously XL11-580)

L9496
Privacy with “occupied” indicator

Knob/lever retracts latchbolt from either side. Deadbolt thrown or retracted by key outside (retraction by key required in the event of an emergency) or inside thumbturn. Throwing deadbolt locks outside knob/lever and displays “Occupied” plate. Rotating inside knob/lever simultaneously retracts both deadbolt and latchbolt, and unlocks outside knob/lever. Inside lever is always free for immediate egress. (Previously XL11-885)

* In a double-door application where the dummy will be used as the strike order 10-091 Armored front strike separately.

Classroom lock

Deadbolt thrown or retracted by key from outside. Inside thumbturn cylinder retracts deadbolt, but cannot project it.

L464 E06081
Cylinder lock

Deadbolt thrown or retracted by key from one side. No trim on opposite side.

L480
Door bolt

Deadbolt thrown or retracted by thumbturn from one side. No trim on opposite site.

L496
Deadbolt with "occupied" indicator

Deadbolt thrown or retracted by key outside or thumbturn inside. When deadbolt is thrown "Occupied" plate is displayed. (Previously XL11-911)

Schlage L Series universal transformation instructions

The L9050 universal case can be transformed into nine different functions* with just a few additional parts.

For some functions, additional parts are not necessary.

ANSI function	Function type	Function description
F04	 L9050 (w/thumbturn) office	Latchbolt operated by lever either side except when outside lever is made inoperative by a stop or other mechanical means other than key. When outside lever is locked, latchbolt is retracted by key from outside or by operating inside lever. Auxiliary deadlatch.
F01	 L9010 passage	Latchbolt operated by lever from either side at all times.
F05	 L9070 classroom	Latchbolt operated by lever either side except when outside lever is locked from outside by key or push button mechanism. When outside is locked latchbolt is retracted by key or by operating key or push button, and outside lever from outside or by operating inside lever. Auxiliary deadlatch.
F07	 L9080 storeroom	Latchbolt operated by key outside or by operating inside lever. Outside lever always inoperative. Auxiliary deadlatch.
F09	 L9060 apartment entrance	Latchbolt operated by lever either side, except when made inoperative by key from inside. When outside is locked latchbolt is retracted by key from outside or by operating inside lever. Auxiliary deadlatch.
F31	 L9080 (less outside cylinder) exit or communicating	Latchbolt operated by inside lever. Non-removable blank trim or no trim outside.
F32	 L9071 classroom security	Latchbolt retracted by lever either side except when outside lever is locked by key from inside or outside. When outside lever is locked latchbolt is retracted by key either side or by inside lever. Auxiliary deadlatch.
	 L9080 (less outside lever) service	Latchbolt operated by key outside or by operating inside lever. No outside lever. Auxiliary deadlatch.
	 L9080 (less inside trim) utility	Latchbolt retracted by key outside; outside lever always inoperative. No inside trim. Auxiliary deadlatch.
	 L9070 (less inside trim) closet	Latchbolt operated by lever on outside except when outside lever is locked from outside by key. When outside is locked latchbolt is retracted by key or by operating key from outside lever. Auxiliary deadlatch.

* Assumes Everest cylinders and L9050 as base function (L283-133 chassis/L9050LB distributor lock case) — only applies to sectional trim (not escutcheon).

Electrified lock function

L9080PEL
L9080PEU
L9082PEL
L9082PEU

Applications:

Security control centers, cashier rooms, fire safety exits, stairwell doors, telephone equipment rooms, computer rooms, hospital equipment and narcotics storage areas.

Regulating devices:

Recognition Systems, Inc., Hand Readers, wall switches, security consoles, access card readers, thermo-sensitive devices, smoke and fire alarms, telephone access controls, automatic time devices and computerized controls.

All installations should be in accordance with local electrical codes and National Electrical Code, NFPA 70.

Electrical Requirements for EL or EU

Voltage: 24V AC or 24V DC (maximum 26V, minimum 22V)

Peak current: Amps 1.3 at 5- to 10-second intervals

Holding current: Amps .135 between peak current intervals

Operating temperature: Maximum +151° F, minimum -31° F

Micro switch electrical requirements for Request to Exit (RX) function

Amps: 1.0

Volts: 24 AC or DC

Peak load: Amps, 5; volts, 250 AC or DC

Replacement kit

L283-053 – Solenoid and driver, EL or EU

Typical wiring diagram for electrified L Series locks

Typical installation

- Electrified L Series locks contain a transistorized circuit that provides full voltage to the solenoid upon initial application of electrical power and at 5- to 10-second intervals.
- Each lock should preferably have its own 24-volt transformer. Two or more locks may be operated in parallel from a single transformer, provided it has the necessary current rating.

Note: DO NOT connect locks in series from a higher voltage rated transformer.

- We DO NOT recommend that these locks be connected to a supply circuit that also contains electromagnetic devices. If an electromagnetic device is connected to the supply circuit, the resulting transient voltages could damage the lock. The transient voltage must be carefully suppressed at the equipment producing them before connecting the lock to the same circuit.
- A varistor rated at 35 volts (peak recurrent) may be used for transient voltage protection.

Cylinder types

Standard cylinders

Schlage locks are provided with cylinders precision-built to extremely close tolerances and the highest standards of accuracy. Using only solid brass bar stock plugs and shells, phosphor bronze springs, and nickel silver keys and bottom pins ensures long life and ease of operation. Our 6-pin Everest cylinders in C123 keyway with two patented keys are standard for stock. C145 is standard for new master key systems.

Primus® high security cylinders

Primus high-security cylinders are available to add patented key control and varying degrees of geographical exclusivity to most Schlage 6-pin key systems, whether Everest or Classic keyways. In addition to a conventional pin tumbler mechanism, Primus cylinders incorporate a patented finger pin and sidebar design, providing a “dual-locking” cylinder that is virtually pick-proof. Resistance to drilling and other physical attack is optional by specifying 20-500 Series UL437 Listed cylinders.

Primus lockout cylinders

For doors where it is frequently desirable to disable all keys from operating the lock temporarily use lockout cylinders. The special lockout key can be removed while the plug is turned to the 11 o'clock position, preventing all normal operating keys, including master keys, from fully entering the cylinder.

Suggested applications for lockout cylinders include laboratories, dark rooms, clean rooms and exterior doors to dormitories.

Schlage will not master key lockout cylinders.

Standard (non-IC) cylinders

* Specify door hand for hotel function cylinders.

** Discard compression ring for Lockout cylinders with escutcheon trim.

Finishes: 605, 606, 611, 612, 613, 619, 625, 626, 629 and 630.

Concealed shell cylinders available in 606 and 626 only.

6-pin Everest C123 keyway standard for stock cylinders; C145 standard for new key systems.

Standard cylinder lengths: sectionals (rose) trim = 1/8" (29 mm), escutcheon trim = 1/4" (32 mm).

Optional cylinder lengths are in 1/8" (4 mm) increments ranging from 1/8" to 3/4" (29 mm to 44 mm).

Full-size interchangeable core (FSIC) cylinders

Schlage figure-8 interchangeable core (IC) cylinders allow immediate rekeying at the door. Simply use the special control key to replace the core in seconds. Full-size IC cylinders can be integrated into any existing 5- or 6-pin Schlage key system with no adverse effects on keying capacity. Convert existing mortise locks to interchangeable core merely by replacing the old cylinder with the IC cylinder and proper collar(s).

For ordering information see page 35.

Full-size IC mortise cylinders

Design	Function	Core mechanism		
		Conventional	Primus	Primus UL437
L & N Escutcheons (cylinders with compression ring)	All except below	30-008	20-798	30-007
	L9060P outside	30-030	20-782	30-032 + 36-083
	L9485P, L9486P hotel functions	30-010*	N/A	30-007
Sectional Trim and L400 Series (cylinder with compression ring, spring and 3/8" blocking ring)	All except below	30-138	20-776	30-137
	L9060P outside	20-061	20-783	30-032 + 36-083 + 35-082-037
	L9485P, L9486P hotel functions	30-140*	N/A	N/A

* Hotel function cores are handed. Specify hand of door. Finishes: 605, 606, 611, 612, 613, 619, 625, and 626. Standard cylinder length is 1 1/2".

Full size interchangeable cores only

Number	Description
23-030	Conventional core
20-740	Primus high-security core
30-120	Hotel function core (specify hand of door)

Available 606 and 626 finish only.

Standard keyway: 6-pin Everest C123 for stock, C145 for new master key systems

Small format interchangeable core (SFIC) cylinders

The L Series lockset can be ordered to accept small format interchangeable cores (SFIC) compatible with manufacturers such as Falcon, Arrow and Best; cams are easily changeable.

To order Schlage L Series mortise locks with SFIC cylinders less core, change suffix P to BD. Example: L9453BD.

To order locks with Everest B Family restricted keyway cores, change suffix to GD. To order with keyed construction cores, change suffix to HD. To order with disposable construction cores, change suffix to BDC.

For ordering information see page 35.

Standard (Non-IC) mortise cylinders

Design	Function	Core mechanism			
		Everest restricted (GD suffix)	Keyed construction (HD suffix)	Disposable construction (BDC suffix)	Housing less core (BD suffix)
L & N escutcheons (cylinders with compression ring and spring)	All* except L9060 outside	80-308	80-138	80-115	80-108
	L9060 outside	30-030	20-782	30-032 + 36-083	80-104
Sectional trim and L400 Series (cylinder with compression ring, spring and 1/4" blocking ring)	All* except L9060 outside	30-138	20-776	30-137	80-101
	L9060 outside	80-304 + 36-082-025	80-134 36-082-025	80-112 36-082-025	80-104 36-082-025

Finishes: 605, 606, 611, 612, 613, 619, 625, and 626.

Standard cylinder length is 1 3/8".

Small format interchangeable core (SFIC) only

Number	Description
80-036	7-pin uncombined Everest B Family restricted keyways
80-037	7-pin combined Everest B Family restricted keyways
80-043	6-pin uncombined Falcon / Best keyways
80-033	7-pin uncombined Falcon / Best keyways

Available 606 and 626 finish only. Specify keyway for existing systems.

80-033 and 80-043 cores are available in A, D, E, F, G, H, J, K, L, and M keyways.

Schlage assigns the keyway when establishing new Everest restricted key systems.

Blocking and compression rings

36-079

Blocking ring. Specify finish and dimension. Not to be used with 36-083.

36-082

Blocking ring. Specify finish and dimension. Use with 36-083.

36-083

Compression ring and spring. Specify finish and dimension.

L538-195

Compression spring.

Classroom thumbturn cylinders

These cylinders are for L463 and L9463 classroom function deadlocks. They are handed. They have a rotational stop in one direction to prevent locking from the inside, but allow unlocking. Cylinders are field-reversible by changing the position of the rotational stop. All cylinders furnished with L583-254 cam.

Number	Collar(s)
09-900	None
09-904	Compression ring and spring
09-905	For 1 ³ / ₄ " doors: compression ring, spring and 1/ ₈ " blocking ring
09-907	For 1 ³ / ₄ " doors: compression ring, spring and 1/ ₈ " blocking ring

Specify hand of door and finish. 1¹/₈" length standard. 09-900 and 09-905 also available in 1/₈" increments up to 1³/₄".

Mortise cylinder cams

K510-053	---	Strike box for 10-079
K10-066	---	Strike box, all except 10-079

*Specify hand of inactive leaf.

Door handing

One of the revolutionary features of the L Series mortise lock is that handing can be done by the distributor or installer quickly and easily without opening the lock case. This feature allows a Schlage distributor to order L Series locks as stock and customize the handing to each order's specification. This means off-the-shelf delivery to meet today's fast-track construction requirements. These mix-and-match lever-with-knob combinations, along with a quickly reversible lock chassis, provide the ultimate in stocking, ordering and installation flexibility. Orders can be filled from stock, minimizing delivery problems.

Changing lock hand

No more than two simple steps are required to change the hand of any L Series lock. Rotate the latch unit 180° and/or change the catch screw position.

A. Changing latchbolt handing
Remove armored front. Pull latchbolt away from chassis and rotate complete unit 180° to reverse the door handing. Reinstall armored front.

B. Change chassis handing
Remove catch screw from one side of chassis and install on opposite side. For RH and RR, the catch screw will be on the lock case side. For LH and LR, the catch screw will be on the lock case cover.

*Catch screw location reversed for Vandlgard function. For first time users, an instructional video is available.

The hand is determined by the direction the door swings when viewed from the exterior or corridor side of the door.

Specifications

Handing:

L9000 Series lock bodies are field-reversible without disassembly. L400 Series locks are non-handed.

Door thickness:

1³/₄" (44 mm) standard. 1³/₈" (35 mm) to 2¹/₂" (64 mm) optional. Over 2¹/₂" (64 mm) door ranges vary by function. No escutcheon available for 1³/₄" (44 mm) doors standard. 2" to 2³/₈" (51 mm to 60 mm) optional. Specify door thickness if other than 1³/₄".

Backset:

2³/₄" (70 mm) only.

Armored front:

L9000 Series: 1¹/₄" x 8" x 7⁷/₃₂" (32 mm x 203 mm x 6 mm) standard. 1¹/₁₆" x 8" x 1⁷/₃₂" (27 mm x 203 mm x 6 mm) optional.
L400 Series: 4⁷/₁₆" x 3⁵/₈" x 1" (113 mm x 92 mm x 25 mm)

Case size:

L9000 Series: 4⁷/₁₆" x 6¹/₁₆" x 1" (113 mm x 154 mm x 25 mm)
L400 Series: 4⁷/₁₆" x 3⁵/₈" x 1" (113 mm x 92 mm x 25 mm)

Spacing:

Knob or lever to cylinder, 3⁷/₈" (98mm); knob or lever to thumbturn hub, 2¹¹/₁₆" (68mm).

Bolts:

1" (25mm) throw stainless steel deadbolt and 3³/₄" (19mm) throw stainless steel latch with anti-friction tongue.

Exposed trim:

Knobs: #41 and #42 heavy-duty wrought brass, bronze or stainless steel knobs match D Series knobs.

Levers: Forged brass or bronze and cast stainless steel. Designs available to match D Series levers.

93 Lever design: Extruded brass, bronze or stainless steel.

Mediterranean designs: Forged-brass lever and rose.

Escutcheons: L escutcheons are cold-forged brass or bronze and stainless steel. N escutcheons are heavy wrought reinforced brass, bronze and stainless steel.

Trim combinations: Available with knob both sides, lever both sides, or knob and lever with rose or escutcheon both sides.

Strike:

L9000 Series: ANSI curved lip strike 1¹/₄" x 4⁷/₈" (32 mm x 124 mm) x 1³/₁₆" (30 mm) lip to center with dust box standard. L400 Series: 1¹/₈" x 3⁵/₈" (29 mm x 92 mm) with dust box.

Cylinder & keys:

6-pin Everest C123 keyway cylinder with two patented keys standard.

Keying options:

Interchangeable core and Primus high security cylinders. Master keying, grand master keying and construction keying.

Certifications

ANSI:

L9000: ANSI A156.13 Series 1000, Grade 1 Operational and Security, UL Listed for 3-hour fire door (except L9076 and L9007). With interchangeable core cylinders: Grade 2 Security. With concealed shell cylinder: A156.13 Grade 1 Operational and Security. ANSI/ASTM F476-76 Grade 40, UL Listed. L400: ANSI A156.5 Grade 1.

California State Reference Code:

(Formerly Title 19, California State Fire Marshal Standard) All levers with returns comply; levers return to within 1/2" of door face.

UL / cUL:

All locks listed for A label single doors, 4' by 10'. Letter F and UL symbol on latch front indicate listing. Electrified functions are UL19X Listed for single-point locking applications. UL437 Listed locking cylinder optional: specify Primus 20-500 Series cylinder.

Ligature
resistant
solutions

When safety is as important as security™

Suicide is the 11th leading cause of death in the United States, with an estimated 800,000 people attempting and over 34,000 people succeeding in taking their life annually.¹

Hospitals are at high-risk for suicide, even when regular patient monitoring checks are in place. In fact, over 1,500 suicides occur in hospitals each year.² A joint commission study on suicides at VA (Veterans Affairs) hospitals found that doors and door hardware were the primary anchor point for 28% of ligature related suicide and suicide attempts - nearly double the next most common attachment point.³

1,500 suicides occur in hospitals each year

Suicide is also the single largest cause of death while incarcerated (29%) - the only cause of death to occur at a higher rate in jails than in the general population.⁴ This problem also extends to juvenile confinement facilities. In a study from 1995 through 1999, ligature strangulation was used in 98.7% of suicides at such facilities, with door hardware used as the attachment point in more suicides than any other means (20.5%).⁵

20% of Juvenile Confinement Facility suicides involved door hardware

Suicide has a higher death rate in jail than in general population.

Schlage now offers a complete solution

Specifically designed to reduce the risk of injury or death due to ligature strangulation in behavioral health facilities and detention centers. Ligature resistant knobs, levers, thumbturns, and cylinder rings combined with IVES® Hospital tip door hinges offer substantial patient protection.

The Schlage® Ligature resistant solution is available for the Schlage L Series mortise locks, as a complete new lock assembly or as a conversion to an existing lock.

SL1 Ligature resistant lever

SK1 Ligature resistant knob

Ligature resistant thumbturn

Ligature resistant cylinder ring

Hospital tip hinge

Although designed to reduce the risk of injury or death due to ligature strangulation, these products are ligature resistant, but are not necessarily ligature proof.

SL1 Ligature resistant lever

- Multiple safety facets including recessed trim, sloped surface, concealed fastening hardware, and integrated clutch that allows the lever to rotate in event of excessive force
- ADA compliant
- Available with new lock or as retrofit
- BAA compliant

Ligature resistant thumbturn

- Included as appropriate with function
- ADA compliant
- Positive stop prevents over extension and presentation of horizontal surface (hazard)
- Sloped surface, recessed trim and concealed fastening hardware minimize attachment opportunity
- BAA compliant

IVES Hospital tip Door hinge

- Ligature resistant sloped tip improves patient safety
- Available option on IVES architectural hinges and pin and barrel continuous hinges

Traditional hinge with flat tip presents ligature attachment opportunity

IVES

SK1 Ligature resistant knob

- Multiple safety facets including recessed trim, sloped surface, and concealed fastening hardware
- Quad design allows grip with entire hand or just fingertips
- Available with new lock or as retrofit
- BAA compliant

Ligature resistant cylinder ring

- Included as appropriate with function
- Sloped surface minimizes ligature attachment opportunity
- Specially designed for each cylinder type
- BAA compliant

Anti-microbial coating

Is available on levers, knobs, turns and cylinder rings.

- A silver-ion based finish
- Inhibits cell growth by limiting its ability to absorb oxygen, process food, or reproduce
- The finish is effective against bacteria, mold, fungus, mildew and algae
- Coating is FDA listed under 21 CFR part 175.300

How to order

Ordering ligature resistant options is easy – simply follow these steps. Lock will be supplied with handles, thumbturn, and cylinder ring as appropriate.

Ligature resistant knob or lever - new lock

L9010

SL1

630AM

XL12-482

1) Choose L lock function

(note: Vandlgard not recommended)

2) Choose knob or Lever

Enter "SK1" for ligature resistant knob or "SL1" for ligature resistant lever

3) Specify finish

Enter "630" for satin stainless steel or "630AM" for satin stainless steel with anti-microbial coating

4) Specify option

Enter "XL11-000" for ligature resistant knob or "XL12-482" for ligature resistant lever

Enter all other lock options as normal. For 1 3/4" doors with sectional trim (other door thicknesses available through special order).

BAA (Buy America Act)

To order BAA, please follow instructions at Allegion Partnerlink -> Campaigns -> Government programs -> BAA

To retrofit an existing L-lock with ligature resistant trim, follow these steps.

- 1) Select the appropriate conversion part number from the table below
- 2) If applicable, specify "P" for standard (P) cylinder types, "R" for Full Size Interchangeable Core (FSIC) cylinders and "BD" for Small Format Interchangeable Core (SFIC) cylinder types following the part number.
- 3) Specify finish as either "630" for satin stainless steel or "630AM" for satin stainless steel with anti-microbial coating.

Conversion kit only available for 1 3/4" doors with sectional trim.

Suiting guide

Featuring M Collection decorative levers
for Schlage and Von Duprin

M51

M54

M61

M85

This is artistry, consistency and quality. These are the M Collection decorative levers.

Door hardware is both a functional component and an architectural element. All the more reason to select durable door hardware that can be suited across the breadth of a facility—all the more reason to select Schlage and Von Duprin.

These names stand for something significant. They mean our customers trust us to deliver security, strength and quality. So whenever we create something new, we make sure it will live up to the very highest standards.

These levers are packed with style and durability. They are constructed of solid

brass or solid stainless steel for a strong-yet-comfortable feel. They also feature bi-directional, independent movement allowing upward and downward motion without disrupting the opposite side of the door.

Our expanded lineup of levers means you get more choices than ever before. And because they are compatible with our mortise and tubular locks, artistry, consistency and quality is effectively maintained throughout a room, a floor, or an entire facility.

A multitude of choices. For every opening.

VON DUPRIN®

Decorative levers

The M Collection

A range of options. A single standard of quality.

Introducing the M Collection, an entire lineup of decorative levers designed to maintain a custom high-style look on doors throughout any building—from the main entrance to the supply closet. The ability to suite M Collection levers across multiple platforms from Schlage and Von Duprin means consistent style and functionality—along with unrivaled security.

The M Collection was designed to function as a visual extension of any interior, from contemporary to classic.

M63

M84

M85

All 15 of the M Collection designs can be paired with any of the following commercial graded products for suiting across an office, a floor, or an entire building.

Locks

Schlage L Series mortise locks / Grade 1

Schlage L Series locks have long been the industry standard for mortise locks, with a comprehensive offering of functions and options to support any opening need.

Schlage LT Series tubular locks / Grade 2

The perfect complement to the Schlage L Series or the Von Duprin exit devices, the LT Series Tubular chassis is based on venerable L Series mortise lock and provides an alternative for lever suiting interior doors.

Exit devices

Von Duprin 98/99 exit devices / Grade 1

Von Duprin created the first exit device in 1908, and continues to redefine the industry today with unsurpassed quality and industry-unique features such as concealed vertical cables. The 98/99 Series exit device is intended for standard-stile doors.

Available on 996L trim only.

Von Duprin 33A/35A exit devices / Grade 1

Offering the same innovative features as the 98/99 Series, the 33A/35A Series of exit devices is intended for narrow-stile doors.

Available on 996L trim only.

Von Duprin 94/95 exit devices / Grade 1

The 94/95 pushbar is recessed into the door to minimize the external profile, allowing more room for people and equipment to pass through.

Pulls and accessories

IVES / Grade 1

Finish the door opening with pulls and accessories that not only deliver exceptional quality, but provide a modern or elegant look depending on the architectural design.

Images shown with Schlage L Mortise 'A' rose; additional rose and escutcheon designs available.

Standard levers

The standard lever collection

Built on our tradition of raising industry standards.

Like the M Collection, these levers can be paired with exit devices and locks from our trusted Schlage and Von Duprin brands. And, they are built to the same exacting standards. Our Standard Collection levers offer a more traditional style that is appropriate for use in a number of commercial applications.

SCHLAGE

LT Series

Decorative tubular locks

Put your confidence in the consistency of Schlage®

The LT Series gives you the quality you can count on from Schlage. LT Series decorative tubular locks are built from the foundational technology of the L Series mortise locks, to provide you the durable, reliable performance that you have come to know from Schlage.

Continuity is key

Safety and security are paramount when choosing door hardware, but continuity in design is also key for those projects that have exacting aesthetic demands. The Schlage LT tubular lock, by suiting seamlessly with Schlage L Mortise locks and Von Duprin exit devices, gives you both.

Seamless suiting with Schlage L Series mortise locks and Von Duprin® exit devices:

- The LT Series utilizes the same levers, finishes and roses as the L Series to provide a consistent look and feel throughout the project.
- All levers are manufactured from solid brass or solid stainless steel for a comfortable, heavy feel.

Attention to detail:

- Hidden lever attachment with no exposed set screws
- Levers move both up and down for a consistent operational experience between tubular locks, mortise locks and exit devices.
- Inside lever moves independently from the outside lever, making for a higher-end, less distracting environment.

Standard lever suite

Trim options

Lock details

Many of the LT chassis components are the exact same as, or very similar in design to, the Schlage L mortise lock. This design commonality allows for a near seamless feel between the two types of locks.

Specifications

Certifications:

ANSI/BHMA A156.2, Series 4000, Grade 2 tubular lock. Optional 20 minute UL fire rating.

Door range:

1³/₈" - 1³/₄" standard, 2" available

Latchbolt:

1¹/₈" x 2¹/₄" w/ 2³/₈" backset with square faceplate (default), optional 1" x 2¹/₄" w/ 2³/₈" backset with square faceplate

Restoring latchbolt:

Yes, privacy function (automatically unlocks if door locked prior to closing)

Strike:

1¹/₈" x 2³/₄" w/ 1¹/₈" lip length, square corner T-strike

Field-reversible handing:

Yes, all lever designs

Functions

LT10 - Passage

Both levers always free

LT10F - Passage

Fire rated

LT40 - Privacy

Inside lever always retracts latch. Outside lever free unless locked by push-pin from inside. Turning Inside handle, closing door, or utilizing emergency pin on outside unlocks outside lever.

LT40F - Privacy

Fire rated

LT170 - Single dummy trim

Dummy trim for one side of door. Used for door pull or as matching inactive trim

LT172 - Pair dummy trim

Dummy trim for both sides of the door

Non-standard door thickness

Specify 2" for extension kit for doors > 1³/₄" to 2" thick, extended equally

Latch options

THP-8201 - Passage latch

1" x 2¹/₄" w/ 2³/₈" backset, square faceplate

THP-8201-F - Passage latch

Fire rated

THP-8219 - Privacy latch

1" x 2¹/₄" w/ 2³/₈" backset

THP-8219-F - Privacy latch

Fire rated

Strike options

10-001 xx - T-strike

Square corner, 1¹/₈" x 2³/₄", specify lip length (xx) as 1", 1¹/₄", 1¹/₂", 1³/₄" or 2"

10-004 - T-strike

Round corner (1/4" radius), 1¹/₈" x 2³/₄" w/ 1¹/₈" lip length

10-025 xx - ANSI strike

1¹/₄" x 4⁷/₈", specify lip length (xx) as 1³/₁₆", 1³/₈", or 1¹/₂"

K510-066

Strike box for 10-025 ANSI strike

10-026 - Full lip strike

Square corner, 1⁵/₈" x 2¹/₄" w/ 1¹/₈" lip length

10-027 - Full lip strike

Round corner, 1⁵/₈" x 2¹/₄" w/ 1¹/₈" lip length

C603-623

Strike box for 10-026 or 10-027 full lip strike

Rev. 04/14

Real security is knowing exactly what you want and getting it

When you know exactly what you want, you don't want to waste time finding out whether it meets your project specifications. That's why we offer the world's largest team of hardware specification writers to help you and your clients turn your vision into reality. And when it comes to products, our commercial suiting options, wide variety of lever designs and rich selection of finishes give you the tools you need to make your projects perfect. You know what you want. With Schlage you can be sure you'll get it.

Safety, security and confidence

When you choose a Schlage lock you can be sure you've done the job right the first time. After all, our products are among the most durable and dependable on the market today. Our locks are easy to install, and simple to repair and maintain. That means fewer callbacks for you and total safety and security for your customers.

ND Series

Continuous improvements make the ND Series a simpler, smarter, stronger lock.

The ND Series has long been one of Schlage's best selling mechanical locks for good reason - it's tough, durable, Grade 1 rated and fits a wide variety of applications. Now we've made our trusted ND Series lock even better by making it easier to install. We've added these enhancements because we know that a lock installed correctly the first time will last longer and perform better. And the longer the lock lasts, the lower the cost of ownership over the life of the lock. We've also beefed up our warranty to provide 10 years of coverage. The result: greater peace of mind that every door is safe and secured with a lock built to last.

So not only do you get our toughest Grade 1 cylindrical lock, that is ideal for use in schools, hospitals, offices, retail spaces, colleges, universities and other applications. You also get the promise of continuous improvements and innovations and our greatest warranty backing your project.

Pictured here: Sparta lever shown in 626 satin chrome

We don't compromise on security

The safety and security of your clients' buildings is something we take very seriously. That's why every Schlage lock and deadbolt undergoes intensive testing to determine its ANSI grade level:

- Cycle tests
- Resistance tests
- Door impact tests
- Warped door tests
- Bolt strength tests

We pay attention to these details so you can focus on creating a functional and aesthetically pleasing environment for your clients. In fact, every one of our ND Series locks meets ANSI Grade 1 standards for safety.

ND Series

The Schlage ND Series is the toughest cylindrical lock we make. That means you get premium durability and performance in a lock that's also easy to service and maintain. And because we test our locks beyond the standards required by ANSI, you know that you're getting a product you can count on to withstand the use and abuse that come with heavy duty commercial applications.

Pictured here: Athens lever shown in 626 Satin Chrome

Built to perform without fail

- Tested to three times the ANSI Grade 1 requirement
- Exceeds ANSI A156.2, Series 4000 Grade 1 locked lever torque requirements
- 10-year limited warranty

New chassis-to-door alignment gauge is embossed with door thickness 1³/₄" and 2", taking the guesswork out of installation by providing visual and positive "stop" for door size adjustment

ND Series with Vandlgard

The ND Series Vandlgard is ideal for areas subject to abuse or anywhere vandalism is likely to be present, such as schools, universities, offices and commercial/public buildings. Vandlgard prevents damage to internal lock components caused by excessive force from hitting or standing on the lever to gain access. Vandlgard functions maintain total key system and architectural design compatibility with Schlage's regular ND Series cylindrical locks.

Locked lever freely rotates up and down while remaining securely locked. The Vandlgard function also increases resistance to over-rotation of the lever.

Door handing

All ND levers are reversible. Hand information is necessary to ensure proper cylinder orientation in keyed functions, and finish of latchbolt and strike for locks that are to be installed on reverse bevel doors. Follow the diagram to correctly determine the hand of the door.

ADA-compliant products

In compliance with the American National Standards Institute (ANSI A117.1) and the Americans with Disabilities Act (ADA), Schlage Lock Company offers a wide selection of locks designed for the needs of the physically challenged. This act is designed to provide protection for people with disabilities.

The intent of ADA is that owners of certain types of buildings must remove barriers and provide people with disabilities with access equal to, or similar to, that available to the general public.

Product information and specifications contained in this catalog are subject to change without notice. Please consult the factory.

ND Series electrified locks

ND Series locks are available for electrically locking and unlocking controls for high security and fire safety applications. They are UL Listed and rated for both fire and electrical single-point locking on labeled doors. RX feature is available on ND10, ND12, ND80 and ND96 families. Switch is ready to be used in a normally open or normally closed application.

Special prep required for RX feature. See service manual for details.

Electrical requirements

Voltage
24VAC or 24VDC

Holding current
.15A or .35A

Operating temperature
Maximum +151°F (+66°C)
Minimum -31°F (-33°C)

Note: All installations should be in accordance with local electrical codes.

Typical wiring diagram for electrified locks

AC power source – EL or EU

Rectifier used on AC operation unit only.
.35A @ 24V (current requirements per lock)

DC power source – EL or EU

.15A @ 24V (current requirements per lock)

AC and DC application

Cut as close to plug as possible for DC operation.

Plug into solenoid for AC operation. Discard for DC operation.

ND Series other special functions

ND30D

Patio lock

Push button locking. Turning inside lever or closing door releases button, preventing a lock-out. Inside lever always free for immediate egress. Specify per XN12-007.

ND25 x 80PD

Storeroom exit lock

Blank plate outside. Key in fixed inside lever retracts latch. Specify per XN12-005.

ND25 x 70PD

Classroom exit lock

Blank plate outside. Key locks or unlocks inside lever. Specify per XN12-004.

ND60PD

Vestibule with closed outside lever

Same as ND60 except outside lever is closed. Inside lever always free for immediate egress. Specify per XN12-001.

ND70 x 80PD

Classroom by storeroom lock

Key locks and unlocks outside lever. Key in fixed inside lever retracts latch. Specify per XN12-006.

ND72PD

Communicating lock

Key in either lever locks and unlocks on lever. Specify per XN12-002.

ND72PD

Vandlgard communicating lock

Communicating, ND72, lock with Vandlgard. Key in either lever locks and unlocks own lever. Both inside and outside levers are clutching. Specify per XN12-003.

Cylinders and key systems

Protect new key systems with Everest 29

Schlage can help you design a system that can grow and change along with your needs, allowing you the flexibility to upgrade your security without the need to replace all your cylinders.

What it operates	What it is
<ul style="list-style-type: none"> Everest 29 Primus® XP cylinders Everest 29 restricted cylinders Everest 29 open cylinders 	<p>UL 437 version</p> <ul style="list-style-type: none"> UL 437 versions provide drill and pick resistance and withstand physical attack High security cylinders have a second set of pins for added security Patented key control sold with various levels of geographic exclusivity Keys operate high security, as well as restricted security or standard security cylinders Available only in conventional

<p>CLASSIC Basic security</p> 	<ul style="list-style-type: none"> Keys can be duplicated at most retail and commercial points of sale with no restrictions Recommended only for residential applications or existing commercial systems that cannot rekey Can be upgraded to Primus XP without rekeying the entire facility Available in conventional and FSIC

Compatible key systems

Schlage key systems	Key-in-lever cylinder	Full size interchangeable core	Small format interchangeable core
Primus XP	X	X	
Everest 29	X	X	X
Classic	X	X	
Other key systems	(6 Pin FSIC)		
Sargent	X	X	X
Corbin Russwin		X	X
Yale		X	X

Cylinder options (how to order)

Cylinder	Order suffix	Description
	LD SAR	Sargent Key-in-lever
	JD SAR	Sargent Full size interchangeable core 6-pin cylinder
	JD C06	Corbin Ruswin Full size interchangeable core 6-pin cylinder
	JD YA6	Yale Full size interchangeable core 6-pin cylinder

Standard cylinders

Standard cylinders are available in Classic keyways or in patented Everest 29 keyways. Specify keyway to differentiate between Everest 29 and Classic.

Example: C or CP (Classic) vs. S123 (Everest 29).

Full size interchangeable core 8

Schlage FSIC full size interchangeable core (IC) locksets allow immediate rekeying at the door simply by using a special control key to replace the core.

Available in all lever designs, full size interchangeable cores can be integrated into any 5 or 6-pin Schlage key.

Standard cylinders - options

- 6-pin conventional (standard)
- Primus XP high security
- Primus XP UL437 Listed high security
- Hotel cylinder
- Temporary construction plug, plastic for functions

Available in 606 and 626 finish only.
Everest 29 S123 keyway standard.

Full size interchangeable cores - options

- Conventional core
- Primus XP high security core
- FSIC driver

Available in 606 and 626 finish only.
Everest 29 S123 keyway standard.

Primus XP access control and high security cylinders

Classic Primus XP cylinders are recommended for upgrading existing Classic key systems. Due to its extended patent life, the newly designed Everest 29 Primus XP is recommended for new key systems and for upgrading existing Everest 29 key systems. Specify keyway to differentiate between Everest 29 and Classic.

Example: C or CP (Classic) vs. S123 (Everest 29).

Small format interchangeable core

Available in all lever designs, the SFIC (small format IC) option is designed for Schlage Everest 29 R family restricted keyway cores and is also compatible with other small format interchangeable cores.

Disposable construction core

Small format interchangeable cores - options

- 7-pin uncombined Everest 29 R family restricted keyways ●
- 7-pin combined Everest 29 R family restricted keyways ●
- 6-pin uncombined Falcon / Best keyways - all keyways ▲
- 7-pin uncombined Falcon / Best keyways - all keyways ▲
- Disposable plastic construction core
- SFIC driver
- Spacer for 6-pin cores

Available 606 and 626 , 613 (simulated) finish only. Specify keyway for existing systems.

- Cores are available in Best A, D, E, F, G, H, J, K, L, and M keyways. Specify keyway by suffixing "B" to keyway letter, e.g. "AB".
- ▲ Restricted keyway cores require a letter of authorization from the end user. Schlage assigns the keyway when establishing new Everest 29 restricted key systems.

*M204-152 does not have a finish option.

Latches

ND Series latches are adjustable for flat or beveled edge doors. Latches and strikes are furnished in brass, bronze, or chrome finishes to be compatible with lock trim. When ordering, specify quantity, part number, and finish. All ND Series latches have 1/2" throw and 1" housings except 2 3/8" backset latches, which includes sleeve G506-815 to fill a 1" edge bore. Standard latches are shown in bold type.

Latches - options

Backset	Description	Deadlatch 1/2" (13 mm) throw	Springlatch 1/2" (13 mm) throw
2 3/8" (60 mm)	1 1/8" (29 mm) x 2 1/4" (57 mm) square corner	3	—
	1 1/8" (29 mm) x 2 1/4" (57 mm) square corner	3	—
2 3/4" (70 mm)	1 1/8" (29 mm) x 2 1/4" (57 mm), standard square corner	3	3
	1 1/8" (29 mm) x 2 1/4" (57 mm) throw, anti-friction door latch, square corner	3	—
3 3/4" (95 mm)	1 1/8" (29 mm) x 2 1/4" (57 mm), square corner	3	3
5"	Backset extension link	3	—

Deadlatch

Springlatch

3/4" Throw anti-friction deadlatch for pairs of fire doors

G506-815

Long backsets

ND Series locks with 5" backsets are normally furnished with 1 1/8" faceplates and 1" housings. Links installed in metal doors require one A501-567 sleeve and 43-005 (order separately) to join latch and link.

Door reinforcement

Reinforcing unit is required to reinforce and help prevent the collapse of hollow metal doors when locksets are tightly mounted. This kit should be used with long backsets for ND Series lock installations in hollow metal doors to prevent lateral movement of the latchbolt. Specify door thickness, 1 3/8" (35 mm) or 1 3/4" (44 mm), when ordering reinforcement kits.

Reinforcement kit
37-001

Kit includes:
Reinforcement
A501-566 for 1 3/8" doors or
A501-565 for 1 3/4" doors

Strikes

All Schlage strikes are furnished complete with screws.

The standard ND Series strike has a $1\frac{3}{16}$ " lip.

When ordering separately specify quantity, product number, finish, and lip length. Standard strikes are shown in bold type.

Strikes - options

- $1\frac{1}{8}$ " x $2\frac{3}{4}$ " (28 mm x 70 mm) square corner, T-strike, box - $1\frac{1}{8}$ " (28 mm) lip length
- $1\frac{1}{8}$ " x $2\frac{3}{4}$ " (28 mm x 70 mm) square corner, T-strike, box - $1\frac{1}{2}$ " (38 mm) lip length
- $1\frac{1}{4}$ " x $4\frac{7}{8}$ " (32 mm x 124 mm) standard, no box, ANSI - $1\frac{3}{16}$ " (30 mm) lip length
- $1\frac{1}{4}$ " x $4\frac{7}{8}$ " (32 mm x 124 mm) ANSI, no box - $1\frac{3}{8}$ " (35 mm) lip length
- Box for 10-025 ANSI strike

ANSI strike—standard
(10-025)
 $1\frac{1}{4}$ " x $4\frac{7}{8}$ " x $\frac{3}{32}$ "

Square corner box strike
(10-013)
 $1\frac{1}{8}$ " x $2\frac{3}{4}$ " x $\frac{3}{32}$ "

Rabbeted latch and strike kit

Rabbeted latch and strike kit finishes: 605, 626.

This kit adapts square corner latches and $2\frac{3}{4}$ " (28 mm) high strikes for $\frac{1}{2}$ " (13 mm) rabbeted door and frame preparations.

Rabbeted latch and strike kit
(39-030)

Accessories

$1\frac{3}{8}$ " D Series lever door spacer*

XN12-012

*For installation on $1\frac{3}{8}$ ", doors, two (2) spacers are required. Specify finish.

Specifications

Handing:

All ND Series lever locksets are non-handed.

Door thickness:

1⁵/₈" to 2¹/₈" (41 mm–54 mm) standard including Vandlgard® functions. 1³/₄" - 2" for function D85. See accessories (Page 21) for spacers required for 1³/₈" doors.

Backset:

2³/₄" (70 mm) standard. 2³/₈", 3³/₄" and 5" (60 mm, 95 mm, 127 mm) optional.

Faceplate:

Brass, bronze or stainless steel. 1¹/₈" x 2¹/₄" (29 mm x 57 mm) square corner, beveled.

Lock chassis:

Zinc plated for corrosion resistance.

Latch bolt:

Steel, 1/2" (12 mm) throw, deadlocking on keyed and exterior functions. 3/4" (19 mm) throw anti-friction latch available for pairs of fire doors.

Exposed trim:

Levers: Pressure cast zinc, plated to match finish symbols.
Roses: Brass, bronze or zinc.

Strike:

ANSI curved lip strike 1¹/₄" x 4⁷/₈" x 1³/₁₆" lip to center standard. Optional strikes, lip lengths and ANSI strike box available. See page 21.

Cylinder and keys:

6-pin Everest 29 S123 keyway standard with two patented nickel silver keys per lock.

Keying options:

Interchangeable core and Primus high security cylinders.
Master keying, grand master keying and construction keying.

Warranty:

Ten-year limited for all mechanical functions including Vandlgard; 1 year limited for electrified functions.

Certifications

ANSI:

Meets the requirements of ICC A117.1 Accessible and Usable Buildings and Facilities.

Federal:

Meets FF-H-106C Series 161.

California Referenced Standards Code:

(Formerly Title 19, California State Fire Marshal Standard)
All levers with a return to door of 1/2" (64 mm) or less comply. Most Schlage levers comply (see lever designs section for compliance).

MEA certification:

All electrified locking (fail-safe, unlocked by switch or power failures) functions accepted for use in New York City by the City of New York, Department of Buildings (MEA 24-04-E).

All levers with less than 1/2" (64 mm) returns comply with California Fire Safety Codes.

Florida Building Commission:

3/4" and 1/2" throw latch approved for Hurricane Resistance with Miami-Dade County, Florida.

UL / cUL:

All locks listed for A label single doors, 4' x 8'.
Letter F and UL symbol.

ADA compliant:

Schlage Lock Company offers a wide selection of locks designed to meet the Americans with Disabilities Act.

ND Series

Grade 1 cylindrical lock

Overview

The ND Series has long been one of Schlage's best selling mechanical locks for good reason - it's tough, durable and fits a wide variety of applications.

Now we've made our trusted ND Series lock even better by making it easier to install. We've added these enhancements because we know that a lock installed correctly the first time will last longer and perform better. And the longer the lock lasts, the lower the cost of ownership over the life of the lock.

We've also beefed up our warranty to provide 10 years of coverage. The result: greater peace of mind that every door is safe and secured with a lock built to last.

A simpler, smarter ND Series lock

Built-in durability exceeds ANSI/BHMA grade 1 cycle test requirements

Chassis-to-door alignment

the yellow gauge takes the guesswork out door adjustment by providing a positive stop that can be adjusted to the most common thickness of 1-5/8", 1-3/4", 2" and 2-1/8" and still allows minor adjustments for added equipment

Optional Vandgard® lever

protects against damage from excessive force and vandalism

Anti-rotation plate retention
allows the plate to be "snapped" on to the chassis making installation easier

Greater lever-to-spindle engagement
the addition of the soft durometer spacer improves the feel of the lever during actuation

ND Series continuous improvements

Reinforcement

Door reinforcement

Prevents the collapse of hollow metal doors when locksets are tightly mounted. The unit works with 1 3/8" and 1 3/4" thick doors.

New lever removal tool

The ergonomic design is bigger, stronger and works for both the ND and L series locks. Sold separately.

Chassis slide

In 2010, we redesigned the slide in order to increase the locks overall durability and improve component alignment.

Locking lug and key cam

In 2009 we improved the locking lug and keycam by making them stronger and more resistant to damage.

Put your trust in the name you know

For more than 90 years, Schlage® has been creating the strongest and most technologically advanced security products for schools, hospitals, hotels, commercial and institutional buildings, multi-family properties and homes. From durable mechanical locks to comprehensive electronic access control solutions and biometrics, Schlage provides protection at critical moments – when property and personal security are at stake. With a wide range of products, styles and finishes, Schlage has products for the most demanding project specifications. In public buildings, in the workplace, and in homes, at the end of the day Schlage stands for one thing: strong.

Real security is knowing exactly what you want and getting it

When you know exactly what you want, you don't want to waste time finding out whether it meets your project specifications. That's why we offer the world's largest team of hardware specification writers to help you and your clients turn your vision into reality. And when it comes to products, our full range of portable security products, commercial suiting options, wide variety of lever designs and rich selection of finishes give you the tools you need to make your projects perfect. You know what you want. With Schlage, you can be sure you'll get it.

Safety, security and confidence

When you choose a Schlage lock, you can be sure you've done the job right, the first time. After all, our products are among the most durable and dependable on the market today. Our locks are easy to install, and simple to repair and maintain. That means fewer callbacks for you and total safety and security for your customers.

One key convenience

Schlage portable security products provide single-key convenience throughout any facility or security area. These locks can be master keyed into any new or existing Schlage key system, allowing you to integrate padlocks with door hardware and eliminating the need for separate keys. These products are also available with Primus® or Everest® cylinders for applications that require extra security.

Portable security

Heavy duty performance for high-traffic applications

At Schlage, we know that every product you choose has to stand up to constant use and abuse without compromising security. Our full line of portable security products delivers tough protection on the job site or at your business, keeping your tools, equipment, supplies, and buildings safe and secure. A wide range of sizes, styles and finishes ensures you get the right lock for the job.

We don't compromise on security

The safety and security of your property and equipment is something we take very seriously. Every Schlage lock undergoes intensive testing including:

- Cycle tests
- Corrosion tests
- Resistance tests
- Impact tests

Portable security product guide

Experience one-key convenience with Schlage portable security products. This extensive range of commercial-grade products includes padlocks, flexible steel locking cables and security chains. These products can be integrated into a new or existing key system, eliminating the need for separate keys, and are perfect for securing a wide variety of lock-up situations.

Note: 1) Less cylinder padlocks ship without a cylinder. Driver and all other internal padlock parts are included.

Steel padlock

- Meet or exceed ASTM standards for standard steel shackle, shackle cutting and corrosion resistance
- Case hardened solid steel body resists impact
- Molybdenum hardened steel shackle offers greater cut resistance
- Double deadbolt locking mechanism provides extra security
- Patented interchangeable shackle design allows for easy disassembly
- Shrouded padlocks (80 & 90 Series) provide increased cut resistance
- Standard cylinder features include:
 - Schlage conventional key-in-knob (KNK) cylinder
 - 6-pin solid brass cylinder (pinned 5) offers increased pick resistance
 - Two nickel silver cut Schlage keys
 - 7-pin SFIC – less cylinder
 - Compatible with Schlage, Falcon®, Best®, Master Lock® and Arrow®
 - Full size interchangeable core

Notes: 1) Product is shipped without cylinder. For cylinder and keying options, refer to your Schlage price book.

Shackle dimensions

Locking cables

- Braided steel vinyl coated cable provides greater cut resistance than twisted cable
- Integrated die-cast zinc locking head (407 satin finish)
- Standard cylinder features include:
 - Schlage conventional key-in-knob (KNK) cylinder
- 6-pin solid brass cylinder (pinned 5) offers increased pick resistance
- Two nickel silver cut Schlage keys
 - 7-pin SFIC
 - Less cylinder
- Compatible with Schlage, Falcon, Best, Master lock and arrow

Cable series - KC215 Series

Part #	Cable size		Cable size (metric)				
	Length	Diameter	Length	Diameter	Cylinder type	Case pack	Master pack
Keyed different							
KC215E220	6'	5/8"	182 cm	15 mm	KNK	1	5
Less cylinder							
KC215A130	2'	5/8"	60 cm	15 mm	SFIC	1	5
KC215B130	4'	5/8"	120 cm	15 mm	SFIC	1	5

Note: 1) Product is shipped without cylinder and with driver. For cylinder and keying options, refer to your Schlage price book.

Security chains and padlocks

- Triple heat-treated boron manganese steel chain
- Unique trapezoidal-shaped chain links for maximum cut resistance
- Recommended for use with KS72F2300

Shackle dimensions

Chain series - KKY Series

Part #	Chain size	Chain size (metric)	Shackle dimension			Shackle dimension (metric)			Cylinder type	Case pack	Master pack
	Length	Length	A	B	C	A	B	C			
Chain only (no cover)											
999478	5'	150 cm	N/A			N/A			N/A	1	1
999461	3' 3"	100 cm	N/A			N/A			N/A	1	1

Note: 1) For master keyed or keyed alike product, order chain and padlocks separately. Order chains #999478 or #999461 with padlock KS72F 2300. Prices are for chains only. Chains and padlocks must be ordered separately.

CL Series cabinet locks

Schlage CL Series cabinet locks use Schlage cylinders that can be master keyed to door hardware for single-key convenience in both new and existing systems. Designed for door, drawer, or cabinets and utility cabinets, the locks are also available with Primus XP high security cylinders for added security.

CL100 Series door lock

- Cylinder retaining screw for quick, easy rekeying
- 1" (25 mm) throw steel deadbolt for reliable strength
- Solid brass cylinder for toughness
- Primus high security cylinder

CL200 Series drawer lock

- $\frac{3}{4}$ " (19 mm) throw steel deadbolt for optimum toughness
- Solid brass cylinder for added strength
- Primus high security cylinder

Cabinet lock functions

Conventional cylinder

Cabinet door lock - CL100PB

Rekeyable: Easily rekeyed via patented set-screw cylinder removal mechanism
 Certifications: ANSI A156.11, Grade 2
 Body: Die cast zinc
 Bolt: Brass, 1⁵/₁₆" projection
 Door thickness: 7/8" to 1³/₈"
 Barrel diameter: 1¹/₈"
 Cylinder: Everest 29 S123 keyway standard, Available in Primus XP, Everest 29, Everest and Classic keyways
 Keying: KD, KA or MK
 Finishes: 605, 626

Not available without cylinder

Drawer lock - CL200PB

Rekeyable: Easily rekeyed via patented set-screw cylinder removal mechanism
 Certifications: ANSI A156.11, Grade 2
 Body: Die cast zinc
 Bolt: Steel, 3/4" throw
 Door thickness: 7/8" to 1³/₈"
 Barrel diameter: 1¹/₈"
 Cylinder: Everest 29 S123 keyway standard, Available in Primus XP, Everest 29, Everest and Classic keyways
 Stock keying: KD, KA or MK
 Finishes: 605, 626

Not available without cylinder

Finishes

Bright brass 605

Satin chrome 626

Full size interchangeable core (FSIC)

Cabinet door lock - CL777R

Rekeyable: Easily rekeyed via patented set-screw cylinder mechanism
 Certifications: ANSI A156.11, Grade 1
 Body: Die cast zinc
 Bolt: Brass, 1⁵/₁₆" projection
 Barrel length: 17/16"
 Barrel diameter: 1¹/₈"
 Cylinder: Everest 29 S123 keyway standard, Available in Primus XP, Everest 29, Everest and Classic keyways
 Keying: KA, KD, MK or construction core
 Finishes: 605, 626

Not available without cylinder

Drawer lock - CL888R

Rekeyable: Easily rekeyed via patented set-screw cylinder mechanism
 Certifications: ANSI 156.11, Grade 2
 Body: Die cast zinc
 Bolt: Brass, 7/8" projection
 Door thickness: 7/8" to 1³/₈"
 Barrel diameter: 1 1/8"
 Cylinder: Everest 29 S123 keyway standard, Available in Primus XP, Everest 29, Everest and Classic keyways
 Keying: KA, KD, MK or construction core
 Finishes: 605, 626

Not available without cylinder

Cam lock - CL920R

Body: Die cast zinc
 Body diameter: 1¹/₈"
 Mounting cutout: 1⁵/₃₂"
 Max material thickness: 1¹/₈"
 Min material thickness: 0.08"
 Across flats: 7/8"
 Cylinder: Everest 29 S123 keyway standard, Available in Primus XP, Everest 29, Everest and Classic keyways
 Keying: KA, KD, MK or construction core
 Finishes: 605, 626

Not available without cylinder

Ratchet lock - CL929R

Body: Die cast zinc
 Body diameter: 1¹/₈"
 Max door material thickness: 1/4"
 Cylinder: Everest 29 S123 keyway standard, Available in Primus XP, Everest 29, Everest and Classic keyways
 Keying: KA, KD, MK or construction core
 Finishes: 626

Not available without cylinder

Cabinet lock functions (continued)

Small format interchangeable core (SFIC)

Cabinet door lock - CL721G

Certifications: ANSI A156.11, Grade 1
 Body: Die cast zinc
 Bolt: Brass, 3/4" projection
 Door thickness: Fits up to 1 1/4" doors
 Barrel diameter: 1 1/8"
 Cylinder: Everest 29 R
 Keying: MK or construction core
 Finishes: 626

Not available without cylinder

Drawer lock - CL771G

Certifications: ANSI A156.11, Grade 1
 Body: Die cast zinc
 Bolt: Brass, 3/4" projection
 Door thickness: Fits up to 1 1/4" doors
 Barrel diameter: 1 1/8"
 Cylinder: Everest 29 R
 Keying: MK or construction core
 Finishes: 626

Not available without cylinder

Rim latch lock - CL725G

Body: Die cast zinc cylinder housing, stamped steel back plate and steel case
 Barrel diameter: 1 1/8"
 Max material thickness: 1/16"
 Compatibility: Retrofits Best 5L Series
 Cylinder: Everest 29 R
 Keying: MK or construction core
 Finishes: 626

Not available without cylinder

Rim deadbolt lock - CL775G

Body: Die cast zinc cylinder housing, stamped steel back plate and steel case
 Barrel diameter: 1 1/8"
 Max material thickness: 1/16"
 Compatibility: Retrofits Best 5L Series
 Cylinder: Everest 29 R
 Keying: MK or construction core
 Finishes: 626

Not available without cylinder

Cam lock - CL720G

Body: Die cast zinc
 Body diameter: 1 1/8"
 Mounting cutout: 1 5/32"
 Max material thickness: 1/8"
 Min material thickness: 0.08"
 Across flats: 7/8"
 Cylinder: Everest 29 R
 Keying: MK or construction core
 Finishes: 626

Not available without cylinder

Mailbox lock - CL728G

Material: Zinc die cast cylinder housing, steel body
 Barrel length: Adjustable
 Handing: RH standard
 Retrofits: Best 8L
 Cylinder: Everest 29 R
 Keying: MK or construction core
 Finishes: 626

Not available without cylinder

Ratchet lock - CL729G

Body: Die cast zinc
 Body diameter: 1 1/8"
 Max door material thickness: 1/4"
 Cylinder: Everest 29 R
 Keying: MK or construction core
 Finishes: 626

Not available without cylinder

Put your trust in the name you know

For more than 90 years, Schlage® has been creating the strongest and most technologically advanced security products for schools, hospitals, hotels, commercial and institutional buildings, multi-family properties and homes. From durable mechanical locks to comprehensive electronic access control solutions and biometrics, Schlage provides protection at critical moments – when property and personal security are at stake. With a wide range of products, styles and finishes, Schlage has products for the most demanding project specifications. In public buildings, in the workplace, and in homes, at the end of the day Schlage stands for one thing: strong.

Real security is knowing exactly what you want and getting it

When you know exactly what you want, you don't want to waste time finding out whether it meets your project specifications. That's why we offer the world's largest team of hardware specification writers to help you and your clients turn your vision into reality. And when it comes to products, our commercial suiting options, wide variety of lever designs and rich selection of finishes give you the tools you need to make your projects perfect. You know what you want. With Schlage, you can be sure you'll get it.

Safety, security and confidence

When you choose a Schlage lock, you can be sure you've done the job right, the first time. After all, our products are among the most durable and dependable on the market today. Our locks are easy to install, and simple to repair and maintain. That means fewer callbacks for you and total safety and security for your customers.

S Series and S200 Series

Smart security for light commercial and multi-family applications

At Schlage, we know that every product you specify has to stand up to constant use, while meeting your needs for security at every level.

Our S Series and S200 Series locks are designed to deliver constant, reliable performance in light commercial applications like small hotels, laboratories and office tenant spaces, as well as apartment buildings.

We don't compromise on security

The safety and security of your clients' buildings is something we take very seriously. That's why every Schlage lock and deadbolt undergoes intensive testing to determine its ANSI grade level:

- Cycle tests
- Resistance tests
- Door impact tests
- Warped door tests
- Bolt strength tests

We pay attention to these details so you can focus on creating a functional and aesthetically pleasing environment for your clients. In fact, every one of our S Series locks meets ANSI Grade 1 standards for safety.

Door handing

With the exception of the Flair lever design, the S Series lock is reversible. Hand information is necessary to ensure proper cylinder orientation in keyed functions, and finish of latchbolt and strike for locks that are to be installed on reverse bevel doors. Follow the diagram to correctly determine the hand of the door.

ADA-compliant products

In compliance with the American National Standards Institute (ANSI A117.1) and the Americans with Disabilities Act (ADA), Schlage Lock Company offers a wide selection of locks designed for the needs of the physically challenged. This act is designed to provide protection for people with disabilities.

The intent of ADA is that owners of certain types of buildings must remove barriers and provide people with disabilities with access equal to, or similar to, that available to the general public.

Product information and specifications contained in this catalog are subject to change without notice. Please consult the factory.

CLASSIC
Basic security

- Keys can be duplicated at most retail and commercial points of sale with no restrictions
- Recommended only for residential applications or existing commercial systems that cannot rekey
- Can be upgraded to Primus XP without rekeying the entire facility
- Available in conventional and FSIC

- Classic cylinders

Standard cylinders

Standard cylinders are available in Classic keyways or in patented Everest 29 keyways. Specify keyway to differentiate between Everest 29 and Classic.
Example: C (Classic) vs. S123 (Everest 29).

Cylinders for keyed levers - options

- 6-pin conventional cylinder (standard)
- Primus high security cylinder
- Primus UL437 Listed high security cylinder

Available in 606 and 626 finish only.
Everest 29 S123 keyway standard for commercial; C keyway standard for residential.

Sleeve S605-192 included.

Full size interchangeable core

Schlage interchangeable core (IC) locksets allow immediate rekeying at the door simply by using the special control key to replace the core in seconds.

FSIC locksets are available in Jupiter, Neptune and Saturn designs.

Full size interchangeable cores can be integrated into any 5 or 6-pin Schlage key system with no adverse affects on keying capacity.

Full size interchangeable cores - options (for JD suffix locksets)

- Conventional core
- Primus high security core

Available in 606 and 626 finish only.
Everest 29 S123 keyway standard for commercial; C keyway standard for residential.

Primus XP high security cylinders

Primus XP cylinders are recommended for upgrading existing Classic key systems. Due to its extended patent life, the newly designed Everest 29 Primus is recommended for new key systems and for upgrading existing Everest 29 key systems. Specify keyway to differentiate between Everest 29 and Classic.
Example: CP (Classic) vs. S123 (Everest 29).

Interchangeable core conversion kits

It is easy to convert standard S Series locksets to accept Schlage full size interchangeable cores by changing the lever and adding the parts shown.

Interchangeable core components - options

- Lever, driver, plug, retainer*
- Lever only*
- Retainer
- Driver
- IC installation tool

* Specify design and finish.

Latches

The standard universal backset deadlatch fits both 2³/₈" (60 mm) and 2³/₄" (70 mm) backsets. They are adjustable for flat or beveled edge doors and have a 1/2" (13 mm) throw. Orders for complete locks are provided with a G506-815 sleeve for 7/8" diameter latches installed in doors with 1" (25 mm) edge bore. All latches have 1" x 2 1/4" (25 mm x 57 mm) square corner fronts. Standard latches are shown in bold type.

Note: Failure to use the below referenced latches and fire cup, included with the lockset, will invalidate the UL Listing.

Deadlatches - options

Backset	Faceplate description	Hsg dia
2 ³ / ₈ " or 2 ³ / ₄ "	1" x 2 1/4" Square corner*	7/8"
	1" x 2 1/4", 1/4" Radius round corner	7/8"
5"	1" x 2 1/4" Square corner*	7/8"

*Latches include A501-878 faceplate adapter for 1 1/8" face.

Specifications

Handing:

Not handed, except Flair design.

Door thickness:

1³/₈" to 2" (35 mm-51 mm) except S40D: 1³/₈" to 1⁷/₈" (35 mm-48 mm)

Backset:

Universal backset latches standard, fit either 2³/₈" (60 mm) or 2³/₄" (70 mm). 5" (127 mm) optional.

Fronts:

Steel. 1" x 2¹/₄" (25 mm x 57 mm) square corner, beveled, for 2³/₄" backset standard.

Lock chassis:

Tubular construction. Zinc with steel cover.

Latch bolt:

Brass, chrome plated, 1/2" (13 mm) throw, deadlocking.

Exposed trim:

Levers are zinc base, plated to match finish symbols. Roses, latch faceplates and strikes are wrought brass or bronze.

Strike:

T-strike 1¹/₈" x 2³/₄" (29 mm x 70 mm) x 1¹/₈" (29 mm) lip to center with box standard. Optional strikes, lip lengths and ANSI strike box available.

Cylinder and keys:

Commercial: 6-pin patented Everest 29 S123 keyway standard with two nickel silver keys per lock.

Residential: 6-pin C keyway, keyed 5-pin.

Keying options:

Interchangeable core and Primus high security cylinders. Master keying, grand master keying, and construction keying.

Warranty:

Commercial: Three-year limited.

Certifications

ANSI

Meets or exceeds A156.2 Series 4000, Grade 2 strength and operational requirements.

Federal:

Meets FF-H-106C.

California State Reference Code:

(Formerly Title 19, California State Fire Marshal Standard)

All levers with a return to door of 1/2" (64mm) or less comply.

UL / cUL:

All locks listed for A label single doors, 4' x 8'.

Letter F and UL symbol on latch front indicate listing.

UL437 Listed locking cylinder optional: specify Primus 20-500 Series cylinder.

ADA compliant:

Schlage Lock Company offers a wide selection of locks designed to meet the Americans With Disabilities Act.

S200 Series

When it comes to quick, easy egress and dependable security, Schlage S200 Series interconnected locks get the job done. Designed for applications ranging from military housing to multi-family and small hotel/motel buildings, the S200 Series is a lock you can depend on.

Standard cylinders

Schlage locks are provided with cylinders precision built to extremely close tolerances and the highest standards of accuracy. Using only solid brass plugs, extruded brass shells, phosphor bronze springs, nickel silver keys and pins, ensures long life and ease of operation.

Conventional cylinders are available in Classic keyways or in the newly patented Everest 29 keyways. Specify keyway to differentiate between Everest 29 and Classic. Example: C (Classic) vs. S123 (Everest 29).

Cylinders for deadbolt (top) - options

- 6-pin conventional (standard)
- Primus XP high security
- Primus XP UL437 Listed high security

Cylinder only available in 606 and 626 finish only.
Cylinder with housing available 605, 606, 609, 612, 613, 625, 626.

Everest 29 S123 keyway standard for commercial; C keyway standard for residential.

Cylinder only

Cylinders for keyed levers (bottom)- options

- 6-pin conventional (standard)
- Primus XP high security cylinder
- Primus XP UL437 Listed high security

Available in 606 and 626 finish only.

Everest 29 S123 keyway standard for commercial;
C keyway standard for residential.

Sleeve S605-192 included.

Primus XP access control and high security cylinders

Primus XP access control and high security cylinders are available to add patented key control and varying degrees of geographical exclusivity to most Schlage 6-pin key systems, whether Everest 29 or Classic keyways.

In addition to a conventional pin tumbler mechanism, Primus cylinders incorporate a patented finger pin and sidebar design, providing a “dual-locking” cylinder that is virtually pick-proof. Resistance to drilling and other physical attack is optional by specifying 20-500 Series UL437 Listed cylinders.

Classic Primus XP cylinders are recommended for upgrading existing Classic key systems. Due to its extended patent life, the newly designed Everest 29 Primus XP is recommended for new key systems and for upgrading existing Everest key systems. Specify keyway to differentiate between Everest 29 and Classic. Example: C or CP (Classic) vs. S123 (Everest 29).

Visit allegion.com for more information.

Interchangeable core 8

Schlage interchangeable core (IC) locksets allow immediate rekeying at the door simply by using the special control key to replace the core in seconds.

IC locksets are available in all designs except Flair.

Full size interchangeable cores can be integrated into any 5 or 6-pin Schlage key with no adverse affects on keying capacity.

To order complete locks with full size cores, change suffix from **PD** to **RD**. Example: S251**RD**. To order locks less core, change suffix to **JD**. To order with full size construction core, change suffix to **TD**.

Cores, and IC cylinders and parts

Full size core

Full size interchangeable cores - options

- 6-pin conventional (standard)
- Primus high security cylinder

Available in 606 and 626 finish only. Everest 29 S123 keyway standard for commercial; C keyway standard for residential.

IC cylinders for deadbolt (top) - options

Tailpiece not included.

- Conventional core
- Primus core
- Primus XP core
- Housing less core

Available in 605, 606, 609, 612, 613, 625 and 626 for housing; 606 and 626 for cores and cylinders only.

Everest 29 S123 keyway standard for commercial; C keyway standard for residential.

IC installation tool

This tool is used to install the driver and retainer for full size IC in Schlage knobs and levers. Its other ends are designed to install and remove mortise cylinder housings and test mortise cylinder cam action for both small format and full size interchangeable core cylinders.

M504-413
(Order separately)

Latches and deadbolts

The standard universal backset deadlatch fits both 2³/₈" (60 mm) and 2³/₄" (70 mm) backsets. They are adjustable for flat or beveled edge doors and have a 1/2" (13 mm) throw. Orders for complete locks are provided with a G506-815 sleeve for 7/8" diameter latches installed in doors with 1" (25 mm) edge bore. Deadbolts have 1" (25 mm) housings and 1" (25 mm) throw. All latches and bolts for the S200 Series have 1¹/₈" x 2¹/₄" square corner fronts.

Note: Failure to use the below-referenced latches and fire cup, which are included with the lockset, will invalidate the UL Listing.

Latch front adapter
A501-878

Used to convert 1" (25 mm) wide squarefront faceplates for 1¹/₈" (29 mm) wide doorpreparations. Furnished in black plastic. Order in multiples of 100.

Sleeve
G506-815

Used on 7/8" (22 mm) diameter latch housings in 1" (25 mm) edge bore. Furnished standard with complete locks.
